Thank you for taking the time to visit James S. Deady Middle School. Deady’s Energy, Medicine, and Aerospace Magnet Program will serve students in 6th, 7th, and 8th grade with a rigorous curriculum and positive environment that empowers our students and prepares them for success in our modern era of technology. Providing our students with a strong Science, Technology, Engineering, and Mathematics (STEM) based education is crucial to their success as adults. We want to deliver to our students an experiential education that excites, engages, and enriches through a unique, learn-by-doing curriculum. In our STEM Magnet Program, students will be challenged with advanced math and science courses enriched with aerospace based elective classes to cultivate a love of exploration and critical thinking.

Deady Middle School is a place where students are encouraged to explore all their interests. We offer a full range of electives such as fine arts, sports, and after school club activities for students to participate in. The Deady faculty and staff is committed to work with each individual child to ensure they are prepared for the challenges that lie ahead. We want our students to discover a path that will enable them to have a more productive education. We look forward to welcoming you into the Deady family!
VISION STATEMENT
Deady Middle School, in partnership with the community will develop students academically to be college & career ready through rigorous instruction and by having a goal-oriented mindset.
