

**MEMORANDUM**

August 14, 2008

TO: Noelia Garza, Assistant Superintendent  
Special Populations

FROM: Carla Stevens, Assistant Superintendent  
Research and Accountability

SUBJECT: **SUPPLEMENTAL EDUCATIONAL SERVICES PROVIDER REVIEW  
2007–2008**

HISD students on Title I campuses that failed to make adequate yearly progress (AYP) for three consecutive years (Stage 2 School Improvement) were given an opportunity to seek external tutoring services. Supplemental Educational Services (SES) were made available by the district to increase their academic achievement. These services consisted of academic assistance in the areas of reading, language arts, and mathematics. These services were offered by state-approved providers who attested to keeping intervention methods consistent with the content and instruction used by the district and with the State's academic content standards. According to the No Child Left Behind Act (NCLB), these services were required to be high-quality, research-based, specifically designed to increase student academic achievement, and offered outside of the regular school day. *[Title I, Section 1116(e)(12)(C)]*.

Students in grades 6–12 qualifying for free and reduced lunch status (economically disadvantaged) were eligible to participate in the SES programs. Parents of eligible students were notified by the Department of External Funding that supplemental educational services were available. Parents were then given an opportunity to select providers for services they felt best met the needs of their children. Agreements were made between parents and providers to ensure that students attended the programs. The providers committed to produce information to the district on the status of the students' academic achievement.

Data were collected to determine the level of performance of 2007–2008 participating SES students on the TAKS and Stanford 10 for the past two years (2006–2007 and 2007–2008). Students identified for analysis were enrolled at Title I campuses that failed to make AYP for the third year. The Department of External Funding provided the names of students who received services from the selected providers, the schools they attended, and the number of hours they attended the providers' programs. The students' TAKS 2007 and 2008 percent passing mathematics and reading were based on the grades 3–11 spring TAKS administrations, and the 2007 and 2008 Stanford 10 NCEs for mathematics, reading, and language subtests were obtained from the grades 1–11 Stanford 10 spring administrations.

Providers' and schools' grade levels were sorted on TAKS and Stanford 10 differences from 2007 to 2008, the number of students served, and the average number of hours. Leading providers and schools were determined based on the number of instances that grade levels of the provider or school were in the top ten outcomes of each category. The top ten performers by grade level of the providers and schools in each category were identified.

**Table 1** provides a summary of the SES providers and schools. The three providers with the most leading outcomes were Jet Learning Laboratory, Inc.; Read, Write and Create, Inc.; and Motivating Tomorrows' Minds. Of the three, Jet Laboratories, Inc had the greatest number of leading outcomes, 12. Read, Write, and Create, Inc. achieved the broadest academic progress with nine leading outcomes in TAKS and Stanford 10 difference categories. In contrast, Jet Laboratories, Inc. and Motivating Tomorrows' Minds accomplished seven and four leading outcomes based on test differences, respectively. The schools with the most leading outcomes were Cesar Chavez, Jefferson Davis, Sharpstown, and Ross Sterling high schools, and Albert Thomas Middle School. The four high schools also had the highest number of leading outcomes in TAKS and Stanford 10 differences, five each. The number of service hours did not appear to be related to the gains demonstrated by the students served by the providers or the schools.

The students' outcomes of all the SES providers were presented in **Table 2**. The providers were listed alphabetically and the information includes the number served, the average number of hours students attended, 2007 and 2008 TAKS and Stanford 10 performance of the participating students, and the TAKS and Stanford test results and performance differences from 2007 to 2008. **Table 3** included the same types of data for the schools whose students were receiving providers' services. The number of economically disadvantaged students enrolled at each school was also included. The number of students served, the average attendance hours, and the TAKS and Stanford 10 differences from both the providers and the schools were used to rank the leading outcomes in each group. **Table 4** provided a cross-tabulation of the numbers of students participating in the providers' programs and the schools that they attended.

The number of participating students was lower than the number of economically disadvantaged students on each campus who qualified for the services. (Table 3) Jet Learning Laboratory, Inc.; Read, Write and Create, Inc.; and Motivating Tomorrows' Minds achieved the most leading outcomes, the numbers of students participating in their programs were lower compared to Catapult Online, Ahead of the Class, KnowledgePoints. (Table 4) Of leading providers, Jet Learning Laboratory, Inc. enlisted the most students, 120. The high schools that gained the most leading outcomes did not achieve outcomes at the same levels as the three leading providers. Organizations such as KnowledgePoints at Chavez, Catapult Online at Davis and Sharpstown, Alternatives Unlimited Inc. at Sharpstown, and Achievement 4 All and Ahead of the Class at Sterling were able to help students at these schools to achieve substantial gains.

Should you have any further questions, please contact me.
