## TO: Board Members

FROM: Millard L. House II
Superintendent of Schools
SUBJECT: GIFTED AND TALENTED PROGRAM EVALUATION: 2020-2021
CONTACT: Allison Matney, Ed.D., 713-556-6700
According to Section 29.123 of the Texas Education Code, the Texas State Plan for the Education of Gifted/Talented Students (G/T) forms the basis of program accountability for statemandated services for $\mathrm{G} / \mathrm{T}$ students. In accordance with the Texas State Plan for the Education of Gifted/Talented Students $(G / T)$, providing this evaluation to the Board of Education is a state requirement (TEC §11.251-11.253). In the Houston Independent School District, G/T students were served through one of two program designs: Board-approved Vanguard Magnet or Gifted and Talented Neighborhood. Attached is the evaluation report summarizing the effectiveness of the Gifted and Talented Program during the 2020-2021 school year.

The state plan outlines two different performance measures: Accountability and Exemplary. There are six components that are addressed in the plan: Fidelity of Services, Student Assessment, Service Design, Curriculum and Instruction, Professional Learning, and Family/Community Involvement. For the 2020-2021 school year, HISD developed 12 G/T Standards that aligned with the Texas State Plan. The evaluation report centered on measuring the effectiveness of the Gifted and Talented Program based on the state's six components. The Gifted and Talented program supports the district's strategic direction by having an effective teacher in every classroom and instruction that is personalized to meet the learning needs for each child.

Key findings include:

- In 2020-2021, a total of 31,464 students attending 258 elementary, middle, and high schools participated in the district's Gifted and Talented Program, reflecting 17.0 percent of the district K-12 population, a 0.3 percentage-point increase from 16.7 percent in 20192020.
- When comparing the demographic profile of those participating in the Gifted and Talented Program to the district's demographic profile, African American, Hispanic, male, bilingual English Learner (EL) \& Non-EL, EL, economically disadvantaged, English as a Second Language (ESL), and special education students were underrepresented, while White and Asian students were overrepresented.
- On the fall 2020 PSAT results for eleventh grade, 1,846 , or 72.9 percent, of G/T students took the PSAT, and a total of 1,294 , or 70.1 percent, met both College and Career Readiness (CCR) Benchmarks.
- For the Class of 2021, a total of 288 G/T students, or 12.4 percent, of the $2021 \mathrm{G} / \mathrm{T}$ graduating class took the ACT and 79.5 percent met the state's college ready criterion of 24 or higher (composite).
- For the Class of 2021, a total of $1,793 \mathrm{G} / \mathrm{T}$ students, or 76.9 percent, of the $2021 \mathrm{G} / \mathrm{T}$ graduating class took the SAT and 67.7 percent met the CCR Benchmarks for both

Evidence-based Reading and Writing (ERW) (greater than or equal to 480) and math (greater than or equal to 530).

## Administrative Response

## Gifted and Talented Department:

The Gifted and Talented (GT) Department will implement the following actions to support campuses and increase equity of and access to gifted and talent services based on the evaluation recommendations:

1. To ensure that Gifted Education Plan are fully evaluated, and teachers are creating and implementing the plan for G/T students on an annual basis, the GT department will continue to support through training and collaboration with PowerSchool (PS) to ensure that students are receiving a Gifted Education Plan that is purposeful and using the Gifted Written Report for progress monitoring.
2. In working with PS, the GT department was able to create a report that will inform campuses when Gifted Education Plans are created and if they have been created within the designated time.
3. In effort to improve our data accuracy and automation of data to identify GT teachers, to monitor GT training and implement a PEIMS district identifier to delineate students served, we will continue to collaborate with PowerSchool/HISD Connect, Data Warehouse, and OneSource for the development of an automated and systemic approach.
4. To remain in compliance with the Texas Education Agency (TEA) and HISD Local Policy, the GT department will continue supporting campus leaders with pre-service and ongoing professional learning to ensure awareness and compliance with the Texas State Plan requirements and instructional supports. The GT Department has developed and provided trainings on toolkits and governing documents to support campus compliance with state and board expectations for programs and services.
a. The GT Department will continue the PEIMS District Identifier implemented in the Fall of 2019 for campus communication of service plan options from the five PEIMS Codes, as identified by the TEA for GT. This is monitored by the GT Department and communicated to the Department of Federal and State Compliance.
b. The GT Department will continue pre-service training on requirements for Program Intent Code 21 (PIC 21) funds and will support the Chief Financial Officer, when requested, with monitoring campus distributed funds.
c. The GT Department will continue certifying district alignment to the Texas State Plan through the Department of Federal and State Compliance.
5. To align the school guidelines and HISD board policy the GT Department submitted revisions to Local Board Policy EHBB to ensure alignment with the Texas State Plan (June of 2020). The HISD Board of Trustees reviewed the revisions and approved the updated policy August 19, 2020. The HISD GT Governing Documents (Program Manual (Handbook), Toolkits, and reference documents) were developed in alignment with the Texas State Plan and aligned with the HISD Local Board Policy.
6. To reflect administrative responsibilities for accountability for lesson design and delivery, the monitoring of state mandated professional development and instructional support, and GT students' scheduling in accordance with the Texas Sate Plan, the GT Department will communicate that best practice in HISD is for the GT Coordinator to be in an administrative role. For those campuses who do not have an administrator in that role, the GT department will continue to provide coaching and support.
7. To monitor the usage of the Texas Performance Standards Project (TPSP) tool, the GT Department will develop and monitor a centralized system to access information for TPSP participation. Currently, this information is maintained in the newly developed Gifted Education Plans (GEPs). Campuses also completed Service Plan Support documents in August 2020 to denote campus plans and necessary supports for TPSP. The GT Department will also develop a parent webinar for TPSP.
8. The GT department will continue to work with the Kinder High School for Performing and Visual Arts to develop an identification process for students gifted in the Arts. The GT department will continue to have parents opt-out of the program rather than opt-in and conduct parent meetings at schools with large, under-represented populations. We will present at Parent University to make parents aware through parent groups, such as Gifted and Talented Education Supporters (GATES).
9. In accordance with Texas Education Code § 7.028 and to ensure that all district-level employees are in compliance with state-mandatory professional learning for GT; the GT Department will continue with August 2020 implementation of assigning and monitoring state-mandated professional learning via OneSource Learning Profiles. The GT Department created a Texas State Plan course in OneSource and will offer the course to HISD Board Trustees for the recommended pursuit of professional learning for GT.
10. To monitor compliance, the GT Department established a Compliance Action Plan that is to be completed by campuses found to be out of compliance with the Texas State Plan. The action plans will be submitted to the GT Department and outline actions steps to be taken to achieve compliance. This information will be shared with SSOs and Area Superintendents for support with achieving compliance.

## 2020-2021 Administrative Response Summary

The Gifted and Talented Department continues to provide support to all campuses focused on supporting data quality as it relates to the following:

- G/T student identification
- Instructional development and delivery
- Mandatory teacher professional development
- Program service design

The Gifted and Talented Department continues to provide support to all district Leaders Campus Leaders, Coordinators and Teachers through PL on demand to help better support and recommend identification for GT students, also to ensure employees who make district-level decision regarding the Gifted and Talented program:

- You Might Have a G/T/ Student...
- State Plan for the Education of Gifted and Talented Students

The Gifted and Talented Department provides ongoing PD On-demand and self-paced options for elementary and secondary G/T teachers, including, but not limited to:

- Professional Learning Community meetings
- One-to-one meetings
- Campus trainings
- Resources and Professional Learning to support:
- Depth and Complexity
- Instructional Differentiation
- Questioning Strategies
- Gifted Education Plans
- Differentiated products, processes, and pacing
- State Plan
- Identification of Giftedness
- Equity Analysis
- Navigating the Texas Performance Standards Project

The Gifted and Talented Department continues to provide professional development opportunities for G/T teachers and administrators through virtual courses via Microsoft Teams and in-person and has created 8 self-paced courses to meet campus instructional and compliance needs. To support parents of G/T students, the Gifted and Talented Education Supporters (GATES) was created and is inclusive of an Industry Mentor Program and parent education components. Parents empowerment and awareness has been offered through the following trainings:

- Parent Education Session
- GEP
- Renzulli Learning
- GT Programs and Services
- Identification Process
- Timeline Communications
- Updated Website Communication
- Partnered with the Office of School Choice to ensure an effective line of parent communication

The GT department completed a district-wide equity analysis that was shared across all tiers of district leadership to inform the district's identification equity discrepancies. In response to the findings, the GT department developed a three-year strategic plan, encompassing, but not limited to:

- Targeted objectives for professional learning
- Revised matrices (honoring and serving the gift)
- A research-based recommendation scale
- A centralized system for identifying and serving gifts outside of academics

During the 2021-2022 school year, purposeful collaboration occurs between the Advanced Academics and the College Readiness Departments to implement the following protocols/processes. Still in progress.

