

How to Download/Join a Class in Microsoft Teams

Once you have successfully downloaded and installed the Microsoft Teams program, click on the "Teams" button. On a laptop, this is usually on the far left side of your screen. On a device, this is usually at the bottom.

You should see 9 tiles when you click on the "Teams" button, one for each of your classes. Click on the appropriate tile based on what class you need to attend. You do not need to enter with a code. We have already placed you on a team.
