

## MEMORANDUM

April 9, 2018

TO: Board Members

FROM: Grenita Lathan  
Interim Superintendent of Schools

SUBJECT: **PSAT 8/9 & PSAT/NMSQT Fall 2017**

CONTACT: Carla Stevens, 713-556-6700

This report analyzes the participation and performance of Houston Independent School District (HISD) students who took the fall 2017 administration of the Preliminary SAT for students in grades eight and nine (PSAT 8/9) and the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT) assessments offered by the College Board. In 2015–2016, the College Board redesigned the PSAT/NMSQT and introduced the PSAT 8/9 for the first time.

Key findings include:

- HISD participation rates on both PSAT 8/9 and PSAT/NMSQT remained the same or increased from 2015 to 2017.
- In 2017, 83 percent of HISD eighth grade students and 81 percent of ninth grade students took the PSAT 8/9.
- In 2017, 83 percent of tenth grade students and 81 percent of eleventh grade students took the PSAT/NMSQT.
- Mean math scores were higher than Evidence-Based Reading and Writing (ERW) scores on both assessments.
- Decreases were seen in the percent of students meeting College and Career Readiness (CCR) Benchmarks compared to last year, with the exception of grade 8 in mathematics where the results were comparable.
- Performance on the fall administration of the PSAT 8/9 and the PSAT/NMSQT may have been adversely impacted by Hurricane Harvey, especially since the test was administered on October 11, 2017, and the majority of students had been back to school for only four weeks.

## **ADMINISTRATIVE RESPONSE**

### **College Readiness Office**

While the district experienced lower participation rates and scores on the 2017 administration of the PSAT, it also recognizes that the majority of students had only returned to school four weeks since Hurricane Harvey. The impact of this natural disaster on students' and families' emotional and financial well-being cannot be understated, and this may have impacted 2017 results. In the 2017-2018 school year, the Office of College and Career Readiness has implemented a number of initiatives to increase awareness of the importance of these exams, and tools to prepare, including:

- The district pays for students to take the PSAT in grades 8 through 11, which allows students and schools to use scores over time to prepare for the PSAT/National Merit Scholarship Qualifying Test in the 11th grade. The district also pays for all juniors to take the SAT during the school day, and the department works directly with schools to coordinate high participation.
- The district launched its second annual Khan Academy "All In" campaign to increase awareness about the effectiveness of the free online SAT and PSAT preparation course to all 8<sup>th</sup> grade and high school students, teachers, and administrators. A print and digital campaign was launched, advertising the benefits of the course and a scholarship raffle for students who take advantage of the tool. Administrators were given regular updates from the district on the average number of minutes that students use Khan Academy, and campuses were provided training on how to integrate Khan Academy usage into the school day. Khan Academy uses students' previous PSAT scores to develop a personalized preparation schedule and action plan.
- The district used data to identify a trend between high usage of Khan Academy and score increases on the PSAT. The district trained a number of these successful students to be "Khan Ambassadors," sharing their success stories in a district wide print campaign and regularly promoting awareness of the benefits of strong PSAT performance on high school campuses. 2017-2018 was the second year of the ambassador program, which was expanded to serve more students.
- For the second year, all high school and 6-12 campuses were given an opportunity to participate in a contest, called the "Khanathlon," to increase the number of students that use Khan Academy to prepare for the PSAT and SAT. Early in the Spring semester, three campuses were recognized for highest linkage rates between College Board and Khan Academy accounts, followed by a mid-term and end of year contest for highest usage. Campuses with the highest rates of usage are eligible for district funding for college field trips, materials and other college and career readiness initiatives. Large, medium, and small campuses competed separately.
- The district provides students, parents and campuses with access to Naviance, which provides free standardized testing preparation for the PSAT and SAT. This tool is also used to send messages to students about upcoming testing dates, and resources to understand and prepare for the exam.
- The College Readiness Department centrally trains and supports a team of 33 College Success Advisors who work directly with students at all high schools. This team provides personalized support to students on completing college and financial aid applications, and also increases awareness of the importance of the PSAT for qualifying for scholarships. All College Access personnel in the district are provided with training on how to leverage PSAT and SAT Preparation tools.

**Secondary Curriculum Office**

Secondary Curriculum and Development continues to work in partnership with the College Readiness department to help high school teachers understand the new SAT format for mathematics. The new topics are more heavily focused on algebra rather than geometry. Trainings have included department chair meetings, the K-12 math conference, and Achieve 180 PD days for improvement-required campuses. SAT-type problems have been written into portions of the district curriculum. These efforts will continue and will be expanded to include middle school teachers.

Secondary English/Language Arts leaders will continue to work toward improved tier 1 instruction as outlined in district literacy initiatives. Additionally, the district will continue to support Tier II and Tier III interventions for low performing students to ensure that all students show growth.

Should you have any further questions, please contact Carla Stevens in Research and Accountability at 713-556-6700.

It is the policy of the Houston Independent School District not to discriminate on the basis of age, color, handicap or disability, ancestry, national origin, marital status, race, religion, sex, veteran status, political affiliation, sexual orientation, gender identity and/or gender expression in its educational or employment programs and activities.

