

# HISD | Career Readiness

LEARNING TODAY. EARNING TOMORROW.

**JUNE 2022 – VOLUME I**

**THIS MONTH WE CELEBRATE YOU, CTE  
TEACHERS!**

## **Teacher of the Month**

ATTN: High School Principals & CTE Administrators! Do you have a CTE teacher who promotes high student engagement, hands-on activities, or other reasons why the CTE teacher should be nominated as CTE teacher of the month? If so, please submit your nomination using the following link:

**[Click here to submit your CTE Teacher of the Month.](#)**

## Adobe Illustrator for Beginners

**June 9 @ 12:00 pm - 1:00 pm**

### Workshop Description:

If you are new to Adobe Illustrator, this workshop will introduce you to the tools you need to create some fun graphics, starting with basic shapes. Join Kim Munoz as she shares how to navigate the drawing interface by zooming in and out of your designs, use the properties panel to add color, and use the pathfinder panel to combine shapes in a variety of ways. Participants will also have an opportunity to create their own designs that will assist them in teaching their students how to effectively use Adobe Illustrator.

### Learning Objectives:

- ❖ Explain how to navigate the drawing interface by using shortcuts to pan the screen and zoom in and out.
- ❖ Describe how to use the pathfinder tool panel to manipulate various shapes.
- ❖ Create a geometric design using the shapes tool that incorporates various strokes, color fills, and gradients.

## Planning

In this video from Making the Case, teachers and math education experts illuminate how to plan classroom experiences that will promote argumentation and critique. Both planning collaboratively with other teachers and being intentional about the argumentation and critique goals for class, are key to implementing this Common Core Standard in Mathematical Practice effectively.

## How teams work

This free course introduces working in virtual project teams by explaining terms and concepts related to teams and to projects. The complexity of the interaction of people and technology is highlighted.

**After studying this course, you should be able to:**

- understand the issues and processes that relate to team formation and development in a virtual context
- identify barriers to effective teamwork in a virtual environment and propose solutions
- review and comment on team activities in a virtual environment and develop insights to make informed judgements and recommendations for future good practice
- synthesize theory and practical experience to make recommendations for good practice in new team environments.
