

MEMORANDUM

September 27, 2018

TO: Courtney Busby
Officer, Special Populations

FROM: Carla Stevens
Assistant Superintendent, Research and Accountability

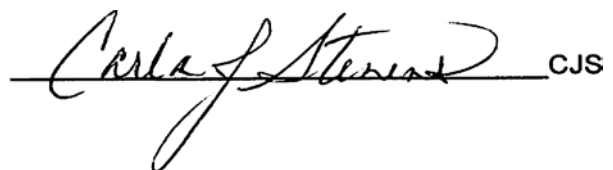

SUBJECT: **INTERVENTION ASSISTANCE TEAM PROGRAM, 2017–2018**

In the 2017–2018 school year, in an effort to ensure that all students in grades K–12 received the appropriate supports and services to meet their full potential, the Houston Independent School District (HISD) employed the Intervention Assistance Team (IAT) program to document individualized interventions implemented to support students academically. The IAT is a collaborative team providing campus-based support to meet the goal of providing all students with the appropriate supports and services. The attached report shows outcomes for students who were eligible for IAT support in 2017–2018.

Key findings include:

- Of 165,316 students in kindergarten to twelfth grade who took the beginning-of-year (BOY) Renaissance Learning 360 Early Literacy or Renaissance Learning 360 Reading assessment, 32,534 (20 percent) were identified as needing intervention (BOY Tier 2), and 45,752 (28 percent) were identified as needing urgent intervention (BOY Tier 3).
- Of BOY Tier 2 students who took the end-of-year (EOY) RL360 Early Literacy or RL360 Reading assessment, 23 percent achieved Tier 1. Of BOY Tier 3 students who took their EOY assessment, eight percent achieved Tier 1.
- On the Benchmark Running Record from BOY to EOY, BOY Tier 2 students gained 14 percentage-points in achieving the Meeting Expectation or Advanced Development reading benchmark, while BOY Tier 3 students experienced an eight percentage-point gain.
- Grade 1 Tier 3 students made the greatest gains (10 percentage points) from BOY to EOY on passing the High Frequency Word Examination (HFWE).
- The percentage of BOY Tier 2 students meeting or exceeding the STAAR progress measure improved from 2016–2017 (48 percent) to 2017–2018 (59 percent), and the percentage of Tier 3 students meeting or exceeding the STAAR progress measure improved from 2016–2017 (43 percent) to 2017–2018 (56 percent).
- A total of 13 Tier 2 and Tier 3 students were referred for special education evaluation following documented interventions in Chancery RTI portal.

Further distribution of this report is at your discretion. Should you have any further questions, please contact me at 713-556-6700.

Intervention Assistance Team 2017–2018

Executive Summary

Program Description

In the 2017–2018 school year, in an effort to ensure that all students in grades K–12 received the appropriate supports and services to meet their full potential, the Houston Independent School District (HISD) employed the Intervention Assistance Team (IAT) program to document individualized interventions implemented to support the child and provide, if needed, a bridge to special education evaluation (Houston Independent School District, 2017). The IAT program is a collaborative endeavor providing campus-based support to meet the goal that all students are provided with the appropriate supports and services. The IAT program supports HISD's Strategic Direction Core Initiative 3: Rigorous Instructional Standards and Supports. The attached report shows student outcomes for students who were eligible for IAT support in 2018.

Highlights

- A total of 165,316 students in kindergarten to twelfth grade took the beginning-of-year (BOY) Renaissance Learning (RL) 360 Early Literacy assessment or RL360 Reading assessment. Of these students, 32,534 were identified as needing intervention (Tier 2), and 45,752 were identified as needing urgent intervention (Tier 3).
- Of the BOY Tier 2 students who took the end-of-year (EOY) RL360 Early Literacy or RL360 Reading assessment, 23 percent achieved Tier 1. Of the BOY Tier 3 students who took their EOY assessment, eight percent achieved Tier 1.
- On the Benchmark Running Record (BRR), BOY Tier 2 students had a 14 percentage-point gain in achieving the Meeting Expectation or Advanced Development reading benchmark from BOY to EOY. BOY Tier 3 students experienced an eight percentage-point gain in achieving the Meeting Expectation or Advanced Development reading benchmark from BOY to EOY.
- On passing the EOY High Frequency Word Examination (HFWE), Grade 1 Tier 3 students made the greatest gains (10 percentage points), followed by Grade 1 Tier 2 (nine percentage points) when compared to passing the middle-of-year (MOY) HFWE.
- The largest percentage-point gap between BOY Tier 2 students and BOY Tier 1 students achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR Reading exam occurred in Grade 4 (49 percent and 94 percent, respectively). The largest percentage-point gap between BOY Tier 3 students and BOY Tier 1 students achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR Reading exam occurred in Grade 6 (19 percent and 97 percent, respectively).
- Tier 3 students had the lowest proportion achieving at or above the Approaches Grade Level standard on both the STAAR EOC English I and STAAR EOC English II exams (20 percent and 21 percent, respectively).