# PSAT 8/9 and PSAT/NMSQT Results: Fall 2017

## Executive Summary

### Program Description

The Preliminary SAT for students in grades eight and nine (PSAT 8/9) and the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT) are national examinations offered by the College Board. These assessments measure progress toward college and career readiness. In fall 2015, the College Board redesigned the PSAT/NMSQT and introduced the PSAT 8/9 for the first time. Because comparing the redesigned exam with prior versions is problematic, performance data are only included for a maximum of three years.

### Highlights

- The percentage of tenth grade students tested has increased from 82 percent in 2015 to 83 percent in 2017 and for eleventh grade students from 79 percent in 2015 to 81 percent in 2017, although there was a decline in grade 11 to 78 percent in 2016.
- The percentage of eighth grade students tested increased from 81 percent in 2015 to 83 percent in 2017, and for ninth grade students percentages remained the same from 81 percent in 2015 to 81 percent in 2017, with a decline of 2 percentage points for grade 9 from 2015 to 2016.
- In 2017, PSAT 8/9 and PSAT/NMSQT total scores and scores by subject and grade level declined for the district, state, and nation compared to 2016, with the exception of grade 11 Evidenced-Based Reading and Writing (ERW) mean scores at the state level which stayed the same.
- Average PSAT 8/9 and PSAT/NMSQT scores and scores by subject and grade level districtwide are lower than those of students in Texas and the nation.
- HISD eighth grade students belonging to the African American, Asian, White, and Two or more races groups scored higher on average compared to their counterparts across the state, and students belonging to the Asian, Hispanic, White, and Two or more races groups also scored higher on average than their counterparts across the nation.
- On the 2017 PSAT 8/9 and the PSAT/NMSQT total score, HISD White students scored higher on average than their counterparts across the state and the nation.
- Twenty-seven percent and twenty-four percent of HISD eighth and ninth grade students tested, respectively, on the PSAT 8/9 met both the math and ERW College and Career Readiness (CCR) benchmarks, which is lower than the state (31 percent and 32 percent) and nation (32 percent and 36 percent).
- Twenty-two percent and twenty-three percent of HISD tenth and eleventh grade students, respectively, tested on the PSAT/NMSQT met both the math and ERW CCR benchmarks, which is lower than the state (32 percent and 33 percent) and the nation (38 percent and 44 percent).

## Introduction

The SAT Suite of Assessments is an integrated system of tests that includes the SAT® (for students in grades 11 and 12), the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT®) and the PSAT™ 10 (for grades 10 and 11), and the PSAT™ 8/9 (for grades 8 and 9). The tests measure the same skills and knowledge in grade-appropriate ways. The PSAT 8/9 establishes a baseline measurement of college and career readiness as students enter high school. The PSAT/NMSQT measure the skills and knowledge that research shows are the most essential for college and career readiness and success, and can qualify eligible students for scholarships through partnership with the National Merit Scholarship Corporation.

There are two section scores, Evidenced-Based Reading and Writing (ERW) and Math. The ERW Section Score is comprised of the Reading Test Score and the Writing and Language Test Score. The Math Section Score is comprised of the Math Test Score. The Reading Test measures comprehension and reasoning skills and focuses on close reading of passages in a wide array of subject areas. The Writing and Language Test measures a range of skills including command of evidence, expression of ideas, and the use of Standard English conventions in grammar and punctuation. The Math Test covers a range of math practices, with an emphasis on problem solving, modeling, using tools strategically, and using algebraic structure. Each section score of the PSAT 8/9 ranges from 120 to 720, with the total score ranging from 240 to 1440. For the PSAT/NMSQT, each section score ranges from 160 to 760, with the total score ranging from 320 to 1520.

The score report includes an indicator for each section, ERW and Mathematics, which shows whether a student's score meets the grade-level benchmark. These benchmarks allow students and educators to understand how students are progressing toward college readiness. This report analyzes the participation and performance of Houston Independent School District (HISD) students who took the fall 2017 administration of the PSAT 8/9 and the PSAT/NMSQT.

In 2015–2016, the College Board redesigned the PSAT/NMSQT and introduced the PSAT 8/9 for the first time. The goal of the redesign of the suite of assessments is to reflect what is taught in the classroom and assess skills that are the most accurate predictors of college and career readiness and success based on established research and evidence. Because comparing the redesigned exam with prior versions is problematic, performance data are only included for a maximum of three years. This report includes students' latest (i.e., most recent) test score, not necessarily their highest score.

## Results

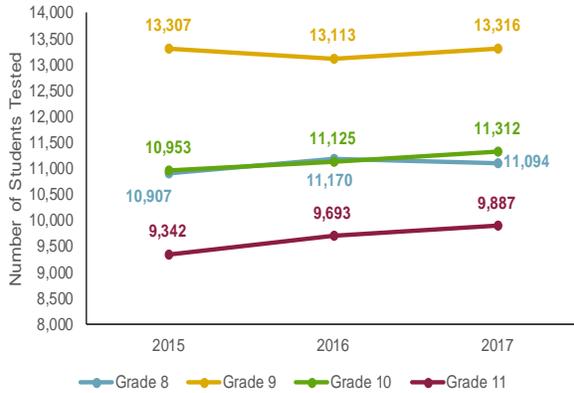

### PSAT 8/9 and PSAT/NMSQT Participation

HISD launched the PSAT for All initiative in 2003 as a way to enroll more students in Advanced Placement courses and prepare them to be successful on the SAT which is required by most colleges. The district-wide initiative enables all HISD tenth graders to take the PSAT/NMSQT for free. On August 12, 2010, the HISD Board of Education expanded the PSAT for All program to include incoming ninth-graders for the 2010–2011 school year. Currently, the district pays for the students to take the PSAT in grades 8 through 10. **Figure 1** and **Figure 2** (p. 3) illustrate district-wide PSAT participation.

