Below is an example of the portrait and quote by Dr. DeBakey. The portrait will be done in a realistic style, but using colors that coordinate with the room. Actual detail in the coloring of the portrait may vary from what you see in the image. The quote will be painted emphasizing the character traits from the quote, using a variety of fonts, also coordinating with the color scheme. The fonts shown are just an example, these can be changed if you prefer a different style of font. The imagery can be painted so it is visible above the tables, or it can be adjusted so it takes up the entire wall. The size of the lettering would be adjusted to best fit the space. Dr. DeBakey's name will be at the end of the quote, painted to look like his signature.