- The percentage of Tier 2 students meeting or exceeding the STAAR progress measure improved from 2016–2017 (48 percent) to 2017–2018 (59 percent), and the percentage of Tier 3 students meeting or exceeding the STAAR progress measure improved from 2016–2017 (43 percent) to 2017–2018 (56 percent).
- A total of 13 Tier 2 and Tier 3 students were referred for special education evaluation following documented interventions in Chancery RTI portal.

Recommendations

- Though there were documented interventions in Chancery RTI portal, the numbers were relatively small compared to the number of students identified as in need of intervention based on the BOY RL360 Early Literacy or RL360 Reading assessment. It is recommended that campus IAT coordinators express to teachers the importance of documenting the intervention process, provided such interventions were delivered. Accurate documentation of reading interventions impacts student learning by providing the classroom teacher the information needed to make decisions on which interventions were successful in improving student reading outcomes and which interventions need to be changed to meet student needs.
- As students in need of reading supports are identified via the RL360 Early Literacy or RL360 Reading assessment, they receive IAT support at the campus level. It is recommended that documentation of the IAT committee meetings be made available in a centralized digital location to assist future researchers in presenting an accurate picture of the practical workings of the IAT program. Accurate documentation would support student learning by showing the fidelity with which the IAT program was implemented.

Introduction

The Individuals with Disabilities Education Act of 2004 requires students experiencing difficulties in the general classroom be considered for all support services available to students before referral for special education evaluation. In 2017, the U. S. Department of Education reported that the Texas Education Agency (TEA) did not meet this requirement for proper identification of children with disabilities eligible for special education and related services (U. S. Department of Education, 2018). In the 2017–2018 school year, to ensure that all students in grades K–12 received the appropriate supports and services to meet their full potential, the Houston Independent School District (HISD) employed the Intervention Assistance Team (IAT) program. The IAT program is designed to document individualized interventions implemented to support the child and provide, if needed, a bridge to special education evaluation (Houston Independent School District, 2017).

The IAT program is a collaborative endeavor providing campus-based support to meet the goal that all students receive appropriate supports and services. This support includes the facilitation of the Response to Intervention (RTI) process that documents the interventions implemented to support the individual child, and, if needed, a referral to an IAT meeting is made to consider next steps in meeting the needs of the individual student. When an HISD student is initially identified as having difficulty in the general classroom, the teacher puts an intervention in place to help the student overcome the difficulty. The intervention and the student's progress following the intervention are documented in the on-going RTI process, and if teacher expectations for student progress are not met, either a new or more intensive intervention is adopted, or the student is referred for an IAT meeting.

Referrals for an IAT meeting occur for many different reasons. Students are referred for having difficulty related to academic areas, social-emotional areas, or health concerns. The IAT is usually made up of an IAT chairperson and other campus education professionals with diverse educational backgrounds and experiences. The IAT meeting is designed to have contributions from all members to efficiently explore all the possible support services which could meet the referred child's needs and to reach a consensus on possible next steps. The IAT meeting is a bridge to special education evaluation when interventions and modifications have been unsuccessful, and data justifies special education services.

This report addresses the outcomes of four groups of students in meeting the appropriate reading progress goal following IAT program support: (1) Tier 2 students as measured at the beginning-of-year on the Renaissance Learning (RL) 360 Early Literacy (EL) or Reading assessment; (2) Tier 3 students as measured at the beginning-of-year RL360 EL or Reading assessment; (3) Tier 2 students, who, following documentation of unsuccessful RTI interventions, were referred for IAT meeting consideration during the 2017–2018 school year; and (4) Tier 3 students, who, following documentation of unsuccessful RTI interventions, were referred for IAT meeting consideration during the 2017–2018 school year.