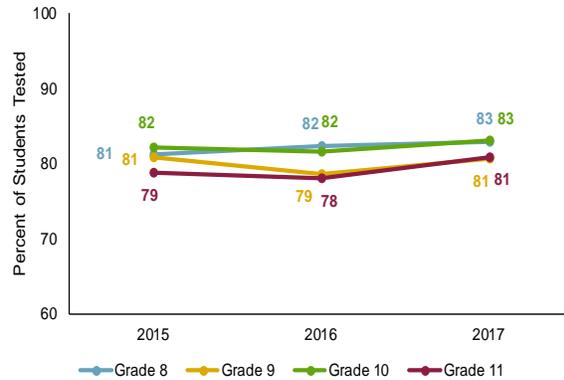

- The number of tenth and eleventh grade students taking the PSAT/NMSQT increased from 10,953 in 2015 to 11,312 in 2017 and 9,342 in 2015 to 9,887 in 2017, respectively (Figure 1, p. 3).

- The percentage of tenth and eleventh grade students tested has increased from 82 percent in 2015 to 83 percent in 2017 and from 79 percent in 2015 to 81 percent in 2017, respectively, although there was a decline in grade 11 to 78 percent in 2016 (Figure 2, p.3).
- The percentage of eighth and ninth grade students tested increased from 81 percent in 2015 to 83 percent in 2017, and from 79 percent in 2016 to 81 percent in 2017, respectively, with a decline of 2 percentage points for grade 9 from 2015 to 2016.

**Figure 1. PSAT Participation by Grade**

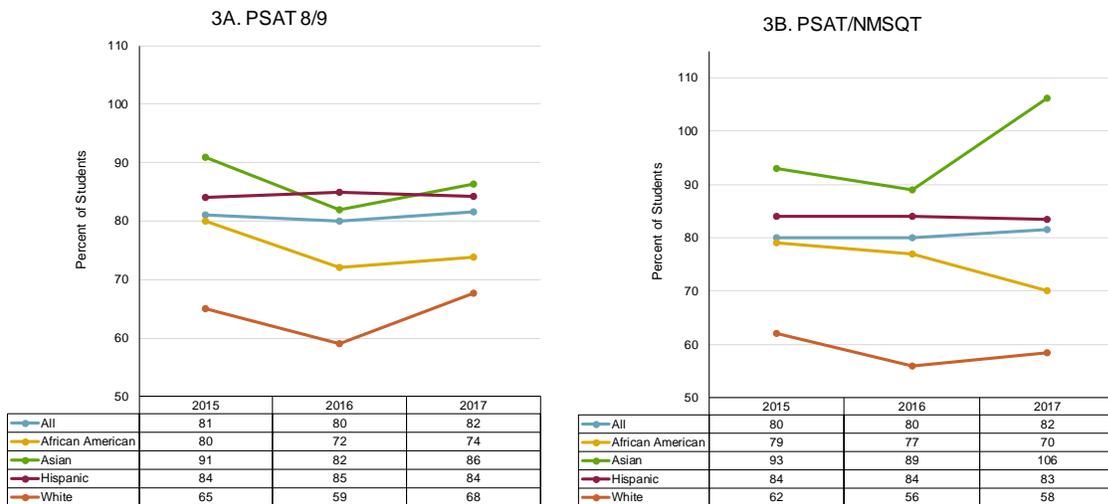

**Figure 2. PSAT Participation Rate by Grade**

Sources: Figure 1, Fall 2017 College Board PSAT 8/9 Summary Report, 3/26/18; HISD PSAT 8/9 & PSAT/NMSQT Fall 2016 Report; Figure 2, District and School Profiles, 2015–2016 to 2016–2017; Fall PEIMS Snapshot, 2017, Chancery Demographic Extract, 10/17/17; Fall 2017 College Board Summary Report, 3/26/18

**Figures 3A and 3B** show the HISD PSAT participation rate by student group. Participation rates for each group were determined by dividing the number of students within the group who took the PSAT by the number of enrolled students within the group.

