## **Attention CTE Teachers!**

**Please encourage your seniors to apply for the SECME Book Scholarship ASAP. 😊**

**The SECME Scholarship application is a one-time book scholarship award of \$250.00.**

### **SECME Mission**

To increase the pool of historically underrepresented and underserved students who will be prepared to enter and complete post-secondary studies in science, technology, engineering, and mathematics (STEM), thus creating a diverse and globally competitive workforce.

### **SECME Vision**

To be a beacon and benchmark for excellence and equity in pre-college education.

## Activate Your Superpowers: Finding Your Calm and Modeling It for Students

Tuesday, May 17, 2022 @ 2:00 pm - 3:00 pm EDT

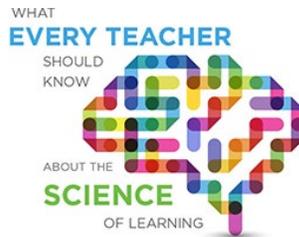

Burned Out. Stressed Out. Mental Health Crisis in Our Schools. Pandemic Learning Losses. These are the headlines, but they do not have to be your life! Learning and then practicing mindfulness has the power to change these headlines and improve not only the quality of your life but create a ripple effect in your classroom. Understanding mindfulness just might activate your superpowers and enable you to overcome challenges in a way that serves both yourself and the greater good.

Numerous studies have shown that mindfulness can support learning, improve physical and mental well-being, cultivate self-management, reduce aggression, improve social skills, and more—but without a conscious decision and a simple method to integrate it easily, it becomes just another buzzword. In this edWebinar you will learn both the why and the how to practice mindfulness so you can calm the storm within you. Join us to learn and to receive the gift of respite from your busy life and reactivate the power that is truly within you.

## The Science of Learning - What Every Teacher Should Know

### Overview

This education course will show you, through current research, how we learn — the way our brain makes, stores, and retrieves memories.

You will examine common misconceptions and misunderstandings about learning that can prevent students from learning at their fullest capacity. Along the way you will explore the practical implications of cognitive science for classroom teaching in terms of choosing effective instructional strategies, developing useful assessments, motivating student effort, and designing learner-centered curricular units.

### Syllabus

**Week 1:** How the brain makes, stores, and retrieves memories.

**Week 2:** How student mindsets influence learning.

**Week 3:** How to help students become self-regulated learners.

**Week 4:** Teaching strategies based on cognitive science to maximize learning for all students.
