

Greysi Chao

7<sup>th</sup> – 8<sup>th</sup> grade mathematics teacher

My name is Greysi Chao; I graduated from the University of Houston-Downtown with a Bachelor of Science in Computer Science. I was born in La Habana, Cuba and moved to the United States when I was 7 years old. When I moved to Houston, I encountered a passion for Mathematics which lead me to discover different STEM fields. What motivated me in starting my career in Baylor College of Medicine Academy at Ryan is to see the focus on student's future careers. It is delightful to see how BCMA helps encourage students by providing exposure to a STEM career at a really young age. I hope to create an environment that guides students with different backgrounds find mathematics fun and relevant in day to day tasks. I am excited to be part of the BCMA team and hope to contribute towards the future of BCMA and our students.