**Figure 3A–3B. PSAT Participation Rate by Race/Ethnicity, 2015–2017**

Sources: Fall 2017 College Board PSAT 8/9 Scores by Demographics-8<sup>th</sup> grade and 9<sup>th</sup> grade; Fall 2017 College Board PSAT/NMSQT Scores by Demographics-10<sup>th</sup> grade and 11<sup>th</sup> grade; PEIMS, 2015–2017

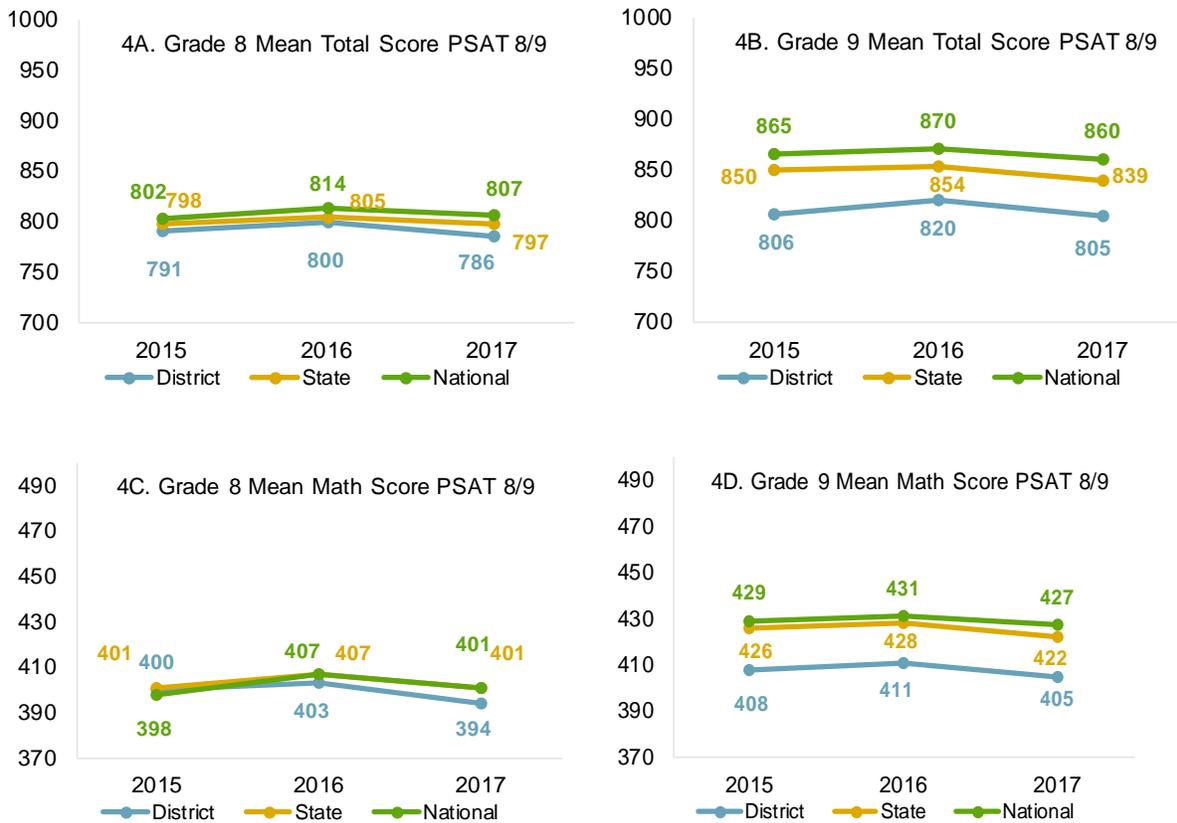

Note: Because demographic data are self-reported, percentages may exceed 100 percent.

- For the PSAT 8/9, the participation rate **dropped** from 2015 to 2016 for all race/ethnicity groups shown except for the Hispanic group which **increased**, while participation for all students, African American, Asian, and White students increased from 2016 to 2017.
- For the PSAT/NMSQT, the participation rate **dropped** from 2015 to 2016 for all race/ethnicity groups shown except for all students and Hispanic students which **remained the same**, while participation for all students, Asian students, and White students **increased** from 2016 to 2017, but **dropped** for African American and Hispanic students.

**PSAT Performance**

Figures 4A–4F show the average score by subject, grade level, and PSAT total score for 2015 to 2017 on the PSAT 8/9 comparing district, state, and national results.

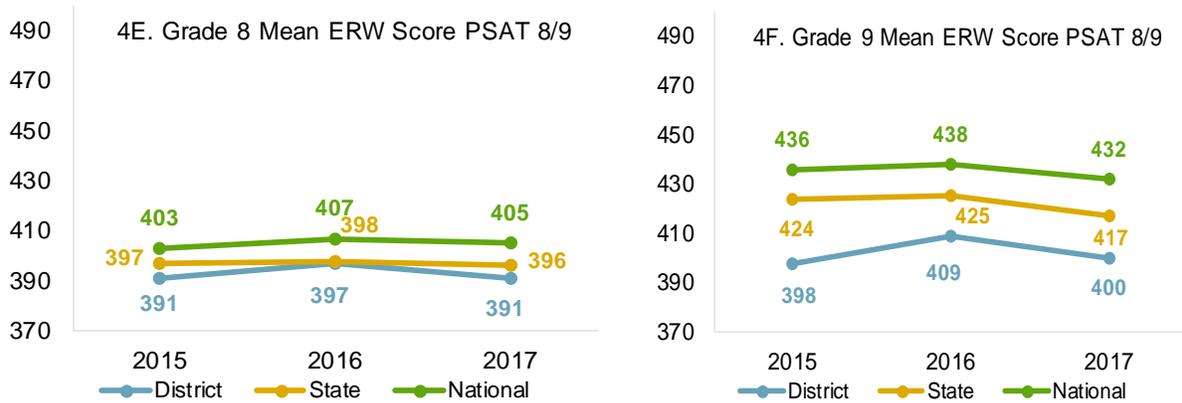

**Figures 4A–4D. Mean PSAT 8/9 Scores of District, State, and National Students, 2015–2017**

Sources: PSAT 8/9 2017 Fall Scores by Institution; PSAT 8/9 2016 Fall Scores by Institution; PSAT 8/9 2015 Fall Scores by Institution

