

Young Women's College Prep

Hello! We (Young Women's College Prep) will be using LivingTree this year to share and coordinate. LivingTree is a private and secure place for us to share conversations, photos, files, and links. We will also share a calendar, manage volunteer needs (complete with reminders and notifications), direct message, and more. Be sure to sign up today and download the free mobile app as well (iPhone or Android).

Your group code is (code is case sensitive): **OBA0077A49**

NOTE: If you are connecting to this group to communicate on behalf of your child(ren), then only ONE parent in a family should input the code. You will be able to invite your spouse, partner, or other caregiver(s) to join your family at any time. Once they accept your invitation, they will see all posts for this group through the family connection.

To connect: Follow Option 1 if you do not have a LivingTree account. If you are already on LivingTree, follow Option 2.

Option 1:

1. To create your account, go to engage.livingtree.com/signup-user.
2. Choose the appropriate role ('Parent' role if you are connecting on behalf of your child(ren)). Follow the signup flow to create your account, and if applicable, your family and child(ren).
3. Once in your account, you can access the group code entry screen by the link in the upper right corner under your name. You will find a link that reads "Have a Group Code? Join Now" Click on this and the group code window will appear on your screen. Enter this code and select 'Join'.
4. If this is the correct group, click 'Continue'.
5. Click 'Accept' to complete the process - You are now connected to the group!

Option 2:

1. If you are an existing user, go to engage.livingtree.com/login and log into your account.
2. Once in your account, you can access the group code entry screen by the link in the upper right corner under your name. You will find a link that reads "Have a Group Code? Join Now" Click on this and the group code window will appear on your screen. Enter this code and select 'Join'.
3. Enter this code and click 'Join'.
4. If this is the correct group, click 'Continue'.
5. Click 'Accept' to complete the process - You are now connected to the group!