Methods

Data Collection and Analysis

The RL360 Early Literacy (EL) and Reading assessments provided a percentile rank for all HISD student test-takers in grades K–12. A combination of four files: Star Early Literacy (SEL), Star Early Literacy Spanish (SELS), Star Reading (SR), and Star Reading Spanish (SRS) were used in this report. A total of 165,316 HISD students in grades K–12 had a percentile rank at the Beginning of Year (BOY) on the RL360 Early

Literacy (EL) or RL360 Reading assessment. The percentile ranks from the BOY testing window (September 20, 2017, to October 13, 2017), were used to place test-takers in one of four categories: Tier 1 (At/Above Reading Benchmark) for HISD test-takers that achieved at or above the 40th percentile rank score; On Watch for HISD test-takers that performed below the 40th percentile rank score but greater than or equal to the 25th percentile rank; Tier 2 (Intervention) for HISD test-takers who performed below the 25th percentile rank score but greater than or equal to the 10th percentile rank; and Tier 3 (Urgent Intervention) for HISD test-takers who performed below the 10th percentile rank score. The cohort used for this report was comprised of HISD students identified as Tier 2 (Intervention) or Tier 3 (Urgent Intervention) based on BOY results on the RL360 EL or Reading assessments.

Demographic data for this report were retrieved from the 2017–2018 Public Education Information Management System Average Daily Attendance (PEIMS ADA) file for all K–12 HISD students who had BOY scores on either the RL360 EL or Reading assessment. These include students' highest-grade level, economic disadvantage status, English Language Learner status, special education status, gender, and race/ethnicity.

The Benchmark Running Record (BRR) helps teachers to set reading goals for students and plan targeted instruction to meet those goals. BRR reading development levels (i.e. More Development Needed, Meeting Expectations, or Advanced Development) for all K–5 HISD students on the 2017–2018 BOY and on the 2017–2018 end-of-year (EOY) were retrieved from the HISD OnTrack Reports portal. For data consolidation and readability, both the Meeting Expectations students and the Advanced Development students were combined. BRR files for 2017–2018 were then linked to Tier Groups to report the percentage of students that either met the Meeting Expectations reading development level or the Advanced Development reading development level on both the BOY BRR and the EOY BRR.

As part of the State of Texas and HISD promotion standards all students in first and second grade must take and meet 80 percent passing on the High Frequency Word Examination (HFWE). The student has up to three opportunities to meet the 80 percent passing standard on the HFWE. Data from both the 2016–2017 and 2017–2018 HFWE data files were linked to Tier 2 and Tier 3 students to determine student HFWE achievement.

State of Texas Assessments of Academic Readiness (STAAR) results for 2016–2017 and 2017–2018 HISD students in grades 3–8 reading (first administration) and End of Course (EOC) English I and English II (first administration, first-time testers and re-testers) results were retrieved from the Cognos_SIS ad hoc package. Scored versions of the STAAR administered in both English and Spanish were used in this report. Only STAAR scores that could be linked to a student ID were used in the analysis. Data from 2016–2017 and 2017–2018 STAAR files were then linked to Tier Groups, as measured by the 2017–2018 BOY RL360 EL and Reading assessments to report student achievement on STAAR progress measure differences year over year by Tier Group. Students in grades 4–8 that had a STAAR Reading progress measure and students that had a STAAR EOC English II progress measure were both used in this report. Not all students had a documented STAAR Reading or STAAR EOC English II progress measure. The lack of a STAAR progress measure could be explained by the student not taking the prior year assessment.

During the 2017-2018 school year, HISD students in grades K–12 identified as Tier 2 or Tier 3 by the BOY scores on the RL360 EL or Reading assessments, were provided with intervention to support student learning. The nature and frequency of individual student learning interventions were available through the Chancery Response to Intervention (RTI) portal. RTI data for this report included only those students who

had at least one RTI record in either English Language Arts (ELA) Tier II or ELA Tier III level with an intervention start between 08/25/2017 and 06/01/2018, both dates included.

The HISD Office of Special Education Services (OSES) provided data on the number of IAT requests for an Admission, Review and Dismissal/Individualized Education Program (ARD/IEP) committee review of a students' eligibility for special education services for the 2017–2018 school year up to and including May 3, 2018. These data were linked to Chancery RTI data to ascertain the number of students with documented interventions who were referred for ARD/IEP committee consideration.

Numbers were rounded to the nearest whole number in the text, and to the nearest tenth in the tables. Numbers were rounded up if the next digit was five or higher and were not changed if the next digit was lower, so 11.49 was recorded as 11.5 in a table and 11 in the text, while 11.5 was recorded as 11.5 in the table and 12 in the text.

Data Limitations

One data limitation is that there is no growth measure provided within the data files for the RL360 Early Literacy assessment or RL360 Reading assessment. This data limitation does not allow the researcher the opportunity to determine if a student made the progress expected on the RL360 Early Literacy assessment or RL360 Reading assessment

Results

How did 2017–2018 HISD students in grades K–12 who took the Beginning-of-Year (BOY) RL360 Early Literacy (EL) or Reading assessment perform on the BOY RL360 EL or Reading assessment?

