The School at St. George Place

SDMC Minutes

September 21, 2018

Start time: 2:09

1. Introduction of Parent representative

2. Safety concerns: Morning carpool- Arrival (Hug Zones?) Should parents be allowed to come in the school at all?

3. Its important for the little ones- we could possibly create hug zones outside. We could possibly allow the smaller children (pre-k) (k) (1st) to enter with parents.

4. As far as a safety concern, we would like to discuss the possibility of adults not being able to enter the building at all. Each representative will communicate the choices to their team, and collect the responses. We will discuss next meeting how we are going to move forward.

5. Lunch concerns: none (hallway switch is creating much smoother transitions.) Dismissal: There are concerns over cars blocking Hildalgo exit. It is affecting front carpool.

6. Discipline issues? There were none to report at this time.

7. <u>Presentation of the Resolution:</u> We would like our campus to be taken off the list as a polling location.

8. Campus focus on writing: The progress is looking good. Administration has met with the lower levels and are pleased with what the have seen so far.

9. School Psychologist: HISD eliminated the program that allowed us to have a mental health professional on the campus. We are currently working on finding an alternative.

10.   Budget: We lost several students due to the new time arrangements. There is optimism that we will reach 791 enrollment.

11. Data Presentation (slide show)

12.   SIP Review: Mr. Wheat highlighted areas.

13.   Tricycles: Do we need them? Mr. Wheat will survey PRE- K to see if they are even wanted.

14.   Safety concerns: Orange Pod flooring is coming up. The Green Pod ceiling is starting to slip down. The water fountains on both the upper and lower playgrounds are not currently working. There is a concern about children needing water but being unattended inside the building.

15.   Early Dismissal: Today we noticed some issues with dismissal. We will consider moving times up to make for a smoother exit.
