Course Overview

In AP World History: Modern, students investigate significant events, individuals, developments, and processes from 1200 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. The course provides six themes that students explore throughout the course in order to make connections among historical developments in different times and places: humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation. This will be accomplished by focusing on the

Curriculum Framework:

I. Historical Thinking Skills

II. Reasoning Processes

III. Thematic Learning Objectives

IV. Nine Organized Content Units
COURSE PHILOSOPHY: WHY TAKE THIS COURSE

AP World History is a superior preparation for college. While our goal is that you will all receive acceptable scores of threes or higher on the May exam for credit, additional goals include preparing students for eleventh grade AP US History and AP English Language and Composition and the PSAT and SAT college placement exams.

My wishes are that you learn to think critically and write as a good historian would. An additional desire is to open your eyes to the world. The United States is a nation of immigrants and an amalgam of traditions and cultures. This course is a wonderful preparation for the universality of the multiculturalism of the United States.

All students who want to try these classes are welcome provided you understand that we will read extensively and write frequently. I will provide assistance and tutorials if help is needed. And I do believe students with learning challenges can prosper in this class and am willing to make accommodations to meet special needs for students.
