## Education and Training

Free course

### Children's perspectives on play

In this free course, Children's perspectives on play, you are asked to put yourself in the place of young children and to think about their view of play and their reasons for playing. When children have personal freedom to choose and make decisions about what and who they want to play with, as well as where they want to play, they are highly self-motivated and active in their engagements with everything around them.

In this course you will think about how you listen to children's perspectives, why it is important and consider the choices children make about where they play and why.

### After studying this course, you should be able to:

- understand and outline the significance of play and creativity in listening to children and understanding their perspectives
- describe different ways that children “talk” about their experiences of play in different contexts
- describe the impact of different contexts on children's views of play
- recognize how a socio-cultural understanding of children leads to taking their perspectives seriously.

## Human Services

Free course

### Exploring family health

How can families support healthy living and cope with illness? This free course, Exploring family health, will provide an understanding of what is meant by socialization. You will recognize how a family can learn and support good and poor health behaviors alongside government interventions, such as the 5 A DAY strategy. Identification of people with Alzheimer's disease is steadily increasing and you will consider key features and research. Caring within a family will be considered through reading about Sheila who cares for her husband and son. Finally, the course will look at the plight of young careers, often hidden from view, and losing part of their childhood due to their caring responsibilities.

### After studying this course, you should be able to:

- understand how 'health intervention' is targeted to change family eating habits
- understand the rise in obesity and how it can be linked to family lifestyles
- understand how families care for and cope with illness
- interpret information in graphical form and explore a website for information to support your understanding.

## Hospitality and Tourism

Free course

### The importance of interpersonal skills

To succeed in hospitality management, you need good interpersonal skills, you need to understand how to deal with other people. This free course, the importance of interpersonal skills, will help you gain an awareness of your own skills and understand that an awareness of the interpersonal skills of others can help us enormously in dealing with the work tasks we are responsible for.

**After studying this course, you should be able to:**

- recognize the importance of interpersonal skills
- describe how good communication with others can influence our working relationships
- outline the roles we play in our work groups and teams.

## Child Nutrition and Cooking

Free course from Stanford online

CME Credits Available

### Description

Eating patterns that begin in childhood affect health and well-being across the lifespan. In the USA, we are during a childhood obesity epidemic that threatens to leave our children with a shorter life expectancy than their parents. As processed foods become more readily available around the world, other developed nations are beginning to follow suit. This course examines contemporary child nutrition in America from the individual decisions made by each family to the widespread food marketing targeting our children. The health risks associated with obesity in childhood are also discussed. Students will learn what constitutes a healthy diet for children and adults and how to prepare simple, delicious foods aimed at inspiring a lifelong celebration of easy home-cooked meals. This course will help prepare students to be the leading health providers, teachers, and parents of the present and future.

## Apply now for the Engineering Tomorrow 2022 Virtual Summer Camp!

Enrollment is now open for our 2022 Summer Camp sessions!  
All sessions will be held virtually **at no cost to students.**

Each week-long session is scheduled for a Monday, Wednesday and Friday in July. Sessions run for 3 hours in the morning each day. During each session, students will engage in two hands-on lab challenges and hear from a leading expert in a relevant field.

SESSION 1  
**Healthcare Week**  
July 11, 13 and 15

SESSION 2  
**Renewable Energy**  
July 18, 20 and 22

SESSION 3  
**Aerodynamics  
& Space**  
July 25, 27 and 29

[Register today](#)

**Students are welcome  
to apply for 1, 2 or all  
3 sessions.**

The program is open to all **current** 9th, 10th, and 11th grade students. No prior engineering knowledge is required—just a passion for learning something new!  
**Register now at no cost to students.**

## LEARNING FROM EACH OTHER MAKES CTAT EVENTS WORTHWHILE.

With so much going on, it's hard to think a few months ahead. Heck, it's hard enough to manage the next few days! Don't worry. You can sign up with a session idea and develop your presentation later. It's the perfect layaway plan for busy professionals. Simply reserve a slot on the agenda and bring a couple of peers along to help.

Looking for inspiration? Think about the challenges you're facing. Chances are you're not alone. Go ahead. Sign up to lead a presentation. You'll be glad you did!

Free edWebinar & CE Certificate

## Interactive 3D in the classroom: Bringing Out the Creator in All Students

Wednesday, May 4 @ 4 pm

Interactive 3D is everywhere, from games and entertainment to architecture and beyond. The demand for real-time 3D skills is skyrocketing around the globe, growing over six times faster than the job market overall according to a 2019 report by Burning Glass Technologies. As this technology expands beyond traditional video game design and development into other disciplines, more employers are seeking designers, developers, and artists with these skills. **Join this edWebinar to learn how Unreal Engine, Fortnite Creative, and Twinmotion can easily be incorporated into any curriculum, and leave ready to inspire the next generation of creators!**

Educators will be introduced to interactive 3D and real-time technology across various industries, including advertising, game development, architecture, engineering, automotive, film, and entertainment. Demand for real-time skills will outpace the market by 600%. This edWebinar will share free teaching resources using Unreal Engine, Fortnite Creative, and Twinmotion. Educators will leave with an understanding of the suite of Epic Games' interactive 3D resources, and their potential to prepare students for real-world skills using industry-standard tools. Professional development opportunities will also be shared.