Note: ERW=Evidence-based reading and writing

**Figures 4E–4F. Mean PSAT 8/9 Scores of District, State, and National Students, 2015–2017**

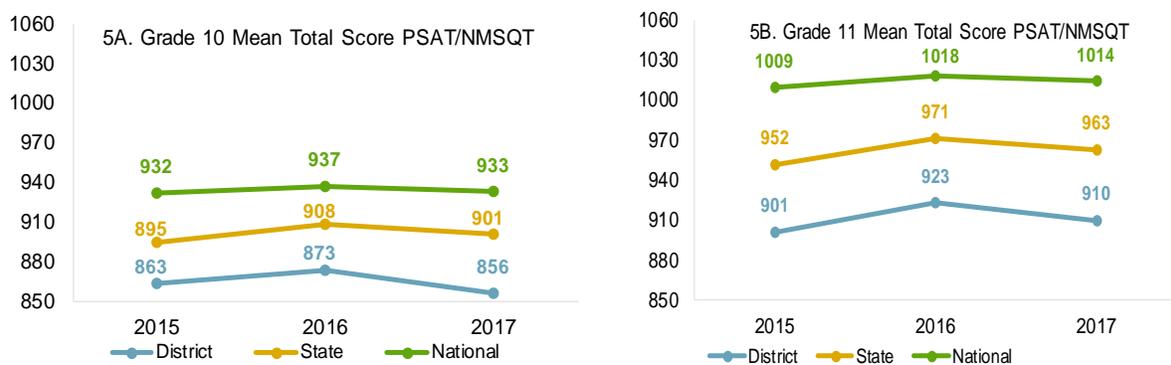

Sources: PSAT 8/9 2017 Fall Scores by Institution; PSAT 8/9 2016 Fall Scores by Institution; PSAT 8/9 2015 Fall Scores by Institution

Note: ERW=Evidence-based reading and writing

- Average PSAT 8/9 total scores and scores by subject and grade level districtwide are lower than those of students in Texas and the nation (Figures 4A–4D, p. 4 and 4E–4F).
- Although the average PSAT 8/9 total scores and subject scores dropped from 2016 to 2017, the 15-point drop in the average PSAT 8/9 total scores and the 6-point drop in the average PSAT 8/9 mathematics scores for ninth grade students was mirrored by the state (Figure 4B, p. 4 and Figure 4D, p. 4).
- 2017 PSAT 8/9 total scores for ninth grade students showed less of a decline for the district than the state or nation compared to 2015. The same is true for grade 9 math and grade 8 ERW compared to the state, and grade 9 ERW compared to both the state and nation (Figures 4A–4F, pp. 4–5).

Figures 5A–5F show the average score by subject, grade level, and PSAT/NMSQT total score for 2015 to 2017 comparing district, state, and national results.

