A Friendly Reminder About Your Student Login Information

• Your username is the lowercase letter "s" in front of your Student ID Number or Lunch Card Number.

• For example, if the number on your lunch card is 1234567, then you would type the username - s1234567.

• Your password is your Birthday typed using numbers- the Month (Type 2 numbers), then the Date or Day (Type 2 Numbers), and then the Year (Type 4 Numbers).

• For Example, if you were born on April 7, 2013. You type the password - 04072013.

• Write down your username and password on an index card and read each one. Keep the index card in a safe place so that you can use it latter.

• Turn the card over, write down your username and check to see how much of it you wrote correctly. Try to remember 2 numbers at a time. Repeat this until you can remember your username without looking at your index card. This may take several days but that is fine. You will remember it.

Your Parents Can Help You!

• Sit down with your parents, your index card with your username and password, two pencils, and a piece of paper. Ask them to help you practice learning your school's student login information.

• First have your parent to write the letter "s" and the first number of your username on a piece of paper.

• Ask him or her to give the paper to you so you can add the next number.

• You give it back to your parent to add the number after that, repeating this until all the username is written.

• You can make it harder and more fun by you writing down the next 2 or 3 numbers before passing the paper back to your parents. You can do this with your password as well.
