Rationale:
As you know, HISD is adapting its teacher evaluation system for all campuses, using one system for NES and NES-Aligned campuses, and another for non-NES/NES-Aligned campuses. Before those systems are implemented, we need to seek input from the campus Site-Based Decision Making Committee.

Middle College High School-Gulfton Site Based Decision-Making Committee –

As we look forward to the new school year, the district is adapting its teacher evaluation systems. For the 2023-24 school year, here is the description of the Teacher Evaluation System that the district proposes to use for teachers in our school. Every teacher on our campus will be evaluated using this system.

As the Site Based Decision-making Committee, we would like your feedback and input as we develop and refine this system. We have designed a process that will efficiently capture your feedback.

Please provide your feedback via this survey by July 31st. Your answers to these questions will help develop this system.
