

Sinclair Elementary

A STEM Communications School

August 2020

Dear Parents/Guardians:

We are excited to share with you a new program that our campus has adopted in order to help students grow in reading. Imagine Learning is adaptive software that identifies your student's reading level and provides stories, games, and videos created specifically for that level in order to continue growing literacy and language skills. As your student uses the program, it will provide additional challenge and/or review based on your child's progress.

Students are using Imagine Learning on a weekly basis at school. We would now like to extend the opportunity for students to increase their reading time at home by providing home access. This certainly does not replace the nightly 20 minutes that your student spends reading a book of their choice. However, it can be a useful tool if you are looking for ways to make your child's screen time more productive on weekends or simply would like your child to have more practice in reading.

On the reverse side of this letter is a flyer from Imagine Learning with a bit more information on what your child will experience as well as how to access your child's individualized lessons from home. The Imagine Learning app can be accessed from any desktop browser, iPad, Chromebook, android tablet, or windows tablet. Simply access go.imaginelearning.com through your web browser, download the app (if accessing from a device other than a desktop or laptop), and enter your student's username and password. Both the username and password will be a capital "S" followed by your student's 7-digit student ID (e.g., S1234567). You will also be asked to enter our school's site code, which is below. Please note that usernames and passwords are case sensitive.

Site Code: 4823640

You may reference a paper copy of this letter sent home with your child that shares their unique username and password with you. We hope that Imagine Learning becomes a valuable resource in your home to grow your student's learning. Please feel free to contact our front office at (713) 867-5160 with any questions.

Sincerely,

Lee Mashburn

Imagine Learning is coming home

Imagine Learning is an award-winning literacy and language software program for students of many abilities and needs. As your child engages in the program, they can read, listen, and sing along with thousands of learning activities, videos, and games all designed for kids.

Now your child can log in to Imagine Learning at home and pick up right where they left off in school.

+ Imagine Learning builds:

- Reading skills
- Speaking and listening skills
- Comprehension
- Vocabulary about various subjects
- Critical thinking

+ Kids enjoy:

- Exciting learning games, songs and activities
- Personalized learning experience
- First language support for English language learners

+ Start today!

Visit go.imaginelearning.com

Log in using the information provided by your child's teacher.

For the program to work as intended, only children already assigned to Imagine Learning at school should use it at home.

Home access is possible on computers or tablets, including PCs, Macs, iPads, Chromebooks, Android tablets, and Windows tablets (no smart phones). For a complete list of system requirements, visit support.imaginelearning.com.

For the best experience in Imagine Learning, please use headphones (or speakers) plus a microphone.
