Since Westside's doors opened in 2000, its core values have reflected a commitment to provide students with personalized support in a variety of ways. The Small School/House Concept has been integral in Westside's success by providing individualized academic coaching and instruction. Our responsibility is to make sure your student has a positive relationship with his/her dean as they create the student's Personalized Graduation Plan and select courses each year. With a maximum student load of approximately 300 students, our deans are able to know their students and address the needs of the whole child.

Westside has 5 Small Schools/Houses within its main campus. Each Small School/House has 2 to 3 Deans with a House Secretary. There are 25 classrooms within each house where core subjects are taught as well as career pathway courses.