- AP potential profiles will be analyzed, and cross referenced with non-GT students for determining potential giftedness
- College, Career, Military Readiness (CCMR) data will be evaluated for readiness indicators for GT students. The GT department will work with campus leadership to support GT students earning CCMR
- Established a monthly collaboration with the Office of Innovation \& Post-Secondary Programming with a strategic focus on tracking students who are performing at EMERGE/Miles Ahead standards of readiness to create a potential GT cohort. This collaboration will be focused on increased identification of secondary GT students, as well as the improved performance outcomes of GT students on AP and IB exams through Virtual Camps and Study Halls
- A professional development (video and guide) was facilitated for standard scheduling protocols for all GT students for principals and Tier II leaders
- Master Schedulers now have state approved GT courses for the scheduling of GT students

Should you have any further questions, please contact Allison Matney in Research and Accountability at 713-556-6700.

It is the policy of the Houston Independent School District not to discriminate on the basis of age, color, handicap or disability, ancestry, national origin, marital status, race, religion, sex, veteran status, political affiliation, sexual orientation, gender identity and/or gender expression in its educational or employment programs and activities.

# GIFTED AND TALENTED PROGRAM EVALUATION 2020-2021 

Executive Summary

## Program Description

According to the Texas Education Code §29.121 and the Houston Independent School District (HISD) Board Policy, gifted and talented students means "a child or youth who performs at, or shows the potential for performing at a remarkably high level of accomplishment when compared to others of the same age, experience, or environment and who:

- Exhibits high performance capability in an intellectual, creative, or artistic area;
- Possesses an unusual capacity for leadership; or,
- Excels in a specific academic field (Houston Independent School District, 2020a, p. XXIV-1)."

The Texas State Plan for the Education of Gifted/Talented Students (herein referred to as the Texas State Plan) represents the accountability plan for measuring the performance of districts in providing state-mandated services to students identified as G/T (Texas Education Agency, 2019). The State Board of Education approved revisions to the Texas State Plan in July 2019. The Texas State Plan establishes standards for accountability while recognizing exemplary actions. All districts are required to meet the accountability standards. In addition, the state plan serves as a guide for improving program services. To accomplish this, districts and campuses may review the exemplary measures to improve student services that are not mandated (Texas Education Agency, 2019).

The purpose of this evaluation is to comply with state mandates requiring school districts to evaluate the effectiveness of the Gifted and Talented Program annually (TEC §11.251-11.253). Consequently, this evaluation focused on the degree to which the Gifted and Talented Program operated in compliance with the policies and procedures developed by the legal and administrative authorities as well as the District's $12 \mathrm{G} / \mathrm{T}$ Standards outlined in the Gifted and Talented School Guidelines (Houston Independent School District, 2020a) (Appendix A, Table A-1, p. 24). The newest G/T Standard was originally issued on January 14, 2016, centering on the Gifted Education Plan, consisting of a written statement of academic achievement, differentiation, and curricular modifications for the student. The twelve G/T Standards have been aligned to the six components in the Texas State Plan in Table A-1 (p. 24). Specific measures of compliance include the following six components of the Texas State Plan with the corresponding G/T Standard in parenthesis:

1. Fidelity of Services (align to HISD G/T Standards $1,2,6,11$, and 12)
2. Student Assessment (align to HISD G/T Standards $2,3,4$, and 11)
3. Service Design (align to HISD G/T Standards 1, 6, 9, 11, and 12)
4. Curriculum \& Instruction (align to HISD G/T Standards 5, 6, and 11)
5. Professional Learning (align to HISD G/T Standards 7, 8, and 11)
6. Family/Community Involvement (align to HISD G/T Standards 10 and 11)

## Key Findings

- In 2020-2021, a total of 31,464 students attending 258 elementary, middle, and high schools participated in the district's Gifted and Talented Program, reflecting 17.0 percent of the district K-12 population, a 0.3 percentage-point increase from 16.7 percent in 2019-2020.
- When comparing the demographic profile of those participating in the Gifted and Talented Program to the district's demographic profile, African American, Hispanic, male, bilingual English Learner (EL) \& Non EL, EL, economically disadvantaged, English as a Second Language (ESL), and special education students were underrepresented, while White and Asian students were overrepresented.
- For 2021, a total of 12,867 Advanced Placement (AP) exams were taken by 5,952 G/T high school students and 50.8 percent of the scores were three or higher on a scale of one to five, an increase of 6.1 percentage points from 2019.
- During the COVID-19 pandemic in 2019-2020 and 2020-2021, the district chose the non-testing option for IB exams, in which grades were based on the internal assessments that were externally evaluated, teacher predicted grades, and historic data. Five-hundred forty HISD G/T students received results for a total of 1,657 International Baccalaureate (IB) examinations, where 74.4 percent scored a four or higher on a scale from one to seven. This reflects an increase in participation of 60 students from 2020, as well as an increase in the number of exams scoring four or higher.
- On the fall 2020 PSAT results for eleventh grade, 1,846 , or 72.9 percent, of $G / T$ students took the PSAT, and a total of 1,294 , or 70.1 percent, met both College and Career Readiness (CCR) Benchmarks.
- For the Class of 2021 , a total of $288 \mathrm{G} / \mathrm{T}$ students, or 12.4 percent, of the $2021 \mathrm{G} / \mathrm{T}$ graduating class took the ACT and 79.5 percent met the state's college ready criterion of 24 or higher (composite).
- For the Class of 2021, a total of $1,793 \mathrm{G} / \mathrm{T}$ students, or 76.9 percent, of the $2021 \mathrm{G} / \mathrm{T}$ graduating class took the SAT and 67.7 percent met the CCR Benchmarks for both Evidence-based Reading and Writing (ERW) (greater than or equal to 480) and math (greater than or equal to 530).
- To meet state mandates, a survey was administered during the 2020-2021 school year to parents of $\mathrm{G} / \mathrm{T}$ students to collect information regarding the identification and assessment process. A total of 465 parents provided feedback on the identification and assessment procedures for HISD out of 966 respondents, reflecting 48.1 percent of the total. The top category was Communication (33.1 percent) followed by Wait time was too long on the day of testing (14.6 percent), or results (12.7 percent).

