Cloud computing is flexible and gives you the ability to choose how you want to deploy it. If you are Microsoft Certified for Azure, this is an opportunity to prove your knowledge of cloud concepts, Azure services, Azure workloads, security, and privacy in Azure, as well as Azure pricing and support. According to BDO Digital, more than 57% of Fortune 500 companies use Microsoft Azure, and there is a growing need for certified experts.

Join us on Thursday, November 19, 2020 to hear Sandra Marin, the Go-to-Market Lead for Azure training and certification, explain how an Azure certification will enable you to keep pace with today's technical roles and requirements whether you have a technical background or none at all. She will share the certification roadmap and explain what certification options you have and what content you will need to become certified. You can choose to take a fundamentals path or one based on your role or specialty.
