

AUDIO VIDEO PRODUCTION

The goal of Westside's Audio Video Production program is for the student to understand arts, audio/video technology, and communications systems. Within this context, students will be expected to develop an understanding of the various and multifaceted career opportunities in this cluster and the knowledge, skills, and educational requirements for those opportunities. The AV Practicum utilizes the application of professional video techniques in programming with an emphasis on studio operation, fundamentals of using multiple media to produce for print, broadcast and online platforms. It also encompasses video pre-production and production management, including techniques of script breakdown, scheduling, budgeting, and producing of professional productions and student projects. The students who will thrive in this pathway enjoy the creative process and aren't afraid of hard work. They enjoy working on the computer. They have a story they want to tell and love to find new ways to tell it. They do not have to be good at drawing or art to succeed.
