

SITE VISITATIONS

The main objective of the onsite interview is to ensure safety and non-stoppage of work.

Upon arrival at a site, the Labor Compliance Officer will check in at the site superintendent's (contractor's) trailer prior to interviewing.

The following postings and/or notifications shall be present on each construction site.

- a. EEO Posters
- b. Posted prevailing wage sheets and LCP program and # for inquiries
- c. Sign-in Log
- d. Listing of subcontractors on site

Interviews are random; two or three trade persons for each subcontractor are more than sufficient for one visit. Any persons missed are usually picked up on the next visit. Thirty minutes of interviewing per site is typically sufficient, depending upon site size and/or number of subcontractors present.