Figure 1. HISD Achievement on BOY RL360 EL or Reading Assessment, Spanish and English combined by Tier Group, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 PEIMS ADA file
 Note: Percentages may not total 100 percent due to rounding.

- A total of 165,316 students in K–12 had BOY scores on the RL360 EL or Reading assessment (**Figure 1**, p. 5; **Table 1**, p. 18).
- Of all BOY RL360 EL and Reading assessment test-takers a total of 32,534 (20 percent) students were identified as Tier 2, Intervention, and 45,752 (28 percent) were identified as Tier 3, Urgent Intervention (Figure 1 and Table 1).
- As shown in Figure 1, ninth grade had the highest proportion (39 percent) with percentile scores placing them in Tier 3, while twelfth grade had the highest proportion (23 percent) of Tier 2 students.

In 2017–2018, what were the demographics for students that participated in the Beginning of Year (BOY) RL360 Early Literacy (EL) or Reading assessment?

- Of all BOY RL360 Early Literacy or RL360 Reading assessment test-takers, 75 percent were economically disadvantaged (**Table 2**, p. 19). Large proportions of students were economically disadvantaged within all BOY RL360 EL and Reading assessment Tier groups with Tier 1 at 61 percent being the smallest, followed by On Watch (79 percent), then Tier 2 (83 percent) and finally Tier 3 (85 percent) (**Figure 2**; Table 3, p. 20; **Table 4**, p. 21, **Table 5**, p. 22; **Table 6**, p. 23).
- The largest percentage difference of RL360 EL and Reading assessment test-takers with regards to English language learner status was between Tier 1 students (24 percent) and Tier 3 students (46 percent) (Figure 2; Table 3; Table 4; Table 5; Table 6).
- As shown in Figure 2, 14 percent of Tier 3 students and five percent of Tier 2 students were identified as being in special education, with one percent of Tier 1 students and three percent of On Watch students identified as being in special education (Figure 2; Table 3; Table 4; Table 5; Table 6).

Figure 2. Demographics of Tier 1, On Watch, Tier 2 and Tier 3 Students, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 PEIMS ADA file

- Of the 165,316 HISD students grades K–12 that took either the BOY RL360 EL or RL360 Reading assessment, the highest proportion of test-takers were Hispanic with 63 percent, followed by African American (23 percent), and White (8 percent) (**Table 7**, p. 24). This is reflective of the district's student population.
- Hispanics accounted for the largest proportion of RL360 EL and Reading assessment test-takers in Tier 1 (56 percent), On Watch (67 percent), Tier 2 (68 percent), and Tier 3 (69 percent) (**Figure 3**; **Table 8**, p. 25; **Table 9**, p. 26; **Table 10**, p. 27; **Table 11**, p. 28).
- African American students accounted for 18 percent of Tier 1 RL360 EL and Reading assessment test-takers, followed by On Watch (25 percent), and 26 percent of both Tier 2 and Tier 3 students (Figure 3; Table 8; Table 9; Table 10; Table 11).

Figure 3. Race/Ethnic Demographics of Tier 1, On Watch, Tier 2, and Tier 3 Students 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 PEIMS ADA file

Note: Percentages may not total 100 percent due to rounding.

Figure 4. Distribution of Race/Ethnicity Groups by BOY Tier Group, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 PEIMS ADA file

- As shown in **Figure 4**, the largest proportion of Hispanic students tested were Tier 1 (33 percent) followed by Tier 3 (30 percent), Tier 2 (21 percent), and On Watch (16 percent) (Table 8; Table 9; Table 10; Table 11).

- Of all African American students tested, the largest proportion were Tier 3 (32 percent) followed by Tier 1 (30 percent), Tier 2 (23 percent), and On Watch (16 percent) (Figure 4; Table 8; Table 9; Table 10; Table 11).

What was student achievement on the EOY RL360 Early Literacy (EL) or RL360 Reading assessment for HISD students in grades K–12 identified as Tier 2 or Tier 3, as measured by their achievement on the 2017–2018 BOY RL360 EL or Reading assessment?

