

Xfinity has opened up every hotspot in the nation to accommodate student learning at home. From your computer's internet access button in the bottom right corner, click to select an Xfinity Network Link. **No password needed.**

<https://hotspots.wifi.xfinity.com/>

If your computer will not connect to the Xfinity Network, follow the hotspot link above or **scan the code with your phone** to view the Xfinity Network Finder.

When it opens, click on "No Thanks" to see the finder. You can also try parking at your child's school to download any needed documents and then work offline to complete the work.
