BGE Parent Series Episode I

The current health crisis has ushered in an exponential educational leap in just a few months. While a child’s fundamental learning milestones have not changed, the following have undergone significant modifications:

- The way teachers deliver content
- The way students process the information
- The products students complete to demonstrate mastery of objectives

In addition to these changes, HISD had already begun transitioning to a new Student Information System (SIS), Parent Connect Portal, and PowerSchool Gradebook which would have brought additional challenges even during a non-Covid-19 school year.

To ensure our teachers were able to receive, process, and implement with fidelity the new administrative platforms, virtual learning practices, and Covid-19 safety protocols, the Leadership Team has been providing professional development in prescribed, incremental steps.

As parents are crucial partners in all the above, BGE is proud to announce the upcoming series of informative, on-demand parent videos. The first video in our parent series will be available Friday, December 11 and will focus on Formative Assessments. Key points to be addressed:

- Where to access your child’s data reports
- How your child’s teacher & campus admin use the data
- Talking points for conversation with your child’s teacher

We sincerely appreciate the patience and flexibility you continue to show all members of the BGE team as we work to shift decades of training and educational knowledge in a short time. We often joke it’s been like a dentist trying to pull a tooth in the kitchen; it can be accomplished, but it can be painful to watch. In the end, the goal is the same: SUCCESS!!