Figure 5. Percentage of Grades K–12 Students Who Met or Exceeded the Benchmark Score on the EOY RL360 EL or Reading Assessment by BOY Tier Group, English and Spanish Combined, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 PEIMS ADA file

- Overall, 86 percent of Tier 1, 45 percent of On Watch, 23 percent of Tier 2, and eight percent of Tier 3 students met or exceeded the benchmark score (40th percentile) on the 2017–2018 EOY RL360 EL and Reading assessment (Figure 5; Table 12, p. 29; Table 13, p. 29).
- As shown in Figure 5, by grade, the largest proportion of Tier 2 students that met or exceeded the benchmark on the EOY RL360 EL or Reading assessment were in first grade (66 percent) and the largest proportion of Tier 3 students that met or exceeded the benchmark were in kindergarten and first (both at 40 percent) (Table 12; Table 13).

What was student reading level achievement as recorded on the 2017–2018 Benchmark Running Record (BRR) at both BOY and EOY for HISD students in grades K–5 identified as Tier 2 or Tier 3, as measured by their achievement on the 2017–2018 BOY RL360 Early Literacy or Reading assessment?

Figure 6. Percentage of All HISD Students Grades K–5 that Achieved the Meeting Expectations or Advanced Development Reading Benchmark at BOY and at EOY on BRR, 2017–2018

Source: Benchmark Running Records student data files, 2018

Note: Numbers may differ from previous reports. Highest scores were selected where students had multiple assessments during the testing window.

- means there is no benchmark reading level for kindergarten students on the BRR BOY.

- Overall, for all grade levels, 36 percent achieved the Meeting Expectations or Advanced Development reading benchmark at BOY and 52 percent achieved the Meeting Expectations or Advanced Development reading benchmark at EOY (**Figure 6**, p. 8; **Table 14**, p. 30).
- As shown in Figure 6, of all grade levels where both BOY and EOY reading benchmarks were reported, second grade had the highest proportion achieve the Meeting Expectations or Advanced Development reading benchmark at both BOY (42 percent) and EOY (57 percent) (Table 14).
- As shown in **Figure 7**, Tier 2 students had a higher percentage achieve the Meeting Expectations or Advanced Development reading benchmark on the BRR than Tier 3 students at both BOY (15 percent versus 5 percent) and EOY (29 percent versus 13 percent) (**Table 15**, p. 30; **Table 16**, p. 31).
- When comparing BOY BRR to EOY BRR outcomes, the largest percentage-point increase in achieving the Meeting Expectations or Advanced Development reading benchmark occurred for On Watch students (22 percent), followed by Tier 1 students (16 percent), then Tier 2 students (14 percent), and Tier 3 students (8 percent) (Figure 7; Table 15; Table 16).

Figure 7. Percentage of Students Grades K–5 that Achieved the Meeting Expectations or Advanced Development Reading Benchmark at BOY and at EOY on BRR by Tier Group, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; Benchmark Running Records student data files, 2018

Note: Students had to have both a BOY and EOY BRR for inclusion in this analysis.

- means there is no benchmark reading level for kindergarten students on the BRR BOY.

What was student achievement on the 2017–2018 High Frequency Word Examination (HFWE) at both the beginning of year and end of year for HISD students identified as Tier 2 or Tier 3, as measured by student achievement on 2017–2018 BOY RL360 Early Literacy (EL) or Reading Assessment?

- In 2017–2018, 86 percent of first-graders and 92 percent of second graders met the passing standard on the HFWE by the end of the year (**Figure 8**, p. 10; **Table 17**, p. 31).

Figure 8. Cumulative Percentage of HISD Students Who Met the Passing Standard on the HFWE, English, Spanish, and Dual Language, 2017–2018

Source: 2017–2018 HFWE Test Sessions: Database

Note: HISD students in grade 1 and grade 2 must meet the HFWE passing standard once an academic year to be promoted to the next grade level. Highest scores were selected where students had multiple assessments during the testing window.

- Students at all tiers had higher percentages of students passing the HFWE at EOY than MOY (or BOY). Grade 1 Tier 3 students made the greatest gains (10 percentage points), followed by Grade 1 Tier 2 (nine percentage points) and Grade 1 On Watch and Grade 2 Tier 3 students (six percentage points) (Figure 9; Table 18, p. 32; Table 19, p. 32).

Figure 9. Cumulative Percentage of BOY RL360 Early Literacy or RL360 Reading Test-Takers Who Met the Passing Standard on the HFWE, English, Spanish, and Dual Language, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; 2017–2018 HFWE Test Sessions: Database

Note: HISD students in grade 1 and grade 2 must meet the HFWE passing standard once an academic year to be promoted to the next grade level. Highest scores were selected where students had multiple assessments during the testing window.

- Tier 3 student in Grade 1 had the lowest percentage (59 percent) of students meeting promotion standards at the end of the year (Table 19).

