**CS Discoveries Workshops & CS Principles Workshops
July 26, 2021 - July 30, 2021**

Professional Learning Virtual Workshop for Computer Science Middle and High School Teachers

At this time, the [Rice University School Mathematics Project](#) is planning to offer virtual CS Discoveries and CS Principles local summer and in-person academic year workshops in the 2021-2022. Summer 2021 workshops will be in June / July 2021.

The program includes:

- An in-person five-day summer workshop, which will fully prepare educators to utilize [Code.org](#) curricula and teacher support systems.
- Four one-day workshops (or eight virtual sessions) during the school year when teachers will reconvene for ongoing training and just-in-time support.
- Additional opportunities for online and face-to-face networking and collaboration with peers throughout the year.

Funding Opportunities:

Computer Science Discoveries and Principles workshops are offered at no cost to qualifying teachers accepted into the program. If you don't meet the requirements to attend at no cost, the program is still only \$1,500 per Texas teacher, which is a 50% discount off the national cost thanks to our generous supporters at [Code.org](#).

Texas Computer Science courses, including those aligned to CS Discoveries (Fundamentals of CS) and CS Principles, have recently moved to CTE, and qualify for weighted funding. Teachers should check with their administrators to see if these funds are available to support their involvement in this Professional Learning Program. There are also scholarships available for those who qualify. The program fee includes teaching materials, workshop supplies five in-person or virtual (if it is unsafe for in-person) summer workshop days and four in-person or eight virtual follow-up sessions during the academic year. Additional travel costs (i.e., mileage and lodging costs) are not covered by the fee.

[Code.org](#) curriculum, online student learning platform, and access to support from the teacher and [Code.org](#) community are available to all schools' year round at no cost.

If you are interested in CS Fundamentals, please contact us directly (contact info is below) to set up / schedule a workshop.

See Frequently Asked Questions about CS Discoveries [here](#) and CS Principles [here](#).

ATTN: LAW & PUBLIC SAFETY PROGRAM OF STUDY

Upcoming Webinars (all times are Eastern Standard Time)

[Click here for a full webinar schedule during the month of April 2021 through July 2021.](#)

From your neighborhood cop, to prosecutors, the probation officers, court staff – even the academics who research and study this sector, we help justice professionals stay on top of the trends, best practices, and success stories in their industry through articles, webinars, and training.

While a significant portion of our members are from the law enforcement arena, we have members come from all reaches of the Justice/Public Safety arena. The mix of justice professionals attending our webinars will vary depending on the topic. While our live events are [free to attend](#), paid subscribers have 24x7 access to our extensive library of recorded webinars. Paying subscribers can also generate certificates of completion, which can be used when seeking continuing education credits as part of their professional development/career planning. We offer free weekly webinars, in addition to ongoing news/articles about the world of justice. We welcome ideas for future webinars. Please email our editor at chris@justiceclearinghouse.com with your tips and suggestions.