## Recommendations

1. To ensure data quality, data validation measures should be implemented in PowerSchool for the Gifted Education Plan and the G/T Matrix in PowerSchool.
2. Due to data quality issues and the limitation of the Gifted Education Plan Report available in Power School, it is not possible to fully evaluate the Gifted Education Plan as an instructional tool or monitor its implementation.
3. Increase the level of district support so that it is possible to identify $\mathrm{G} / \mathrm{T}$ teachers, interface OneSource and PowerSchool to monitor and record G/T training, and identify the areas in which $\mathrm{G} / \mathrm{T}$ students are being served. As it stands, it is not possible to fully evaluate the professional learning component of the Texas State Plan.
4. Align the School Guidelines with Board Policy regarding the Gifted Education Plan so that all teachers of G/T students create a Gifted Education Plan.
5. Redesign the G/T Coordinator position to reflect administrative responsibilities so that G/T lesson plans can be submitted by G/T teachers to be evaluated and revised, teacher professional development can be tracked and planned, instructional support can be provided, and G/T students can be scheduled together in accordance with the Texas State Plan.
6. Since the Texas State Plan addresses Fidelity of Services using the Texas Performance Standards Project (TPSP), the district should monitor those students enrolling and completing the course as well as showcasing their advanced products. Consider using the TPSP experience as an additional strategy to identify underserved populations based on performance.
7. In accordance with TEC $\S \S 11.251-11.253$ of the Texas State Plan, incorporate provisions to improve services to gifted/talented students as well as the results of this evaluation in the district and campus improvement plans.
8. Ensure that all employees who make district-level decisions regarding the Gifted and Talented Program meet the professional development standards outlined in the Texas State Plan. Since the board of trustees of a school district has the responsibility to ensure that the district or school complies with all applicable state educational programs (TEC §7.028), it is recommended that Board Members pursue professional development on the Texas State Plan.
9. Ensure that a plan is in place to address areas that are out of compliance.

## Introduction

In the Houston Independent School District (HISD), Gifted and Talented (G/T) students are served through one of two program designs: Board-approved Vanguard Magnet or Gifted and Talented Neighborhood. The Gifted and Talented program ( $\mathrm{K}-12$ ) is designed to:

- Provide an array of learning opportunities commensurate with the abilities of G/T students and emphasize content in the core academic areas, as well as the areas of creativity, the arts, and leadership,
- Provide a learning continuum that is differentiated in depth, complexity, and pacing in the four core areas (reading/language arts, mathematics, social studies, and science),
- Provide services during the school day as well as the entire school year, and
- Provide program options enabling G/T students to work together as a group, work with other students, and work independently during the school day.

The Vanguard Magnet program is provided only in Board-approved schools, and entry into Vanguard Magnet programs is competitive. Application and assessment timelines coincide with district and Magnet guidelines. A centralized admissions committee reviews all applications and notifies the parents of their child's placement recommendation. In 2020-2021, the program served students at the following locations:

- Jewel Askew (K-4), Edna Carrillo, Lorenzo De Zavala, Gary Herod, Oak Forest, River Oaks, Theodore Roosevelt, William Travis, and Windsor Village elementary schools,
- Frank Black, Luther Burbank, Alexander Hamilton, and Bob Lanier middle schools,
- Thomas Horace Rogers School (K-8), and
- Andrew Carnegie Vanguard High School.

The Gifted and Talented Neighborhood program (K-12) is designed to provide services for G/T students at their neighborhood schools or for non-zoned G/T students on a valid transfer (other than Vanguard Magnet transfers) that meet the criteria for identification established by district guidelines. All qualified students are served in their Gifted and Talented Neighborhood program because there are no program enrollment goals or qualification distinctions (tiers) in the admission process. A Campus-Based Admissions Committee reviews the applications and notifies the parents of their child's placement recommendation. All G/T students on the campus are served in G/T classes with appropriately trained/qualified teachers.

According to The Texas Education Agency (TEA), kindergarten students need to be assessed, and if identified, provided G/T services. For entering kindergarten students that were assessed for the Vanguard program, parents who chose to decline the Vanguard program and enrolled their child in a G/T Neighborhood program, kept their G/T identification status. To address the different needs of the participating schools, decisions regarding the instructional delivery model are made at the campus level (Houston Independent School District, 2020a).

## Other Program/School Options

Other educational opportunities available to all students as well as those identified as G/T included:

- Montessori program Grades K-8,
- International Baccalaureate Primary Years Programme (IBPYP) Grades K-5,
- International Baccalaureate Middle Years Programme (IBMYP) Grades 6-10,
- Pre-International Baccalaureate (Pre-IB) Classes Grades 9-10,
- International Baccalaureate (IB) Degree Programme Grades 11-12,
- AP Spanish Language for Native Spanish Speakers Grade 8,
- Pre-Advanced Placement (Pre-AP) program Grades 6-10,
- College Board Advanced Placement (AP) program Grades 9-12,
- Dual Credit Grades 9-12, and
- Kinder High School for Performing and Visual Arts (Kinder HSPVA) Grades 9-12.

## Budget

The amount budgeted for the G/T Program for 2020-2021 was approximately $\$ 8,603,481$ (Houston Independent School District, 2020b). Expenditures for the program were at the discretion of the schools. The budgeted amount included salaries ( 57.6 percent), supplies and materials ( 37.9 percent), other operating expenses (2.6 percent), contracted services (1.8 percent), and capital outlay ( 0.1 percent).

Figure 1 compares district and state expenditures from 2016-2017 to 2020-2021 using the PEIMS Standard Financial Reports, Budgeted and Actual data. For 2020-2021, the expenditures reflect budgeted amounts rather than actual financial data. The program intent code identifies the cost of instruction and other services directed toward gifted and talented students. For 2020-2021, the budgeted amount for the district was $\$ 8,603,481$. Compared to actual expenses incurred in 2019-2020, the per student district and state allocations increased from $\$ 38$ in 2019-2020 to \$53 in 2020-2021 (39.5 percent increase) for the district and from $\$ 74$ in 2019-2020 to $\$ 83$ in 2020-2021 (12.2 percent increase) for the state.

Figure 1. Expenditures (Actual and Budgeted) by Program Intent Code 21, District and State

Sources: PEIMS Financial Standard Reports, Financial Actual Report, various years Note: $\pm$ For 2020-2021, the financial data reflects budgeted amounts rather than actual amounts for both state and district funds.

## Methods

## Data Collection and Analysis

Quantitative and qualitative data were collected from a variety of sources including student demographic databases, survey data, program documentation, professional development data files, and student performance data files. Basic descriptive statistics were employed to analyze the data. Appendix B (pp. 40-43) describes the methods used in detail.

## Data Limitations

For a detailed description of the limitations in using OneSource, AP Exam data, survey data, and the Public Education Information System (PEIMS) data files, see Appendix B, pp 42-43.

## Results

What program options were provided to G/T students during the 2020-2021 school year, and how did implementation compare to the G/T Standards?

- In HISD, 31,464 G/T students were served through two different program designs, Vanguard Magnet or Gifted and Talented Neighborhood. Out of 270 schools serving K-12 in HISD, 258 campuses identified G/T students based on Fall PEIMS Snapshot data. Of the 258 campuses with G/T identified students, 243 campuses offered a Gifted and Talented Neighborhood program (K-12) and 15 campuses offered a Vanguard Magnet program (K-12).
- For 2020-2021, 25,269, or 80 percent, of G/T students participated in the Gifted and Talented Neighborhood program (K-12) compared to 6,195 , or 20 percent, of G/T students who participated in the Vanguard Magnet program (Figure 2).

Figure 2. Number of G/T Students by Program Design, 2020-2021

$■$ G/T Neighborhood $\quad$ Vanguard Magnet
Source: Fall PEIMS Snapshot, 2020

- According to the Texas State Plan, G/T students served in the regular classroom need to work together as a group (minimum of 3) (Texas Education Agency, 2019). For 2020-2021, there were

108 campuses that identified fewer than three G/T students for at least one grade level. When comparing 2016-2017 to 2020-2021, there was an increase in the number of campuses that had fewer than three G/T students for at least one grade level from 96 to 108 (Figure 3, p. 7).

- In 2020-2021, there were 92 elementary schools, three middle schools, four high schools, and nine combined schools with fewer than three G/T students in one or more grade levels (Figure 3). A list of G/T enrollment by campus and by grade level, is provided in Appendix C, pp.44-49. From 20162017 to 2020-2021, there was an increase in the number of elementary schools, decreases in the number of middle and high schools, and no change in the number of combined schools with one or more grade levels with fewer than three students.

Figure 3. Number of Schools with Fewer than 3 G/T Students Identified for at Least One Grade Level, 2016-2017 to 2020-2021

Sources: Fall PEIMS Snapshot, 2016 to 2020
Note: SOAR center is not included in the Academic Level counts.

