
Student Activity Sheet

Create a Calendar using HTML

LESSON OVERVIEW

Student will create a calendar using HTML table commands. The calendar will contain text, links, and graphics. Calendar information should be given to student; however, students are free to express

What you should learn:

- Skills necessary to create tables using HTML
- Skills necessary to insert graphics in tables using HTML
- Skills necessary to create links in HTML
- How to debug HTML code
- How to effectively use text color, graphics, etc to create an attractive and viewable calendar

Calendar Specifications

- Mon-Fri days only
- 3 graphics (background graphic may be included) Source must be documented in HTML code.
- At least 2 text colors
- 4 links (1 link must be a graphic)

Example of Calendar

October				
Monday	Tuesday	Wednesday	Thursday	Friday
1	2 -Band Concert 	3 -TAAS Test	4	5 -Bulldogs vs Edna -End of 6-weeks

Student Activity Sheet

Create a Calendar using HTML

Specific calendar information given by your instructor:

Month:

1	17
2	18
3	19
4	20
5	21
6	22
7	23
8	24
9	25
10	26
11	27
12	28
13	29
14	30
15	31
16	

Graphics you may want to include with source documented (needed for documentation).
