

Using the Immersive Reader

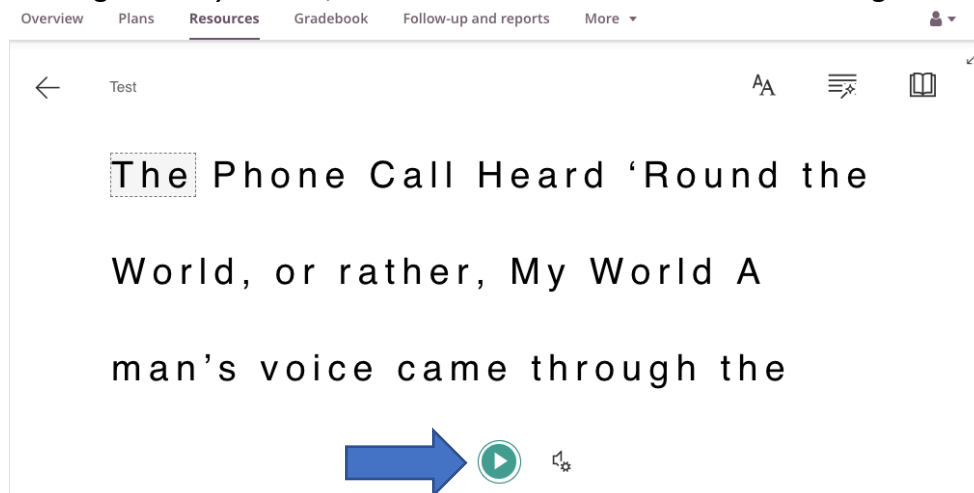

1. Open your class in the Hub. Click on *Resources*, *Plans*, or *Deadline/No Deadline* to find the assignment.

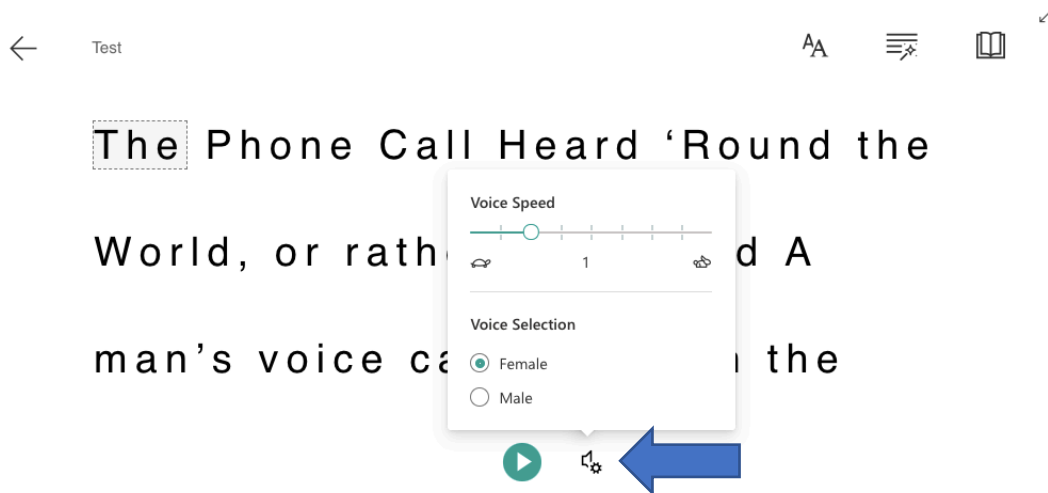

2. After you click on the assignment, a window like this one will open. Click *Immersive Reader*.

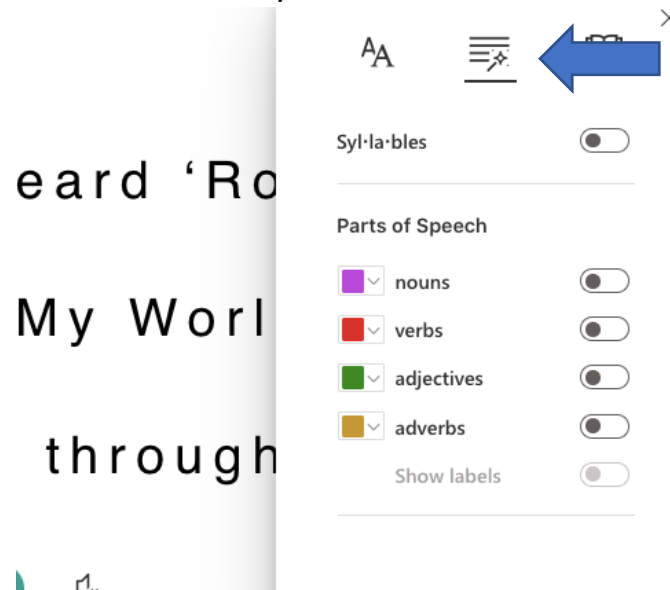

3. The Immersive Reader will open and look like this. You have different ways that you can make it work for you. When you click the green *Play* button, it will read the text with the default settings.

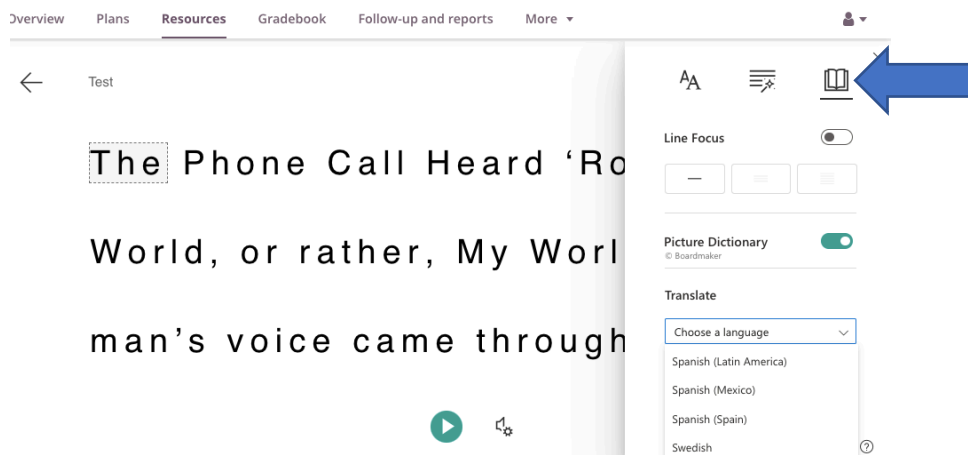

4. If you click the speaker next to the green Play button, you can choose how quickly it reads and if it reads with a male or female's voice.

5. If you want to have it select specific parts of speech, click the *Wand icon* button. You can also select to have the words broken into syllables.

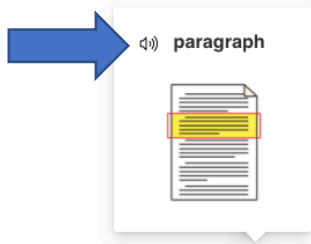

6. When you click on the *book icon*, a side bar will open. You can choose a language to translate the text into.

7. If you come across a word that you don't know, click on the word. A small window will open with a picture of the word, to help with the meaning of it, and a speaker. When you click on the speaker, it will read you the word.
