OneGoal

Year 1 (Junior Year)

Students explore who they are, their strengths, and their future aspirations. They identify what they want in their future and develop a plan to get them there. They leave Year 1 with a list of postsecondary schools that are a good fit for them and a strong personal statement.

Year 2 (Senior Year)

Students get help applying to college or other postsecondary institutions, and securing financial aid. They receive support during the summer to ensure they successfully enroll. Plus, they learn how to prepare for and overcome social, academic and financial roadblocks.

Year 3 (First Year of Postsecondary Path)

OneGoal continues to support students as they start their first year of college or other postsecondary path. Students check in on important things that will keep them on track to graduate, like study skills, financial aid, accessing on-campus supports, joining a club/organization, etc.

Selectivity Index

The OneGoal Selectivity Index is a tool that helps you identify the selectivity level of colleges to which you are most likely to be accepted, and from which you are likely to receive the strongest financial aid packages. Use your GPA, class rank, and your highest test score to determine your current selectivity level. Throughout the year, you will move toward a higher selectivity level by working to increase your GPA, class rank, and test score. This tool will help you identify which schools to research and apply to for your overmatch, match, and undermatch college applications.

*NOTE: SAT scores used on the Selectivity Index are a sum of the Math and Evidence-Based Reading and Writing sections only.