For the 2020-2021 school year, the Texas Education Agency required districts to submit the Gifted and Talented Program Code in October 2020. There were five programs: pull-out, push-in, full-time gifted only, full-time inclusion, and special day. In addition, campuses could also select no program was available. More than one option could be submitted. At the district-level, all five program types were selected, as well as no program was available. The Gifted and Talented Department collected the data by campus using a form. The results are summarized in Table A-2 (p. 25).

- Out of 316 responses, six campuses (1.9 percent) indicated they did not provide a program for gifted and talented students. Of the six campuses, all of them selected this as their only program code. These campuses included four early childhood centers, one middle school, and one high school.
- Thirty-one campuses ( 9.8 percent) indicated they used a pull-out program where a G/T student receives part-time services from a G/T trained teacher on a regular schedule in another classroom setting apart from their regular classroom.
- Thirty-four campuses (10.8 percent) indicated they used a push-in model where services were provided by a G/T trained teacher while the G/T student was in the regular classroom.
- Forty-eight campuses (15.2 percent) indicated they used a full-time gifted only model where services were provided by G/T trained teachers and all students in the classroom were identified as G/T.
- The highest number of campuses, 193 (61.1 percent), implemented a full-time inclusion model where $G / T$ students receive a majority of their core subjects from a G/T trained teacher, but the classroom is composed of peers who are not identified as G/T.
- Four campuses (1.3 percent) indicated they used a special day school model where the school is administratively separate from regular schools and is organized to serve G/T students with G/T trained teachers.

What evidence was there that the instruments and procedures for G/T identification met the standards in the Texas State Plan, and how will implementation of the G/T Standards continue to ensure equity of opportunity?

## GIT Enrollment

- For the 2020-2021 school year, a total of 31,464 students were identified as G/T compared to the district enrollment of 185,385 (Grades K-12). In 2006-2007, a total of 24,376 students were identified as G/T compared to the district enrollment of 186,907 . The $\mathrm{G} / \mathrm{T}$ percentage for the district has increased from 13.0 percent in 2006-2007 to 17.0 percent in 2020-2021 (Table A-3, p. 26).
- The G/T percentages increased from 2006-2007 to 2020-2021 at all grade levels except grades 2 and 3 , where $G / T$ percentages declined by 1.1 percentage points and 0.2 percentage point and grade 5 , which did not change.
- The increase in the percentage of $G / T$ kindergarten students for 2020-2021 reflects the implementation of a 4-year old assessment program for which entering kindergarten students from neighborhood schools were assessed in the spring of 2021. When these students enrolled in the district during the 2021-2022 school year, the students identified as G/T were coded on the PEIMS database for the fall and the schools received funding.
- The COVID-19 pandemic negatively impacted entering 4-year old G/T Neighborhood testing in spring 2020 because very few students had been tested at the time the district moved to virtual operations. In 2020-2021, the percentage of qualified 4 -year old students identified from G/T Neighborhood and magnet schools increased from 37.8 percent in 2019 to 42.6 percent in 2021 (Figure 4, p. 9).

Figure 4. Percentage of Assessed 4-year Old Students Entering Kindergarten who Qualified for the Gifted and Talented Program, 2017-2018 to 2020-2021

Sources: Entering Kindergarten file, Gifted and Talented Department; Magnet Applications Data file, 2020-2021; Gifted and Talented Program Evaluation, 2019-2020
Note: *Vanguard Magnet results include Qualified and Qualified Pending for 2020. G/T Neighborhood results were not available for 2020.

- The percentage of G/T students identified at the state level increased slightly from 7.8 percent in 2016-2017 to 8.3 percent in 2020-2021. Comparisons to the state include Early Childhood students in the enrollment counts. Therefore, the percentages are lower than those calculated using only kindergarten through grade 12 (Figure 5).
- The percentage of G/T students identified at the district level increased from 15.1 percent for 20162017 to 16.0 percent in 2020-2021. The G/T percentage for the district has consistently exceeded that of the state by more than 7 percentage points since 2016-2017 (Figure 5).

Figure 5. State and District Percentage of G/T Enrollment (Early Childhood included), 2016-2017 to 2020-2021

[^0]- African American students comprised 22.2 percent of the total HISD population in grades K-12 in 2020-2021. These students represent 11.3 percent of the G/T population reflecting an underrepresentation of African American students by 10.9 percentage points (Table A-4, p. 27).
- Hispanic students comprised 61.7 percent of the total HISD population in grades $\mathrm{K}-12$. These students represent 52.4 percent of the G/T population reflecting an underrepresentation of Hispanic students by 9.2 percentage points (Table A-4).
- While economically disadvantaged students comprised 77.6 percent of the total HISD population in grades K-12, these students represent 51.4 percent of the G/T population reflecting an underrepresentation of economically disadvantaged students by 26.2 percentage points (Table A4).
- Since 2006-2007, underrepresentation has decreased for African American, Hispanic, male, and Special Education students by at least one percentage point (Table A-4).
- African American and Hispanic students apply for Vanguard Magnet schools at disproportionately lower rates than they are represented in the HISD kindergarten and entering sixth grade populations (Table A-5, p. 28).
- For kindergarten applicants, 46 percent of African American and 31 percent of Hispanic students who were identified as G/T in 2020-2021, accepted and enrolled in an HISD school for the 20212022 school year. As of December 11, 2022, 99 percent of Asian and 95 percent of Hispanic Kindergarten students who accepted and enrolled in the district were identified as G/T in the Student Information System (Table A-6, p. 29).
- For sixth grade, 47 percent of African American and 61 percent of Hispanic students who were identified as G/T during the universal assessment in 2020-2021, accepted and enrolled in an HISD school for the 2021-2022 school year. As of December 11, 2021, 100 percent of African American, 100 percent of Asian, 98 percent of Hispanic, 97 percent of White, and 95 percent of students who identified as two or more races, accepted and enrolled in the district were identified as G/T on the Student Information System (Table A-6).
- When comparing the racial/ethnic percentages of G/T students in the Vanguard Magnet program only with those districtwide, the data indicate that Hispanic and African American students are underrepresented in the program as a whole; whereas White and Asian students are overrepresented (Table A-7, p. 30).
- When examining the racial/ethnic composition of G/T students by Vanguard Magnet school, the percentage of African American students ranged from 1.3 percent at De Zavala Elementary School to 44.8 percent at Windsor Village Elementary School. For Hispanic students, the percentages ranged from 13.8 percent at T.H. Rogers ES/MS to 97.5 percent at De Zavala Elementary School. The percentage of White students ranged from 0.0 percent at De Zavala and Windsor Village elementary schools to 63.1 percent at Travis Elementary School, while the percentage of Asian students ranged from 0.0 percent at Burbank Middle School to 54.2 percent at T.H. Rogers ES/MS (Table A-7).
- A total of 33.7 percent of the Vanguard Magnet students were economically disadvantaged, although this figure varied across campuses from a low of 6.1 percent at Travis Elementary School to a high of 92.8 percent at Burbank Middle School (Table A-7).
- Comparison based on demographic characteristics of the G/T student population of the district to the state shows similar patterns of inequity for African American, Hispanic, and economically disadvantaged students for the 2020-2021 school year. There is an overrepresentation of Asian and White students and an underrepresentation of African American, Hispanic, and economically disadvantaged students for both the district and the state (Figures 6A and 6B).
- Compared to the state, HISD falls within 2 percentage points when comparing the differential for Asian and White students for 2020-2021; the district's differential for Hispanic students is lower than that of the state by 2 percentage points, and the district's differential for economically disadvantaged and African American students exceeds the state by 4 percentage points and 5 percentage points, respectively (Figure 6B).

## State of Texas Assessments of Academic Readiness (STAAR)

Achieving the Masters Grade Level Standard on the STAAR reflects one of the five ways a student may be nominated for G/T identification. The STAAR assessments are criterion-referenced exams aligned with the Texas Essential Knowledge and Skills, which are the state curriculum standards. For 2021,
participation rates were lower due to COVID-19 (Tables A-8A to A-10B, pp. 31-33). Figure 7 summarizes the percentage of G/T students in grades $3-8$ scoring at the Masters Grade Level Standard on the STAAR English reading, mathematics, writing, science and social studies exams for 2021. Figure 8 summarizes the percentage of G/T students in grades 3-5 scoring at the Masters Grade Level Standard on the STAAR Spanish reading, mathematics, writing, and science exams.