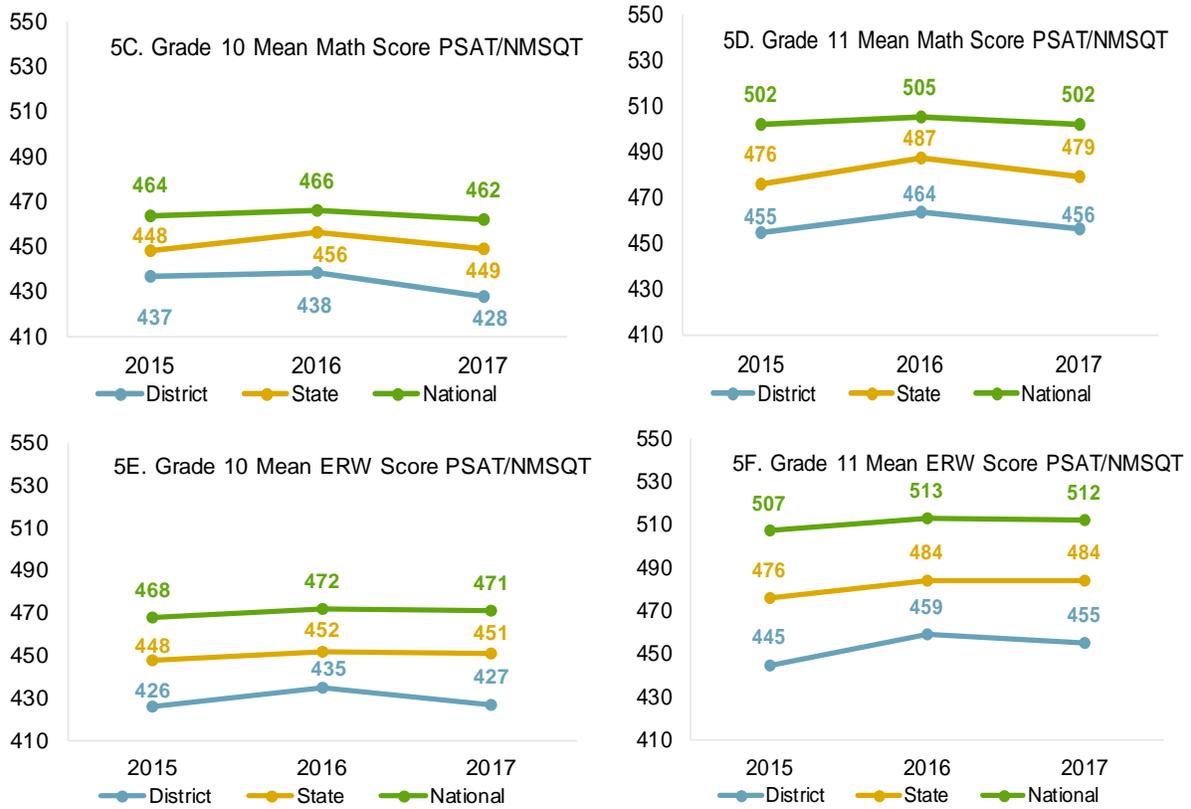

**Figures 5A–5B. Mean PSAT/NMSQT Scores of District, State, and National Students, 2015–2017**

 Note: ERW=Evidence-based reading and writing

- Average PSAT/NMSQT total scores and scores by subject and grade level districtwide are lower than those of students in Texas and the nation (Figures 5A–5F, pp. 5–6).
- In 2017, PSAT/NMSQT total scores and scores by subject and grade level declined for the district, state, and nation compared to 2016, with the exception of grade 11 ERW mean scores at the state level which stayed the same (Figures 5A–5F, pp. 5–6).
- Gaps in performance between the district and the nation narrowed in 2017 compared to 2015 for the total and both subject tests in grade 11 and between the district and the state for grade 11 ERW (Figures 5A–5F, pp. 5–6).

**Figures 6A–6D. Average PSAT 8/9 and PSAT/NMSQT Total Score by Race/Ethnicity of District, State, and National Students, 2017**

- HISD eighth grade students belonging to the African American, Asian, White, and Two or more races groups scored **higher** on average than their counterparts across the state, while the Asian, Hispanic, White, and Two or more races groups scored **higher** on average than their counterparts across the nation (Figure 6A).
- HISD ninth grade students belonging to the Asian, White, and Two or more races groups scored **higher** on average than their counterparts across the state, while students belonging to the Asian and White groups scored **higher** on average than their counterparts across the nation (Figure 6B).
- HISD White students at all grade levels scored higher on average than their counterparts across the state and the nation (Figures 6A–6C).

**Figures 7A–7F** show the average PSAT 8/9 scores by subject, grade level, and student group for the district from 2015 to 2017.

- For eighth and ninth grade students tested on the PSAT 8/9, Asian and White students scored higher on average in both ERW and math and on the total mean score compared to African American and Hispanic students for 2015, 2016, and 2017 (Figure 7A–7F, p. 8).
- From 2015 to 2017, total mean scores and math scores increased for eighth grade students identified as Asian, White, and Two or more races, and ERW scores increased for both eighth and ninth grade students identified as Asian, White, Two or more races, and all students, respectively (Figures 7A, 7C, 7E, and 7F, p. 8).

