Greeting Mighty Marlins!

My name is Khoi Pham. I am Vietnamese. I grew up in a small village in Vietnam. At the age of 13, our family migrated to US. We originally resided in Dallas, TX. However, we had relatives in Michigan; therefore, we decided to move to Michigan in 1996. In the summer of 2021, we decided to move to Houston, TX and here I am a proud Mighty Marlin. I graduated from East Kentwood High School in 2001, Kentwood, MI. I attended Grand Rapids Community College and transferred to Michigan State University. I graduated from Michigan State University with a B.S. in Mathematics in 2010. I then decided to be a teacher; therefore, I took the Graduated Teacher Certification program at Grand Valley State University and obtained my teaching certificate.

During my college years, I have been working at the math tutor lab for 2 years. I did substitute while getting my certificate at some high schools in the area. I have taught geometry and algebra 2 at Battle Creek Central High School for one year and math 180 at Valleywood Middle School for an additional year.

My hobbies are playing sports such as volleyball, tennis, swimming, weightlifting, etc. I like to travel around the world and visit manmade monuments. I like to be closer to nature, so our family go camping in the summer. My wife and I love to eat good food and try different food whenever we travel to a new town.

I will be teaching algebra 2 at James Madison High School for the 2021-2022 school year. I expect my students to be proactive and take their education seriously. Secondly, I expect my students to be responsible to themselves and to others; they need to come to class prepared and ready to learn new tasks. Every student should be a team leader. My students should take charge and be active with their team. Lastly, we are the members of our community, I expect my students to be aware of the environment around them by keeping their working area clean and encourage others to be part of the good cause.

I can be reached by email, text or phone call.
