

Engage Students & Demonstrate Proficiency Through Digital Portfolios

On-demand *via* HISD OneSource Where: Microsoft Teams (Virtual) Audience: High School CTE Teachers

CTE participants will discover an easy way for students to demonstrate and showcase their skills remotely and in-person. A bulb digital portfolio with a dynamic resume is the answer, and half the work is already done for you! Students can collect artifacts and show evidence of proficiency and acquired skills through pre-made templates that align with the projects you are already doing in your classes. This on-demand workshop will show you best recommendations on what students should be including in their college/career readiness portfolios and how to easily incorporate portfolios into your class workflow. Students will enjoy this highly interactive and engaging modality that will in turn showcase their uniqueness and give them an advantage when applying to college, programs, scholarships, and internships. Take course at any time.