- The percentage of G/T students who met the Masters Grade Level Standard on the STAAR English and Spanish assessments for reading, mathematics, writing, social studies (English only), and science decreased for all subjects when comparing 2019 to 2021 (Figure 7 and Figure 8).

Figure 7. English G/T STAAR 3-8 Results, Masters Grade Level Standard, 2021

Sources: Cognos STAAR 3-8 Extract, 4/21/2022
Note: Excludes Alternate 2 results.

Figure 8. Spanish G/T STAAR 3-8 Results, Masters Grade Level Standard, 2021

[^1]- Figure 9 summarizes the percentage of G/T students scoring at the Masters Grade Level Standard on the STAAR EOC exams. When comparing 2019 to 2021, student performance decreased in the percent of G/T students meeting the Masters Grade Level Standard in all subjects (Table A-10A and $A-10 B$ ).
- For 2021, first-time G/T testers on the STAAR End-of-Course exams scored 40 percent in Algebra I, 49 percent in biology, 37 percent in English I, 33 percent in English II, and 71 percent in US History at the Masters Grade Level Standard of performance.

Sources: Cognos STAAR 3-8 Extract, 4/21/2022
Note: Excludes Alternate 2 results.

What evidence exists to document positive student performance trends for students participating in the gifted program?
According to the Texas State Plan, evidence to support long-range evaluation of services can be measured through the Texas Performance Standards Project. Other long-term measures include G/T students earning AP Scholar Awards, AP Capstone Diploma, and AP Seminar and Research Certificates, IB Certificates, and IB Diplomas.

## Advanced Placement

- The number of G/T high school students taking AP tests increased by 100.1 percent from 2,974 in 2007 to 5,952 in 2021, and the percentage of G/T students taking AP tests increased by 15 percentage points from 38.7 percent in 2007 to 53.6 percent in 2021 . The number of G/T students taking AP tests increased by 4.2 percent from 2019 (Appendices D-1 and D-2, pp. 50-51 and Figure 10, p. 14).

Figure 10. Number of G/T High School Students Taking AP Exams and Participation Rates, 2007 to 2021

Sources: College Board AP data file; 9/9/2021; HISD Research and Accountability, Gifted and Talented Program Evaluation, 2019-2020
Note: $\mathrm{N}=$ number of $\mathrm{G} / \mathrm{T}$ students taking at least one AP test. $\mathrm{G} / \mathrm{T}$ identification code was missing for 45 students. Due to COVID-19, 2020 AP Exam results are not comparable with subsequent or previous years.

- When comparing AP results prior to the implementation of the HISD G/T Standards in 2007 to 2021, the participation rates have increased from 38.7 percent to 53.6 percent, but the AP exams scoring three or higher have decreased ( 57.0 percent in 2007 to 50.8 percent in 2021) (Appendices D-1 and $\mathrm{D}-2$, pp. 50-51 and Figures 10 and 11).
- For 2021, a total of 12,867 Advanced Placement (AP) exams were taken by 5,952 G/T high school students and 50.8 percent of the scores were three or higher on a scale of one to five, a decrease of 6.1 percentage points from 2019 (Appendix D-2 and Figures 10 and 11, p. 15).

Figure 11. Number and Percentage of High School G/T AP Exams Scored 3 or Higher, 2007 to 2021

Sources: College Board AP data file; 9/9/2021; HISD Research and Accountability, Gifted and Talented Program
Evaluation, 2019-2020
Note: N=number of G/T students taking at least one AP test. G/T identification code was missing for 45
students. G/T enrollment rates reflect only enrollment for schools participating in AP testing.
Due to COVID-19, 2020 AP Exam results are not comparable with subsequent or previous years.
Table A-11 (p. 34) summarizes the number of G/T high school students who earned an AP Award, the type of award, along with a description of the criteria needed to earn each award for 2021. Students could earn more than one award, and the awards reflect cumulative testing results. In the 2021 school year 1,534 G/T students earned at least one AP Award and earned 1,691 awards in total. The highest number of students earned an AP Scholar Award ( $\mathrm{N}=688$ ). To earn this distinction, a student needed to receive scores of 3 or higher on three or more AP Exams. This was followed by $578 \mathrm{G} / \mathrm{T}$ students who earned the AP Scholar with Distinction and 265 G/T students who earned the AP Scholar with Honor. One hundred thirty-one students earned the AP Capstone Diploma, and twenty-nine students earned the AP Seminar and Research Certificate.

## International Baccalaureate (IB)

- In 2021, due to the spread of COVID-19, the district chose the non-testing option. Grades were based on the IB assigned internal assessment that was externally evaluated, predicted grades, and historic data. Five hundred and forty HISD G/T students received results for a total of 1,657 International Baccalaureate (IB) examinations, where 74.4 percent scored a four or higher on a scale from one to seven. This reflects a decrease in participation of 60 students from 2020, but an increase in the number of exams scoring four or higher (Table A-12, p. 35 and Figure 12).
- For 2021, 33 Bellaire, 10 Chavez, 35 Heights, and 86 Lamar high schools' G/T students earned an IB diploma. The number of G/T students earning an IB diploma increased districtwide from 113 in 2020 to 164 in 2021. Chavez High School produced their first diplomates in 2019 (Table A-13, p. 36).
- For 2021, Chavez, Lamar, and Heights high schools offered students the opportunity to earn a Career-related Programme diploma (CP). The CP curriculum was designed for students interested in career-related education. Districtwide, out of 145 Candidates, 49 students completed the Careerrelated Programme in 2021 reflecting an increase from 2020. For G/T students in 2021, 19 out of 50 candidates completed the Career-related Programme (Table A-13).

Figure 12. Percentage of IB Tests Taken by G/T Students Scored at 4 or Higher, Spring 20152021

Sources: International Baccalaureate Organization Candidate Results, 2021; Gifted and Talented Evaluation Report, 2019-2020 $N=$ Number of Exams taken by G/T Students across all 3 schools. Chavez High School began IB testing in 2019.

## PSAT, ACT, and SAT

- On the fall 2020 PSAT results for eleventh grade, 1,846 (72.9 percent) of G/T students took the PSAT, and a total of 1,294 (70.1 percent) met both College and Career Readiness (CCR) Benchmarks. (Appendix E, p. 55 and Figures 13A and 13B, p. 17).

Figures 13A and 13B. G/T $11^{\text {th }}$ Grade Participation and Performance on the PSAT (Fall 2020), ACT, and SAT, 2021

Figure 13A. Participation

Figure 13B. Performance

Sources: PSAT data file, 4/7/2021; ACT data file, 2021; SAT data file 2021; Graduation data file, 2020-2021; SIS data files; PEIMS Fall Snapshot, 2020
Notes: ERW=Evidence-based Reading and Writing

- A total of $288 \mathrm{G} / T$ students ( 12.4 percent) from the $2021 \mathrm{G} / T$ graduating class took the ACT and 79.5 percent met the criterion established by the state of 24 or higher (composite average) (Appendix F-1, p. 53 and Figures 13A and 13B).
- For the $2021 \mathrm{G} /$ T graduating class, the high schools with at least five testers had a mean composite score higher than the CCR composite criterion (Appendix F-1).
- A total of $1,793 \mathrm{G} / \mathrm{T}$ students ( 76.9 percent) from the $2021 \mathrm{G} / \mathrm{T}$ graduating class took the SAT and 67.7 met the CCR Benchmarks for both ERW ( $>=480$ ) and Math ( $>=530$ ) (Appendix F-2, p. 54 and Figures 13A and 13B).