**Figure 7A–7F. Average PSAT 8/9 Scores by Subject, Grade, and Race/Ethnicity, 2015–2017**

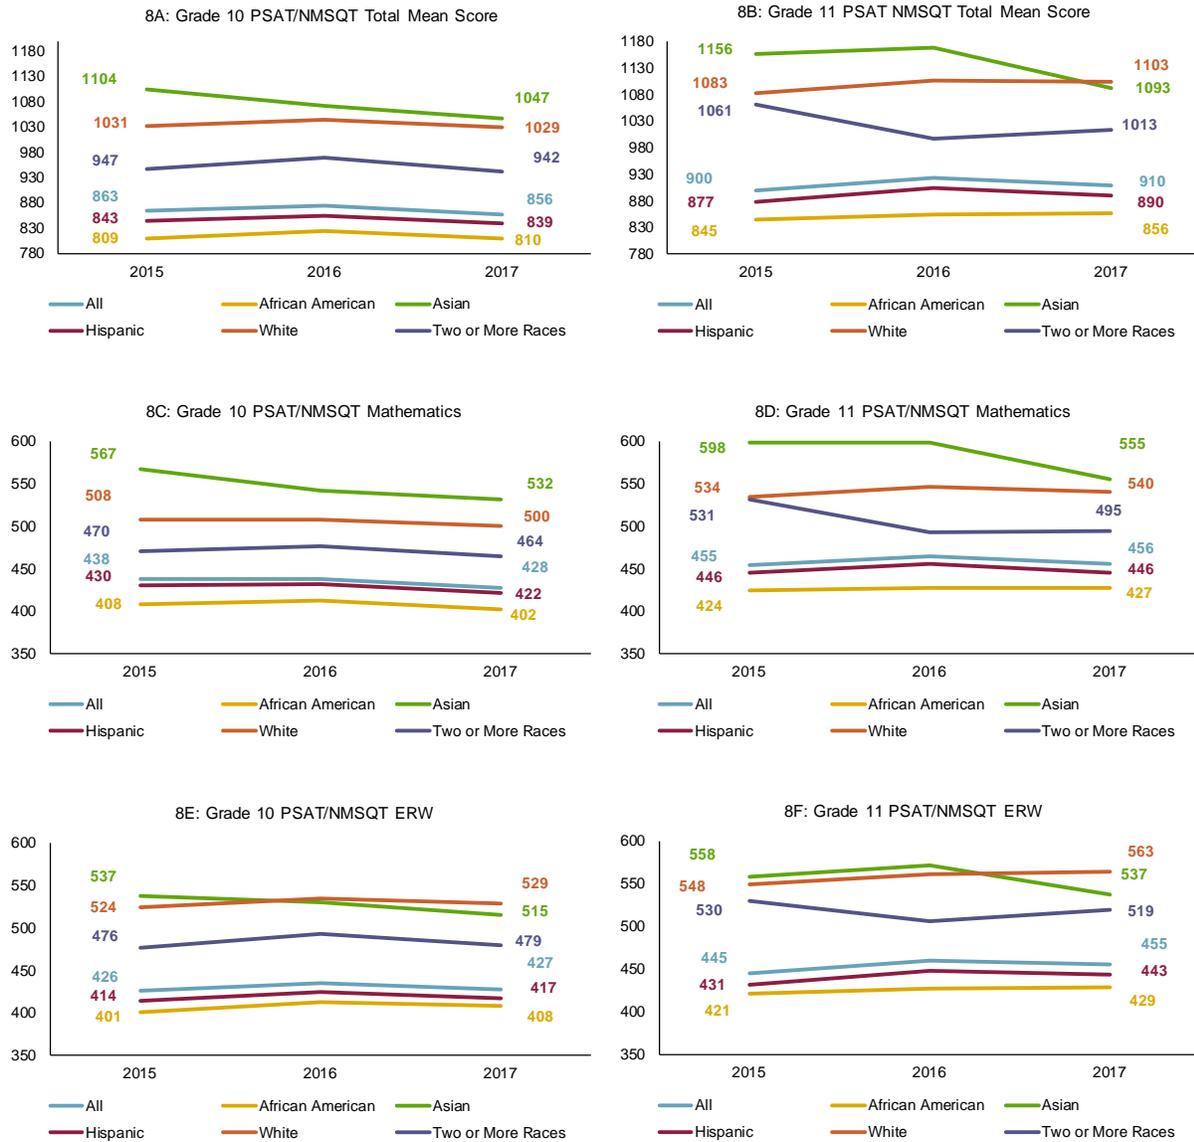

Sources: PSAT 8/9 2017 Fall Scores by Institution, 8<sup>th</sup> grade, filtered by Race/Ethnicity; PSAT 8/9 2017 Fall Scores by Institution, 9<sup>th</sup> grade, filtered by Race/Ethnicity; PSAT 8/9 2016 Fall Scores by Institution, 8<sup>th</sup> grade, filtered by Race/Ethnicity; PSAT 8/9 2016 Fall Scores by Institution, 9<sup>th</sup> grade, filtered by Race/Ethnicity; PSAT 8/9 2015 Fall Scores by Institution, 8<sup>th</sup> grade, filtered by Race/Ethnicity; PSAT 8/9 2015 Fall Scores by Institution, 9<sup>th</sup> grade, filtered by Race/Ethnicity

Note: ERW=Evidence-based reading and writing

- From 2015 to 2017, total mean scores increased for ninth grade students identified as Asian and White, and math scores increased for ninth grade students identified as Asian (Figure 7B and 7D).

Figures 8A–8F show the average PSAT/NMSQT scores by subject, grade level, and student group for the district from 2015 to 2017.

**Figure 8A–8F. Average PSAT/NMSQT Scores by Subject, Grade, and Race/Ethnicity, 2015–2017**

Note: ERW=Evidence-based reading and writing

- For tenth and eleventh grade students tested on the PSAT/NMSQT, Asian and White students scored higher on average in both ERW and math and on the total mean score compared to African American and Hispanic students for 2015, 2016, and 2017 (Figure 8A–8F).
- From 2015 to 2017, total mean scores increased for tenth grade African American students, and ERW scores increased for tenth grade African American, Hispanic, White, and Two or more races (Figures 8A and 8E).

