

CCI Learning

To Jasperactive and Beyond!

Monday, October 4, 2021

Audience: **CTE BIM Teachers**

Where: **Microsoft Teams (synchronous)**

HISD OneSource #1460059

Session Description

In this session, Keith German from CCI Learning will cover some key elements in Jasperactive MOS, recent support inquiries and solutions, but in Buzz Lightyear fashion he'll explore beyond Jasperactive, far into the galaxy of Instructional Learning and student motivation tips and tricks too. In fact, if Andy's Mom doesn't object, he might even reveal a fun class game called Microsoftopoly!! Please, if you attend, do so with intentional plans to actively participate with feedback of your own – what works for you, how do you handle xyz, etc. – or better yet, what would Woody and Slinky dog do? Learn and contribute with purpose, or Keith might report you to Lots-o'-Huggin' Bear! Join the amazing, Keith!
