

Pleasantville Elementary School 21ST Century Afterschool Centers on Education (ACE) programs consists of tutorials, homework assistance, and several enrichment activities. The ACE programs aim to improve student attendance, behavior, and academics, while providing safe supplemental learning space for students and families who otherwise would not have such opportunities. These grant-funded programs provide high quality supplemental enrichment activities that align with the regular academic program; and programs are encouraged to deliver those activities in creative, hands-on, and exploratory ways.