## Graduates and Gifted Educational Plan (GEP)

- Using a four-year longitudinal cohort methodology for the Class of 2020, 97.4 percent graduated, 0.6 percent continued in high school, 0.2 percent received the Texas Certificate of High School Equivalency, and 1.9 percent dropped out of school (Table A-14, p. 37). The percentage of G/T students that graduated decreased by 0.5 percentage point, and the percentage of G/T students that dropped out increased by 0.2 percentage point compared to the previous year.
- On January 14, 2016, the HISD Board originally approved the addition of the Gifted Education Plan (GEP) as a G/T Standard. For the 2020-2021 school year, GEPs were completed for 19,622 students or 62.4 percent of the district's G/T students (Table A-15, p. 37).
- Due to data quality issues in PowerSchool, it was not possible to fully evaluate the Gifted Education Plan as an instructional tool or monitor its implementation.

What evidence indicated that personnel involved in the Gifted and Talented Program met the standards of the Texas State Plan regarding professional learning and certification?

## Professional Learning

There currently is not a centralized system in place that identifies G/T teachers. The campus G/T Coordinator must identify which staff members are providing instruction to G/T students, and, thus, must complete G/T training. For the 2020-2021 school year, the Gifted and Talented Department established a method for identifying and tracking G/T professional learning. Campus G/T Coordinators were required to track G/T training of teachers and administrators using an Excel spreadsheet and provide the evidence (i.e., certificate) that the training had been completed. These documents were uploaded onto HISD's Google Drive. The training was monitored by the Gifted and Talented Department. The timeline for completing training and uploading the documents started on September 8, 2020, and ended on December 7, 2020. Not all campuses completed the documentation for the 2020-2021 school year.

All G/T training provided by the district's G/T Department fulfills the state mandates. Teachers who provide instruction to G/T students are required to complete an initial 30 hours of training within one semester of their teaching assignment. This foundational training includes topics such as the nature and needs of G/T students and identification and assessment of G/T students. In subsequent years, teachers who provide instruction and services as part of the district's G/T program must receive a 6-hour annual update related to state teacher G/T education standards.

Advanced Placement (AP) and International Baccalaureate (IB) training fulfills state mandates for some required elements of the initial G/T training. A teacher completing the initial 30 hours of training can use 18 hours of AP or IB credit in addition to 12 hours of training related to other required topics. Any teacher may take AP or IB professional learning courses, not just teachers providing instruction to G/T students. Therefore, the AP and IB training will include teachers districtwide.

- For the 2020-2021 school year, the professional learning component of the state plan could not be fully evaluated since it was not possible to identify which teachers provided instruction to G/T students or to automatically track G/T professional learning seamlessly.
- For 2020-2021, a total of 11,762 educators (unduplicated) completed at least one G/T professional learning course (Appendix G, p. 55).
- For 2020-2021, 23,339, educators (duplicated) completed one or more of the $33 \mathrm{G} / \mathrm{T}$ professional learning opportunities offered (Appendix G). The 33 courses exclude any courses for which educators would not receive $\mathrm{G} / \mathrm{T}$ credit, such as monthly coordinator meetings.
- For 2020-2021, a total of 7,825 educators completed six or more hours of G/T professional learning courses meeting the annual state mandate, and 1,718 educators completed 30 or more hours (Appendix G).
- For 2020-2021, a total of 1,348 educators (unduplicated) completed at least one AP or IB professional learning course (Appendix H, p. 59).
- For 2020-2021, a total of 2,660 educators (duplicated) completed at least one AP or IB professional learning course (Appendix H).
- For 2020-2021, a total of 679 educators completed six or more hours of AP or IB professional learning courses meeting the annual state mandate, and 5 educators completed 18 or more hours (Appendix H).

To what extent did the district encourage community and family participation in services designed for $G / T$ students?

- The G/T Expo at the district-level was held virtually for the 2020-2021 school year. Moreover, this year's $\mathrm{G} / \mathrm{T}$ Expo winners were selected, and their winning videos were available to watch.
- For the Student Assessment Component on the Texas State Plan, the district conducts a universal assessment in kindergarten and fifth grade for students who are not identified as G/T and uses both quantitative and qualitative measures for identifying students; however, the district is not fully aligned with the program services offered and the assessments administered.

## Parent Survey

According to the Texas State Plan, parent and community input is solicited annually regarding identification and assessment procedures. A total of 1,836 parents of students who were assessed during the 2020-2021 school year were surveyed and 966 were returned, yielding a response rate of 52.6 percent.

Rate your level of agreement with each statement regarding HISD's G/T identification process on a scale of 1 (Strongly Disagree) to 5 (Strongly Agree).
Figure 14 (p. 20) shows how respondents perceived the identification and assessment process.

- The item with the highest average score was: There was sufficient time to complete the application process (3.9).
- The G/T identification process was clear to me was the statement that received the lowest average score (3.0).

Figure 14. Perceptions of the G/T Identification and Assessment Procedures, 2020-2021

Source: SurveyMonkey, G/T Parent Data files, 5/3/2021
Note: For responses that are more than 5 percentage points different for the Agree/Strongly Agree rating, the bars are shaded darker for the category with the higher score.

## Do you have any feedback on the identification and assessment procedures for HISD?

Table A-16 (pp. 38-39) summarizes the emergent categories for parent feedback on the identification and assessment procedures for HISD. A total of 465 respondents provided at least one response out of 966 respondents, reflecting 48.1 percent of the total. The top three categories centered on "communication" (33.1 percent), "wait time was too long on the day of testing" (14.6 percent), and "results" (12.7 percent).

## Discussion

Since the G/T Standards were implemented fourteen years ago, the implementation of the HISD Gifted and Talented Program has varied across the district from the program design, rigor, opportunities to work with G/T peers, strategies for serving G/T students, to curriculum and instruction, professional development, and communicating with parents about program implementation. The district conducts two universal assesments for students who are not already identified as $G / T$, one in kindergarten and one in fifth grade. This is a program strength as there are not gatekeepers for identification. Moreover, the district revised the G/T matrix to allow students to qualify for services based on ELA, math, or both, permitting more students to qualify and be served for their specific area of giftedness.

Although program services offered are not fully aligned to the assessments, there is a plan in place to investigate creativity and leadership assessments during the 2022-2023 school year. With the revision in the G/T Matrix, students identified for ELA services will also be served in social studies, and students identified for math services will also be served in science.

During the 2021-2022 school year, the Gifted and Talented Department piloted the Scales for Identifying Gifted Students and compared the results with the current teacher rating scale. After scoring the SIGS
and comparing it to the HISD Teacher Recommendation, they did not see any significant advantage to using the SIGS over the current Teacher Recommendation (R. Ricca, personal communication, April 25,2022 ).

With the implementation of PowerSchool, data quality issues have emerged since there were no data validation rules in place. Furthermore, G/T data updates from PowerSchool Special Programs did not flow back into PowerSchool as it should. These issues have not been resolved to date. From a programmtic perspective, it is difficult to identify a G/T student with or without a GEP due to the data quality issues. The expression, "garbage in-garbage out" applies to the poorly entered data. Moreover, the G/T indicator flag on PowerSchool has been manually updated; however, it is imperative to resolve the programming issue so that updates occur seamlessly in the future.

The district developed HISD's Vanguard G/T Standards in 2007 that were aligned to the Texas State Plan to ensure that highly able students were identifed and served and to provide consistency regarding implementation across schools. These standards have been modified over the last fourteen years of implementation. With the creation of a new Texas State Plan for the Education of Gifted and Talented Students, the district needs to be proactive in ensuring that state standards are met or that a plan is in place with action steps on how to meet the new standards. Although a 3-year plan has been put into action, the level of district support falls short. For example, focus groups and meetings were held prior to the implementation of HISD Connect so that the needs of the department could be met, however, it is not possible to identify G/T teachers, interface OneSource and HISD Connect to monitor and record $\mathrm{G} / \mathrm{T}$ training or identify how students are being served. With the new systems in place, this process should be automated to ensure data accuracy, timeliness, and compliance with the mandates outlined in the Texas State Plan.