What was student achievement on STAAR 3–8 Reading, STAAR English I or English II in 2016–2017 and 2017–2018 for HISD students in grades 3–12 identified as Tier 2 or Tier 3, as measured by the 2017–2018 BOY RL360 Reading assessment?

Figure 10. Percentage of All HISD STAAR Reading Testers Spring Administration in Grades 3–8 Achieving At or Above the Approaches Grade Level Standard on STAAR Reading, English and Spanish Combined, 2016–2017 and 2017–2018

Source: Cognos, STAAR files, retrieved June 15, 2017; Cognos, STAAR files, retrieved September 25, 2018

- As shown in **Figure 10**, a higher proportion of students in grades 3–8 achieved at or above the Approaches Grade Level standard on the STAAR Reading exam in 2017–2018 when compared to 2016–2017. Grade 5 students made the greatest gains (six percentage points) (**Table 20**, p. 32).

Figure 11. Percentage of All First-Time and Retested HISD Students in Grades 9–12 Achieving At or Above the Approaches Grade Level Standard on STAAR English I or English II, 2016–2017 and 2017–2018

Source: Cognos, STAAR files, retrieved June 15, 2017; Cognos, STAAR files, retrieved September 25, 2018

- The 2017–2018 STAAR EOC English I exam results showed a higher percentage of first-time and retested students achieving at or above the Approaches Grade Level standard when compared to 2016–2017 school year (48 percent to 51 percent, respectively) (**Figure 11**; **Table 21**, p. 33).
- Also, 2017–2018 saw an increase in the percentage of first-time and retested students achieving at or above the Approaches Grade Level standard on STAAR EOC English II when compared to 2016–2017 (51 percent and 53 percent, respectively) (**Figure 11**; **Table 21**).
- As shown in **Figure 12** (p. 12), the largest percentage-point gap between BOY Tier 3 students and BOY Tier 1 students achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR reading exam occurred in Grade 6 (19 percent and 97 percent, respectively) (**Table 22**, p. 33; **Table 23**, p. 33; **Table 24**, p. 34; and **Table 25**, p. 34).

Figure 12. Results for RL360 Reading BOY Tier Group Students in Grades 3–8 Achieving At or Above the Approaches Grade Level Standard on STAAR Reading English and Spanish Combined, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; Cognos, STAAR English and STAAR Spanish files, retrieved June 18, 2018

- The largest percentage-point gap between BOY Tier 2 students and BOY Tier 1 students achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR reading exam occurred in Grade 4 (49 percent and 94 percent, respectively) (Figure 12; Table 22; Table 23; Table 24; Table 25).

Figure 13. Results for RL360 Reading BOY Tier Group Students in Grades 9–12 Achieving At or Above the Approaches Grade Level Standard on the STAAR EOC English I and the STAAR EOC English II, 2017–2018

Source: RL360 Reading student data files, 2017–2018; Cognos, STAAR English and STAAR Spanish files, retrieved June 18, 2018

- As shown in **Figure 13**, Tier 3 students had the lowest proportion achieve at or above the Approaches Grade Level standard on both the STAAR EOC English I and STAAR EOC English II exams (20 percent and 21 percent, respectively) (Table 22; Table 23; Table 24; Table 25).
- Further, as shown in Figure 13, on the STAAR EOC English I exam, the Tier 1 students had the highest proportion achieve at or above the Approaches Grade Level standard (98 percent), followed by the On Watch students (89 percent) (Table 22; Table 23; Table 24; Table 25).

- Finally, as shown in Figure 13, on the STAAR EOC English II exam, the Tier 1 students had the highest proportion achieve at or above the Approaches Grade Level standard (98 percent), followed by the On Watch students (89 percent) (Table 22; Table 23; Table 24; and Table 25).
- The percentage of Tier 3 students that did not meet the STAAR progress measure fell from 57 percent in 2016–2017 to 44 percent in 2017–2018, and the percentage of Tier 2 students that did not meet the STAAR progress measure fell from 52 percent in 2016–2017 to 40 percent in 2017–2018 (**Figure 14**; and **Table 26**, p. 35).
- Students that achieved Tier 2 on the RL360 Reading assessment had the largest percentage-point gain in meeting the STAAR progress measure from 2016–2017 (35 percent) to 2017–2018 (40 percent). (Figure 14; Table 26).
- Tier 1 students had the largest percentage-point gain in exceeding the STAAR progress measure from 2016–2017 (7 percent) to 2017–2018 (27 percent) (Figure 14; Table 26).

