| | | | |
| | | | |
| | | | |

Find the area and perimeter of **four more** rectangles, using the digit cards.

On the back of the grid paper, describe the difference between area and perimeter using the following sentence stem:
*The difference between area and perimeter is* _____.

Then explain the process of calculating both area and perimeter. A sentence stem is provided for you, if needed.
*I can calculate area by* _____. *I can calculate perimeter by*_____.

## Thursday – 30 minutes

**Activity / Task**

Graphing on a Coordinate Grid with an Input and Output Table

Cut out the rule cards. Then, shuffle the rule cards and place them face down in a pile. Select one rule card and create an input and output table that matches the rule. Plot at least four ordered pairs on the coordinate grid.

| Input (x) | Rule | Output (y) | Ordered Pair |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |

Image by HISD Curriculum using Microsoft Word

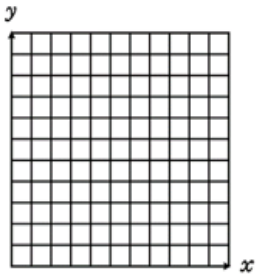

Image by HISD Curriculum using 1, 2, 3 Math Fonts

Record your information in an input and output table and plot your ordered pairs in a coordinate grid with **five more** sets of rule cards.

**Resources**

## Tuesday – 30 minutes

| | |
|---|---|
| Activity / Task<br><br>Solve word problems using data from a bar graph | Complete the frequency table below that corresponds to the data in the **bar graph** and answer the questions that follow.<br><br>**Bar Graph:** - A graph that uses horizontal or vertical bars to display countable data, may include frequencies of an item, a category, a number, or a range of numbers. |

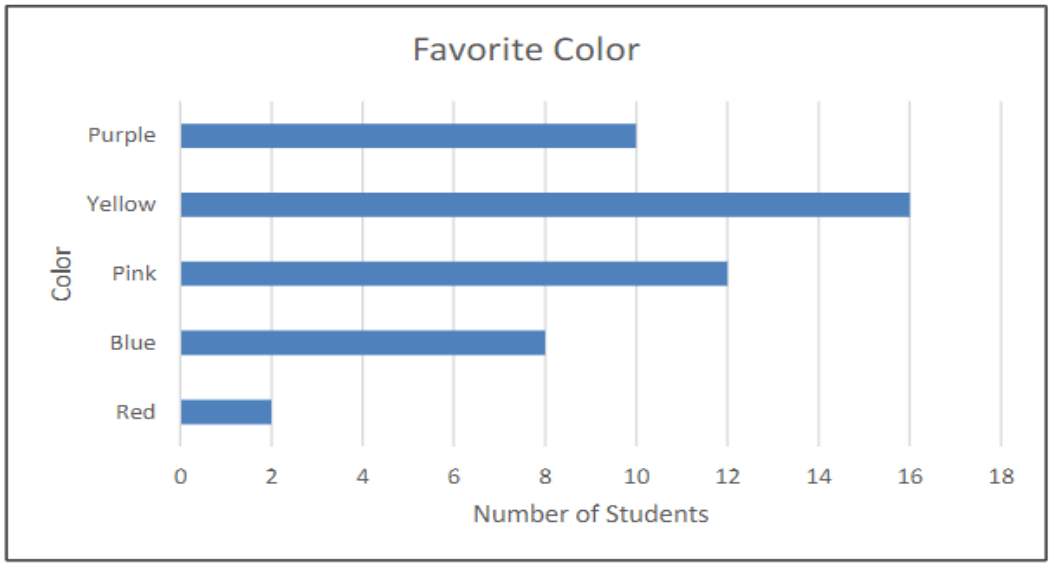

Image by HISD Curriculum using Microsoft Excel

Favorite Colors

| Color | Frequency |
|---|---|
| Red | 2 |
| | |
| | |
| Yellow | |
| | 12 |

Using the information in the graphs above, answer the following questions on a piece of paper.

- How many total students were surveyed?
- How many students chose yellow and blue?
- How many more students chose pink and blue than purple?

On the same piece of paper, create *at least 3 more* questions using the data from the bar graph or frequency table. Work with a family member to find the solutions.

**Mathematics – Grade 5**
**April 13-24, 2020 – Week 2**

| Thursday – 30 minutes | |
|---|---|
| Activity / Task<br><br>Solve problems using data from a frequency table | Look at the frequency table below. What do you notice? What do you wonder? |

Students' Half-Hour Running Distance

| Distance in Miles | Frequency |
|---|---|
| $\frac{3}{8}$ | 4 |
| $1\frac{1}{8}$ | 0 |
| $1\frac{7}{8}$ | 6 |
| $2\frac{5}{8}$ | 3 |
| $3\frac{3}{8}$ | 5 |
| $4\frac{1}{8}$ | 3 |

Table by HISD Curriculum using Microsoft Word

Use the data represented in the frequency table to answer the following questions.

- How many total students were surveyed?
- Why is it important to have a key?
- Coach Garcia recorded the four shortest distances that his students ran. What was the total distance these four students ran?

Use the grid paper to create a dot plot using the data provided from the frequency table. (Refer to Wednesday's lesson for an example,)
