

Expanding File Organizer Tips

3-Ring Binders are acceptable, however we have found that students are more likely to organize or file their work correctly with an accordion, rather than hole punch their work.

A file according with 10-13 pockets (any more than 13 is unnecessary).

A handle and zipper/buckle will make it easier to carry and close.

After speaking with a few of the switch teachers, here is what we think might be the best option to label the pockets. It is up to you and your child to decide what works best for their organization.