Student outcome measures by campus indicate that program implementation is inconsistent and the rigor of the program varies widely throughout the district. There are campuses that have not identified a critical mass of G/T students on their campus (i.e. less than three at a grade level), and some that schedule the G/T students so that they do not have an opportunity to work with their peers. At the secondary level, gifted and talented students are primarily served through taking Pre-AP/AP and PreIB/IB courses. Since the rigor of these courses varies across the district, a better monitoring system needs to be developed with formative feedback on rigor, training, scheduling, and assessments available to campuses so that $\mathrm{G} / \mathrm{T}$ students are being equitably served.

A plan to provide targeted professional learning was put in place during the 2019-2020 school year with the addition of four new courses. The number of teachers and/or administrators completing these courses for the 2020-2021 school year was among the highest: G/T Administrators Nature and Needs with Service Options + Social and Emotional Needs of G/T students (6-hour course, N=679), Differentiation for Gifted Learners (6-hour course, N=2405), You Might have a G/T Student (online course available to parents and required for all HISD teachers, $\mathrm{N}=10,256$ ), and Texas State Plan Orientation (online course required for all new to HISD teachers as mandated in the Texas State Plan, $\mathrm{N}=1,671$ ).

By taking these courses, especially You Might have a G/T Student, teachers will learn to identify the characteristics of typically underserved populations (Slocumb \& Olenchak, 2006). The district should also consider adminstering the full-battery of the CogAT since each student receives a CogAT Ability Profile which provides instructional strategies for student success that can be part of a student's Personalized Gifted Education Plan.

Over the past five years, the percentage of students identified as G/T in HISD (15.1 percent in 20162017 to 16.0 in 2020-2021) and the state ( 7.8 percent in 2016-2017 to 8.3 percent in 2020-2021) has increased. District G/T percentages have exceeded state G/T percentages over the past five years, with the largest differential occurring for the following school years: 2017-2018 and 2018-2019 (7.8 percentage points). These data indicate that the district has an overrepresentation of students in the Gifted and Talented Program, especially when previously published state documentation established that districts should have between three and eight percent of the students identified as G/T (Texas Education Agency, 2002). Moreover, according to the National Association for Gifted Children (NAGC, n.d.), approximately six to ten percent of U.S. children in grades $\mathrm{K}-12$ are gifted.

According to the Texas Education Agency's study, Equity in Gifted Education, (Slocumb \& Olenchak, 2006, p. 8), "equity exists when the various population groups are reflected in the same proportions as they are represented in the larger population." Therefore, if 60 percent of the district's population is comprised of Hispanic students, then 60 percent of the identified G/T students should be Hispanic. Based upon this research, African American and Hispanic students are underrepresented and White and Asian students are overrepresented. If socioeconomic status is taken into account, all of the racial/ethnic groups that are disproportionately economically disadavantaged are underrepresented. However, since 2006-2007, underrepresentation has decreased for African American, Hispanic, male, bilingual, economically disadvantaged, and special education students. Moreover, the gap has narrowed for White students.

Program personnel should decide what $G / T$ services need to be offered and select appropriate assessement instruments to identify those students. Consideration should be given to providing G/T students in poverty with language development services. One size does not fit all in terms of G/T services offered (Slocumb \& Olenchak, 2006).

The Department of Research and Accountability has conducted an annual evaluation of the Gifted and Talented Program for the past eighteen years (Department of Research and Accountability, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019). Data collected from previous evaluations have been used at the administrative and campus levels.

The district continues to move in a positive direction with regard to Family-Community Involvement with the expansion of the Texas Performance Standards Project (TPSP), the continuation of the G/T Expo, and the use of Renzulli Learning. Moreover, the planned changes in the program regarding retaining the $\mathrm{G} / \mathrm{T}$ designation in fifth grade, expanding content areas in which gifted students can receive support, and developing Personalized Gifted Education Plans are promising steps. The Gifted and Talented Program provides the educational foundation for our future leaders. However, for the program to reach its full potential, state, district, and school-level support are essential. The commitment on the part of the district to support a program that challenges students reaffirms their strategic intent, which is to make HISD the educational system of choice.

Note: Applicants applying for the 2021-2022 school year include only those using the on-line system. Applicants reflect an unduplicated count of students. Qualified applicants were identified as Qualified or Waitlist Retired. Accepted applicants were Accepted (Accepted) and Confirmed (Yes). Percentages may not add up due to rounding. There were 275 Kindergarten applicants and 28 Sixth grade applicants without an HISD ID. These students were not included in the enrolled calculations.
*Scores not reported for less than five students. - - denotes no data.

## Appendix B Methods

## Data Collection

Student data were obtained using a variety of sources. For the current academic year, demographic and enrollment data for G/T students were extracted from the PEIMS and SIS databases. Race was extracted from the fall PEIMS snapshot using the original PEIMS ethnicity discrete categories for comparability to previous years. The program description, entry procedures, and student eligibility criteria were extracted from the current HISD School Guidelines (Houston Independent School District, 2020a). Additional documentation including data for the Entering Kindergarten Assessment Program, PEIMS Coding, Professional Development Course listings, G/T Expo, Gifted Education Plan, and student performance data, was provided from the Director and specialists in the Gifted and Talented Department.

Information with respect to training in HISD was provided by the Department of Human Resources Information Systems (HRIS) from July 1, 2020, to June 30, 2021. The HRIS database had the capability to track employee professional development on the individual level, including attendance and completion for each training session. The Gifted and Talented Department provided a list of G/T courses.

The percentage of G/T students in the district and the state was extracted from the PEIMS Standard Reports, Student Program and Special Populations Reports from 2013-2014 to 2020-2021 (Texas Education Agency, 2021, 2020, 2019a, 2018, 2017, 2016, 2015, and 2014). Texas Enrollment was calculated from the Enrollment in Texas Public Schools, 2020-2021 report published by the Texas Education Agency (TEA) (Texas Education Agency, 2020b).

District and state budget information was extracted from the PEIMS Financial Standard Reports and HISD's Budget Book.

## Academic Performance

Advanced Placement (AP) test performance data for 2020, along with demographic information were reported to HISD for each participating campus by the College Board via an electronic data file on September 9,2021 . The file was provided with the G/T indicator. Students who were missing the G/T indicator were not included in the analysis ( $\mathrm{N}=33$ ). AP Scholar information was extracted from the AP data files downloaded from the College Board's website.

Performance data of HISD students on IB examinations and diplomas awarded were obtained from International Baccalaureate (IB) score reports. Participation and performance were reported by district and school. For the district and individual schools, the number and percent of students scoring a four or better were reported along with the number of diplomates earned.

PSAT performance data for 2020 and the Fall PEIMS Snapshot, 2020 with enrollment for eleventh grade students were extracted to analyze the number and percent of eleventh grade students who tested and met the college and career readiness benchmarks on the ERW ( $>=460$ ) and mathematics ( $>=510$ ) tests. The methodology for calculating the College and Career Readiness (CCR) Benchmarks was revised by the College Board in 2015. SAT and ACT data for 2020-2021 were extracted from student test files as well as 2020-2021 graduation data. The number and percent of G/T test-takers, and the number and percent of G/T students scoring a 1180 or higher on the total score or meeting both CCR benchmarks (ERW >=480 and mathematics $>=530$ ) on the SAT and/or a 24 or higher composite on the ACT or meeting the individual CCR

## Appendix B (Continued)

benchmarks (English $>=18$, reading $>=22$, mathematics $>=22$, and/or science $=23$ ) and/or all four CCR benchmarks were analyzed to determine participation and performance.

## Survey Data

Survey items were developed from previously administered gifted and talented surveys and from input by stakeholders. Drafts of the surveys were reviewed by various stakeholders, and their comments were taken into account for the final versions. The surveys were then piloted, and the additional revisions were incorporated into the final surveys. Surveys were disseminated electronically to parents of Vanguard Magnet applicants who met all of the following conditions:

1. Provided an email address to the Department of School Choice and
2. Had at least one child assessed,
3. Had a total G/T matrix score value, and
4. Had a "Not Qualified" or "Qualified" designation on the G/T matrix

All parents were sent the survey in English. Students who were assessed were matched to their home language using the Fall PEIMS Snapshot, 2020. Parents of a student whose home language was Spanish, Arabic, or Vietnamese were sent an additional survey in the corresponding language with instructions to provide feedback on only one survey.