Figure 14. Results for RL360 Reading BOY Tier Group Students on STAAR Progress Measure Achievement for STAAR Reading, STAAR EOC English I and STAAR EOC English II, 2016–2017 and 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; Cognos, STAAR English and STAAR Spanish files, retrieved June 18, 2018

What was student achievement on the EOY RL360 EL assessment or EOY RL360 Reading assessment for HISD students in grades K–12 identified as Tier 2 or Tier 3, as measured by the 2017–2018 BOY RL360 EL assessment or BOY RL360 Reading assessment, that had documented interventions in Chancery Response to Intervention (RTI) portal under English Language Arts (ELA) Tier II or ELA Tier III?

- As shown in **Figure 15** (p.14), of the students in a RL360 BOY Tier Group and with at least one documented intervention in the RTI portal, the largest percentage-point gap in achieving EOY Tier 1 after receiving documented Supplemental Instruction (ELA II) was 48 percentage points between BOY

Tier 3 and BOY Tier 1 (Table 27, p. 36; Table 28, p. 37; Table 29, p. 37; Table 30, p. 38; Table 31, p. 39; Table 32, p. 39).

Figure 15. Percentage of EOY Tier 1 Achievement on the EOY RL360 EL and the EOY RL360 Reading for all BOY Tier Group Students Who Had Documented Interventions in RTI Portal ELA Tier II or ELA Tier III, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; R52CH 2017–2018 RTI Data for IAT

- Of the students in a RL360 BOY Tier Group and with at least one documented intervention in the RTI portal, the largest percentage-point gap in achieving EOY Tier 1 after receiving at least one documented Intensive Individualized Instruction intervention (ELA III) was 37 percentage points between BOY Tier 3 and BOY Tier 1 (Figure 15; Table 27; Table 28; Table 29; Table 30; Table 31; Table 32).

Figure 16. EOY Tier Results on the EOY RL360 EL and the EOY RL360 Reading for BOY Tier 2 and Tier 3 Students Who Had Documented Interventions in RTI Portal ELA Tier II or ELA Tier III, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; R52CH 2017–2018 RTI Data for IAT

- As shown in **Figure 16**, 27 percent of BOY Tier 2 students, with at least one documented Supplemental Instruction intervention, achieved Tier 1 on the EOY RL360 Reading assessment while 19 percent of Tier 2 that received at least one documented Supplemental Instruction intervention regressed to Tier 3 on the EOY RL360 Reading assessment (Table 27; Table 28; Table 29; Table 30; Table 31; Table 32).

- Fifty–six percent of BOY Tier 3 students, with at least one documented Supplemental Instruction intervention, remained at Tier 3 on the EOY RL360 Reading assessment while 11 percent of Tier 3 students that received at least one documented Supplemental Instruction intervention achieved Tier 1 on the EOY RL360 Reading assessment (Figure 16, p.14; Table 27; Table 28; Table 29; Table 30; Table 31; Table 32).
- Further, 25 percent of BOY Tier 2 students, with at least one documented Intensive Individualized Instruction intervention, achieved Tier 1 on the EOY RL360 Reading assessment while 24 percent of Tier 2 that received at least one documented Intensive Individualized Instruction intervention regressed to Tier 3 on the EOY RL360 Reading assessment (Figure 16; Table 27; Table 28; Table 29; Table 30; Table 31; Table 32).
- Finally, 10 percent of BOY Tier 3 students, with at least one documented Intensive Individualized Instruction intervention, achieved Tier 1 on the EOY RL360 Reading assessment while 60 percent of Tier 3 that received at least one documented Intensive Individualized Instruction intervention remained at Tier 3 on the EOY RL360 Reading assessment (Figure 16; Table 27; Table 28; Table 29; Table 30; Table 31; Table 32).

Figure 17. Results for IAT Request for Special Education Services Evaluation through EasyIEP, by Tier Group, 2017–2018

Source: RL360 Early Literacy and RL360 Reading student data files, 2017–2018; R52CH 2017–2018 RTI Data for IAT; IAT Meeting Outcome Report May 3, 2018

- As shown in **Figure 17**, for all students that took the 2017–2018 BOY universal screener, a total of 403 IAT requests for special education evaluation were submitted through EasyIEP, with a total of 13 students being referred for special education evaluation.

