

MEMORANDUM

October 4, 2013

TO: Board Members

FROM: Terry B. Grier, Ed.D.
Superintendent of Schools

SUBJECT: **SUPPLEMENTAL EDUCATIONAL SERVICES PROVIDERS REVIEW, 2012–2013**

CONTACT: Carla Stevens, 713-556-6700

Students from Houston Independent School District (HISD) at Title I campuses that failed to make adequate yearly progress (AYP) for three consecutive years (Stage 2 School Improvement) were given an opportunity to seek external tutoring services. Supplemental Educational Services (SES) were made available by the district to increase student academic achievement. Tutoring services consisted of academic assistance in the areas of mathematics, reading, language arts, and science. These services were offered by state-approved providers who attested to keeping intervention methods consistent with the content and instruction used by the district and with the State's academic content standards. According to the No Child Left Behind Act, these services were required to be high-quality, research-based, specifically designed to increase student academic achievement, and offered outside of the regular school day (*Title I, Section 1116(e)(12)(C)*).

Economically disadvantaged students in grades 1–12 qualifying for free and reduced lunch status were eligible to participate in the SES programs. Parents of eligible students were notified by the Department of External Funding that supplemental educational services were available. Parents were then given an opportunity to select a provider whom they felt best met the needs of their child. Agreements were made between parents and providers to ensure that students attended the programs. The providers committed to produce information to the district on the status of students' academic achievement. The Department of External Funding provided the names and identification numbers of students who received services from the selected providers, the schools they attended, and the number of hours they attended.

Data were collected to determine the level of improvement of 2012–2013 participating SES students based on their performance on the State of Texas Assessments of Academic Readiness (STAAR) for grades 3–8, Stanford Achievement Test Series Tenth Edition (Stanford 10) for grades 1–8, STAAR End of Course (EOC), and Texas Assessment of Knowledge and Skills (TAKS) for grade 11 for the past two years. The changes in performance on each test are listed by SES provider in the following tables. Comparison data for eligible economically disadvantaged students from the same schools are also presented. Results based on fewer than five students are not shown.

Table 1 (page 1) provides a list of the SES providers, ranked by the number of students served in 2012–2013. A total of 66 providers offered tutoring services to 10,257 students, and each student received an average of 9.7 hours of tutoring. Nine providers (Yancy Life Transition Center, Tutors with Computers LLC, Learn-It Systems LLC, TUTORCO LLC, MyMath.Net Inc., Tutors With Tech, Knowledge Island Inc., 5 Smooth Stones Educational Leadership Services, and Promise Tutorial) provided services to just over half of the students served, and 28 providers provided service to 90 percent of the students served. Yancy Life Transition Center served the

highest number and percentage of students at 1,231 and 10.3 percent respectively. The total budget allocated for the SES program was \$10.8 million and expenditures totaled \$5.9 million. On a cost per student basis, expenditures were approximately \$579.

Figure 1 (page 3) presents information on student participants by school. Participants attended 17 HISD schools including one elementary school, seven middle schools, eight high schools, and one combined school. Five schools (James Madison High School, Westbury High School, Charles Hartman Middle School, Jack Yates High School, and Phillis Wheatley High School) accounted for just over half (54.1 percent) of the tutored students. Additionally, seven of the 17 schools had participation rates of over 90 percent of students eligible to receive services.

Table 2 (page 4) presents the percentage of students in grades 4–8 who met the growth standard for Index 2 of the TEA Accountability model by SES provider. Student growth, obtained from the Consolidated Accountability File, was calculated by the Texas Education Agency (TEA) and determined by comparing a student's gain score (the difference between the student's current year scale score and prior year scale score) to a minimum progress target. Overall, 50 percent or more of the students receiving services from 27 providers met the state's growth standard target in reading, and 37 providers met this statistic in math. In comparing the performance between students who received SES services and those who did not, it appears that while one service provider in reading and seven providers in math achieved high levels of growth for their students, more providers showed less growth than students not receiving their services.

Tables 3a and 3b (pages 6–9) show the average Normal Curve Equivalent (NCE) scores on the Stanford 10 for students from grades 1–8 for 2011–2012 and 2012–2013 by provider. An NCE of 50 indicates that the student is performing at grade level. Overall, three providers showed improvements in reading, 23 providers in math, three providers in language, and six providers in science. In comparing the data for the students who received SES services and those who did not, it appears as though some of the SES providers may have helped improve student performance in math.

Tables 4a and 4b (pages 10–13) list the percentage of students who met the state's growth standard on EOC tests in English I Reading, English II Reading, Algebra I, and English II Writing from 2011–2012 to 2012–2013. Student growth on the EOC was also calculated by TEA following the same process described for STAAR grades 4–8. Overall, two providers had 50 percent or more of their students meet the growth standard for high schools in English I Reading, 33 providers in English II Reading, three providers in Algebra I, and ten providers in English II Writing. Performance for the students who received SES services appeared to be better than for those who did not in English I Reading, English II Reading, and English II Writing.

Tables 5a and 5b (pages 14–17) present comparisons of the percentage of students in grade 11 meeting the 2013 TAKS standards in English/language arts, math, and science for 2012–2012 and 2012–2013 by provider. Gains were most frequently noted for science (29 providers), followed by math (27 providers) and English/language arts (21 providers). In comparing the data for the students who received SES services and those who did not, it does not appear that the SES providers helped improve TAKS scores.

While several students who received SES services showed improvements in test performance, it is not possible to determine the exact cause of the improvements. Any gains in performance that were made can be attributed in part to the SES providers but also to the instruction given by the campuses during the regular school day.

Administrative Response

Implementation of the SES program is a federal requirement for school districts with Title I schools that have failed to make adequate yearly progress for three or more consecutive years. Services are available only to low-income students enrolled at such campuses, and must supplement instruction provided during the regular school day.

SES providers are screened and approved solely by the state education agency. Parents must select a provider from the state's comprehensive list based on the needs of their child, and then complete the enrollment process online. The district may only disseminate information to parents regarding SES and the enrollment process.

The Department of External Funding will continue to work closely with the state agency to ensure that all information regarding the program is disseminated to parents in a timely manner, so that they are able to make informed decisions regarding the academic needs of their children.

Should you have any further questions, please contact my office or Carla Stevens in the Research and Accountability Department at (713) 556-6700.

+Eligible students are economically disadvantaged students from the same schools at which the SES providers served students.

*Contract length indicates how many years HISD students were serviced by these providers between 2008–2009 to 2012–2013 but not necessarily in consecutive years.

Figure 1: Students Served by SES Providers, 2012–2013

The numbers of eligible students from each campus are the economically disadvantaged students found in the PEIMS Resubmission file.

*Lee High School and Sharpstown High School are Texas Title I Priority Schools (TTIPS).

Student growth was determined by comparing a student's gain score to a minimum progress target.

Eligible students are economically disadvantaged students from the same schools at which the SES providers served students.

Counts represent students with eligible test results from 2012 and 2013.

*Fewer than 5 students were served by an SES provider.

	English I Reading		English II Reading		Algebra I		English II Writing	
75–100% met growth standard	0		1		0		0	
50–74% met growth standard	0		34		1		1	
25–49% met growth standard	26		0		29		34	
0–24% met growth standard	0		0		1		0	

Student growth was determined by comparing a student's gain score to a minimum progress target.

Counts represent students with eligible test results from 2012 and 2013.

Eligible students are economically disadvantaged students from the same schools at which the SES providers served students.

*Fewer than 5 students were served by an SES provider.
