

Animation

Pathway Description

Westside High School's Animation pathway provides a hands-on introduction of concepts, tools and techniques used in the animation industry. These classes develop students' talents with a combination of technical instruction and practical experience for aspiring animators in both 2-dimensional and 3-dimensional animation.

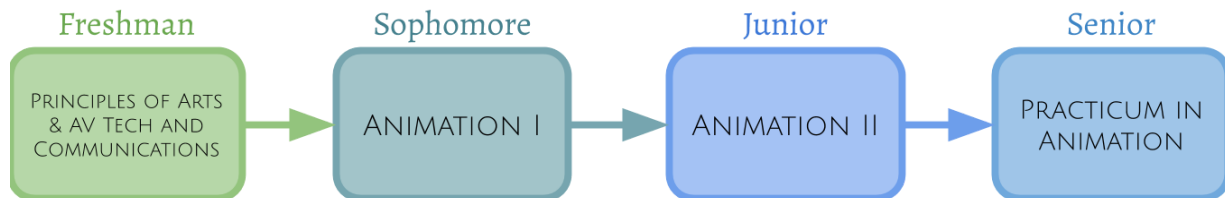

Students will work through the stages of preproduction, production and postproduction and explore the career paths available to them within the industry.

Students will be held to a high standard of performance to prepare them for the college, technical education or workforce they will soon be joining.

Most importantly, this course will provide the opportunity for students to express their creativity and individuality and equip them with tools to tell their own personal story.

Course Sequence
