Accessing Curriculum via the PowerUp:HUB

What is the HUB?
The PowerUp:HUB, or HUB for short, is a K-12 digital teaching and learning platform that when fully implemented will become the hub of collaboration, curriculum, instruction, and communication for HISD staff, students, and parents.

Starting in the 2014-2015 school year, ALL teachers in ALL grades can access the district's curriculum through the HUB at www.houstonisd.org/hub.

There are two steps to accessing curriculum via the HUB:

Step 1. **Log on to www.houstonisd.org/hub**
To make things more efficient, access to the HUB is single sign-on, meaning once you sign-on to your computer with your HISD user id and password, you will not need to re-enter it to access the HUB.
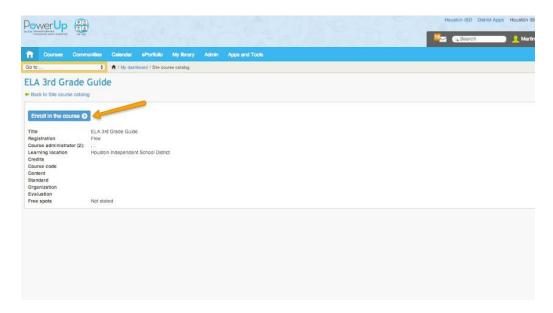

Step 2. **Access Curriculum**
Click on "Site Course Catalog" under "Courses" on your HUB landing page to navigate to the particular course(s) you are trying to view. From there you will be taken to a Site Course Catalog page where you will look or search for the particular courses whose curricula you seek. Generally, courses are named <Subject> then <Level> then "Guide," such as "ELA 7th Grade Guide." From there, you enroll in the course as shown below.

Accessing Curriculum through eLearn

Please plan to use the HUB as the *primary source* for HISD curriculum access. If you encounter any difficulties, core curricula will be loaded into www.hisdelearn.org for the 2014-2015 school year as a backup measure. Use self-registration to access curriculum on eLearn if necessary. Full instructions are available at eLearn under the Elementary and Secondary Curriculum icons. Curriculum on eLearn is organized by content area.