Two reminders were sent directly to any parents who had not completed the survey before it closed. Parent G/T Surveys opened on Tuesday, March 9, 2021, and closed on Monday, May 3, 2021.

## Data Analysis

Basic descriptive statistics were employed to analyze the data. For enrollment by grade level and campus, frequencies were calculated. For survey items, the responses for each category were tabulated and/or percentages calculated. Due to rounding, some totals may not equal 100 percent. HISD and state policy is not to report grouped scores for fewer than five students. The parent response rates were calculated by the total number of emails sent less any that were not delivered. A total of 1,836 parent surveys were disseminated and 966 were returned, yielding a response rate of 52.6 percent. For the open-ended questions, translation services provided translations. All open-ended responses were grouped into emergent categories.

G/T participation rates in AP testing for each campus were calculated by dividing the number of G/T students tested by the G/T PEIMS enrollment for grades 9-12. AP/IB performance was calculated by dividing the number of G/T AP/IB test-takers scoring a three/four or higher by the total number of G/T AP/IB tests taken.

G/T PSAT participation rates for each campus were calculated by dividing the number of G/T students tested by the G/T PEIMS enrollment for grade 11. Performance on the PSAT was measured by dividing the number of G/T students meeting the CCR ERW and Mathematics Benchmarks (ERW >=460 and Mathematics $>=510$ ) by the total number of G/T students tested in grade 11.

SAT and/or ACT participation was analyzed by using an unduplicated count of G/T ACT and/or SAT testtakers and dividing by the G/T graduates for that year. SAT performance was measured using the College Board benchmarks. For the SAT, the number of students meeting the College and Career Benchmarks for both the Evidence-based Reading and Writing ( $>=480$ ) and Mathematics ( $>=530$ ) was divided by the total
number of $G / T$ students tested. For the $A C T$, the number of students meeting the composite score of 24 or higher was divided by the number of $\mathrm{G} / \mathrm{T}$ students tested.

Due to the COVID-19 pandemic, the State of Texas Assessments of Academic Readiness (STAAR) Grades 3-8 and the State of Texas Assessments of Academic Readiness End-of-Course (EOC) Exams were not administered in 2020, so comparisons were made looking at 2021 and 2019 performance.

Four-year longitudinal completion rates were calculated using the 2015-2016, 2016-2017, 2017-2018, 2018-2019, and 2019-2020 data files. The data files were then matched to the student information demographic files and PEIMS files to include G/T status. Students without a G/T indicator were not included in the analysis. The denominator consisted of the following students: graduated, dropped out, received Texas Certificate of High School Equivalency, and continued in high school. Each category was divided by the denominator to calculate a rate.

## Data Limitations

Using the PEIMS database presents an undercount of identified students because students identified after the PEIMS fall snapshot date are not included. For example, HISD conducts a universal assessment for identifying G/T students in kindergarten. Once identified, they must be served by March 1st. The results of the assessment falls after the PEIMS fall snapshot date. However, the identified students are coded as G/T using the Student Information System (SIS). It is important to use both PEIMS and SIS to gain a holistic understanding of the G/T program.

Limitations exist since some professional development activities were not tracked by the district because campuses may have hired their own trainer, or teachers may have attended training the AP Summer Institute at Rice University, and the training was not recorded by the district, resulting in an undercount.

Distribution of the survey using only an electronic format may have precluded families that did not have a web-enabled device, internet, or email address to participate. Although every parent that was issued an invitation had a child assessed during the 2020-2021 school year, 101 parents disqualified themselves by responding that they did not have a child assessed during the 2020-2021 school year. There was a delay in mailing out the matrix results so that some parents may not have known whether their child qualified to receive G/T services when they took the survey. Therefore, a response option was added on March 23, 2021, to the question about whether their child qualified for G/T services, I have not received the testing results. Parents with a 4-year old in a G/T Neighborhood school were not surveyed due to lack of contact information.

On the Gifted and Talented PEIMS Coding-Program Code Spreadsheet, if duplicate data were submitted, the latest version was used in the analysis.

Due to the COVID-19 pandemic in 2021, students had the opportunity to take AP exams online or in school. There was no modification regarding the format or content for 2021; however, the administration windows were expanded for the health and safety of participating students. Comparisons to the previous year should be made with caution: 1). students could only take the exams at home remotely 2 ). The content was modified and covered topics that were taught through March 3, 2021, 3). HISD students experienced submission errors or other issues that may have prevented them from completing the exams.
For 2020, entering kindergarten testing for G/T Neighborhood students was negatively impacted by COVID19 since testing did not take place after the district stopped face-to-face instruction in March. For 2021, G/T Neighborhood students were assessed.

Data quality errors existed in the Gifted Education Plan (GEP) data file provided by the G/T Department. These encompassed the GEP Team Meeting, the Implementation, and the Completion. Moreover, the fields denoting what area of giftedness along with the teacher's statement about how the student's needs were met was not included in the data provided due to the implementation of a new Student Information System.

Due to the global COVID-19 pandemic, all 2019-2020 STAAR assessments were canceled. For Spring 2021, the Texas Education Agency (TEA) allowed students engaged in remote learning to opt-out of STAAR testing without penalty as all testing during the Spring 2021 administration was required to be done in person. These decisions impacted participation. Therefore, comparisons between Spring 2019 and Spring 2021 STAAR assessment results should not be made (Research and Accountability, 2021a \& 2021b). Moreover, fewer students needed to take the EOC assessment in subsequent administrations since they received EOC assessment waivers for successfully completing the corresponding course during the 2019-2020 school year. (Research and Accountability 2021b).

Sources: 2007 College Board Data file extracted 9/18/2007; Fall PEIMS Snapshot: 2006-2007 enrollment data and G/T status.
Note: Bellaire and Lamar also offer the International Baccalaureate program. G/T Identification code was missing for 51 students in 2007. HISD 912 and G/T enrollment reflects only enrollment for schools participating in AP testing. There were $59 \mathrm{G} / \mathrm{T}$ students from 9 campuses that did not participate in AP testing.
$\pm$ Totals not reported because two schools tested less than five students.
*Scores not reported for less than 5 students.

Sources: 2021 College Board Data file extracted 9/9/2021; PEIMS Fall Snapshot, 2020.
Note: Bellaire, Heights, and Lamar also offer the International Baccalaureate program. HISD 9-12 and $\mathrm{G} / \mathrm{T}$ enrollment reflects only enrollment for schools participating in AP testing. There were 33 students without a G/T code and were excluded from analysis. <> Ninth grade students attributed to a middle school campus by the College Board. *Scores not reported for less than 5 students.

Note: A College Readiness (CR) benchmark score is the minimum score needed on an ACT subject-area test to indicate a $50 \%$ chance of obtaining a B or higher or about a $75 \%$ chance of obtaining a C or higher in the corresponding credit-bearing college courses. ACT College Readiness Benchmarks are 18 in English, 22 in Math, 22 in Reading, and 23 in Science. *Scores not reported for less than 5 students tested; --No data

Sources: SAT data file, 2020-2021; Graduation file, 2020-2021
Note: The criterion score as defined by the College Board (CB) is a score that is greater than or equal to a 480 on the ERW section and greater than or equal to a 530 on the math section. The TAPR score for college readiness is a total score >=1180. Middle College HS-Gulfton had $2 \mathrm{G} / \mathrm{T}$ graduates with no one that tested on the SAT. They are included in the total number of G/T graduates.
*Scores not reported for less than 5 students. - -No data

## Appendix G

| Course Description | Credit Hours | N Completing |
| :---: | :---: | :---: |
| GT_30 Hour Foundational Training PK-12 | 30 | 1,706 |