Discussion

In 2017–2018, a total of 165,316 students in grades K–12 took the beginning-of-year (BOY) universal screener. The results of this screener identified 32,534 students in need of intervention (Tier 2), and 45,752 students in need of urgent intervention (Tier 3). The Intervention Assistance Team provided support to both Tier 2 and Tier 3 students in achieving their appropriate developmental reading level as measured by one or more of the following: meeting or exceeding their projected reading progress goal as measured on the middle-of-year (MOY) or end-of-year (EOY) RL360 Early Literacy and RL360 Reading assessment; meeting expectations or advanced development level reading benchmark on the BRR (grades K–5); passing the HFWE exam (grades 1 and 2); grades 3–8 achievement on STAAR Reading; grades 9–12 achievement on the STAAR English I or the STAAR English II; and for grades 4–12 meeting the STAAR progress measure. If students receiving documented IAT support did not meet the appropriate developmental

reading level, the IAT campus committee could request an evaluation for special education services (Houston Independent School District, 2017).

Of all the BOY Tier 2 students tested at EOY, 6,175 (23 percent) achieved Tier 1. As for the BOY Tier 3 students tested at EOY, 2,774 (eight percent) achieved Tier 1. Exposure to interventions through IAT support may have given these students the skills needed to meet the reading benchmark score on the RL360 Early Literacy assessment or the RL360 Reading assessment.

When comparing BOY BRR to EOY BRR outcomes, the BOY Tier 2 students had a 14 percentage-point gain in achieving the Meeting Expectation or Advanced Development reading benchmark. BOY Tier 3 students experienced an eight percentage-point gain in achieving the Meeting Expectation or Advanced Development reading benchmark. Exposure to interventions through IAT support may have given students the skills needed to meet the appropriate BRR reading benchmark.

All tiers had higher percentages of students passing the HFWE at EOY than MOY (or BOY). Grade 1 Tier 3 made the greatest gains (10 percentage points), followed by Grade 1 Tier 2 (nine percentage points) and Grade 1 On Watch and Grade 2 Tier 3 students (six percentage points). Exposure to interventions through IAT support may have given students the skills needed to pass the HFWE.

There was a large percentage-point gap between BOY Tier 2 students and BOY Tier 1 students achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR reading exam occurring in Grade 4 (49 percent and 94 percent, respectively); as well as, a large percentage-point gap between BOY Tier 3 students and BOY Tier 1 students on achieving at or above the Approaches Grade Level standard on the Grade 3–8 STAAR reading exam occurring in Grade 6 (19 percent and 97 percent, respectively). These disparities in STAAR reading achievement could be an indication that the RL360 Early Literacy assessment and the RL360 Reading assessment accurately identified students most in need of IAT program support.

Tier 3 students had the lowest proportion achieve at or above the Approaches Grade Level standard on both the STAAR EOC English I and STAAR EOC English II exams (20 percent and 21 percent, respectively). These STAAR exam results could be another indication of the RL360 Reading assessment accurately identifying students most in need of the IAT program.

The percentage of Tier 2 students not meeting the STAAR Progress Measure fell in 2017–2018 (41 percent) when compared to 2016–2017 (52 percent). The percentage of Tier 3 students not meeting the STAAR Progress Measure fell in 2017–2018 (44 percent) when compared to 2016–2017 (57 percent). Exposure to interventions through IAT support may have given a higher percentage of students the skills needed to meet the STAAR progress measure.

Following Supplemental Instruction and Intensive Instructional Support, a percentage of both the Tier 2 students (50 percent and 46 percent, respectively) and the Tier 3 students (44 percent and 40 percent, respectively) showed improvement in reading development at EOY, however at EOY a percentage of the Tier 2 students showed regression in reading development level, and a percentage of the Tier 3 students remained at the same reading development level. First, after receiving Supplemental Instruction, 19 percent Tier 2 students regressed to Tier 3 at EOY. Further, 56 percent of BOY Tier 3 students remained at Tier 3 at EOY. Second, after receiving Intensive Individual Instruction, 24 percent of Tier 2 students regressed to Tier 3 at EOY, and 60 percent of BOY Tier 3 students remained at Tier 3 at EOY. This shows that not all

students are experiencing the expected improvement in reading development following documented intervention.

After documented IAT support in Chancery RTI was reviewed, a total of 381 Tier 2 and Tier 3 students had an IAT request for referral for special education services through EasyIEP, and a total of 13 students were referred for evaluation. These results should be tempered by the relatively low number of Tier 2 and Tier 3 students that had documented interventions in Chancery.

The IAT program identified and supported HISD students that needed additional educational supports beyond the general classroom instruction. This support involved collaboration of campus education professionals to provide intervention recommendations on an individual student basis. The results of this collaboration could be inferred from the minimal increase in reading achievement that the identified students experienced, as measured by the RL360 Early Literacy assessment and the RL360 Reading assessment.