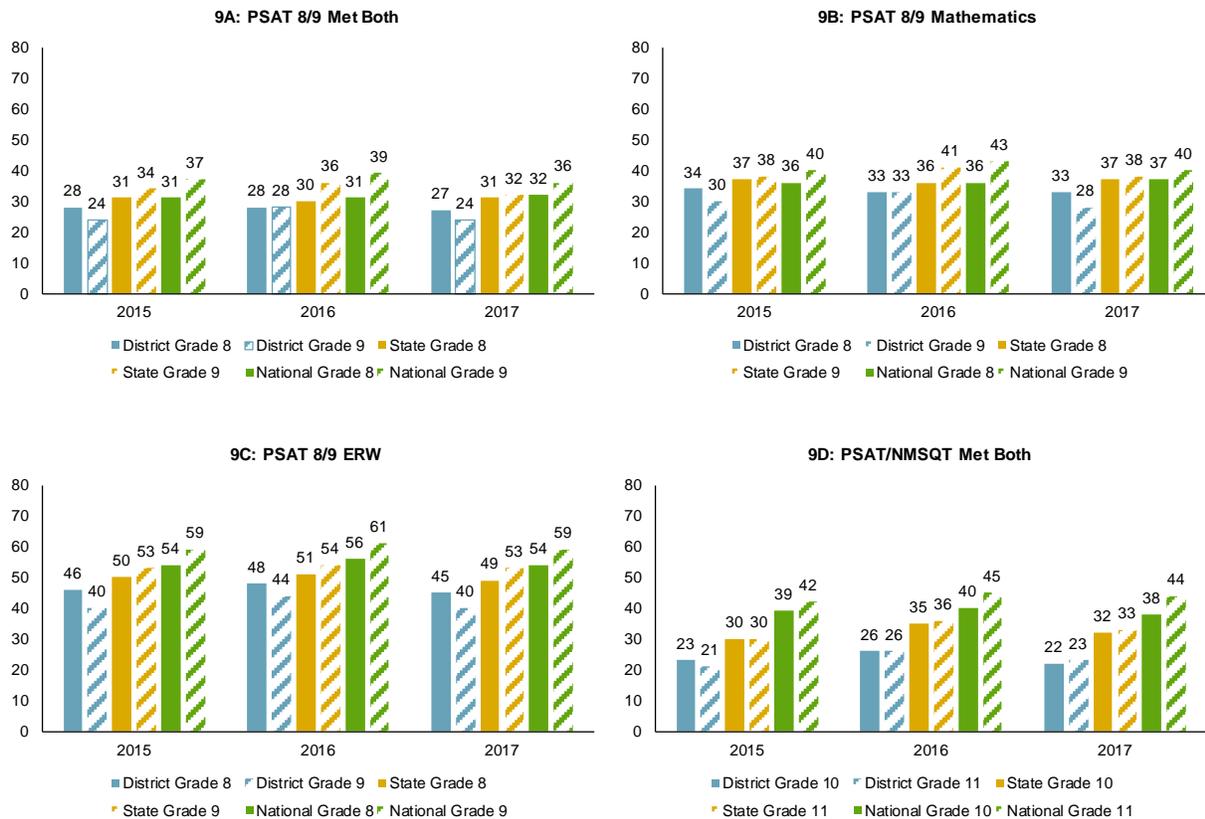

- From 2015 to 2017, total mean scores increased for eleventh grade students identified as African American, Hispanic, White, and all students; math scores increased for eleventh grade students identified as White, African American, and all students; and ERW scores increased for eleventh grade students identified as African American, Hispanic, and White (Figures 8B, 8D, 8F, pp. 9).

PSAT College and Career Readiness (CCR) Benchmarks.

The College Board sets benchmark scores to predict students' chance of success in college and career readiness. According to the College Board, the SAT Math benchmark is associated with a 75 percent chance of earning at least a C in first-semester, college-level courses in algebra, statistics, precalculus, or calculus. The SAT ERW benchmark is associated with a 75 percent chance of earning at least a C in first-semester, college-level courses in history, literature, social science, or writing. Score reports for the PSAT/NMSQT and PSAT 8/9 include grade-level benchmarks based on how students grow from year to year toward the SAT benchmarks.

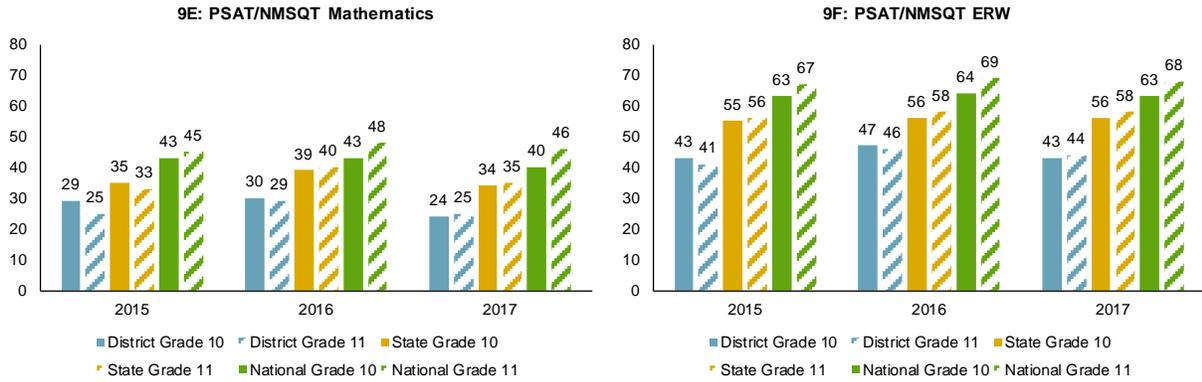

Figures 9A-9F show the percentage of students from the district, state, and nation who met college and career readiness (CCR) benchmarks in ERW, math, and both on the PSAT 8/9 and the PSAT/NMSQT.

**Figure 9A–9D. Percentage of District, State, and National Students Meeting CCR Benchmarks, 2015–2017**

**Figure 9E–9F. Percentage of District, State, and National Students Meeting CCR Benchmarks, 2015–2017**

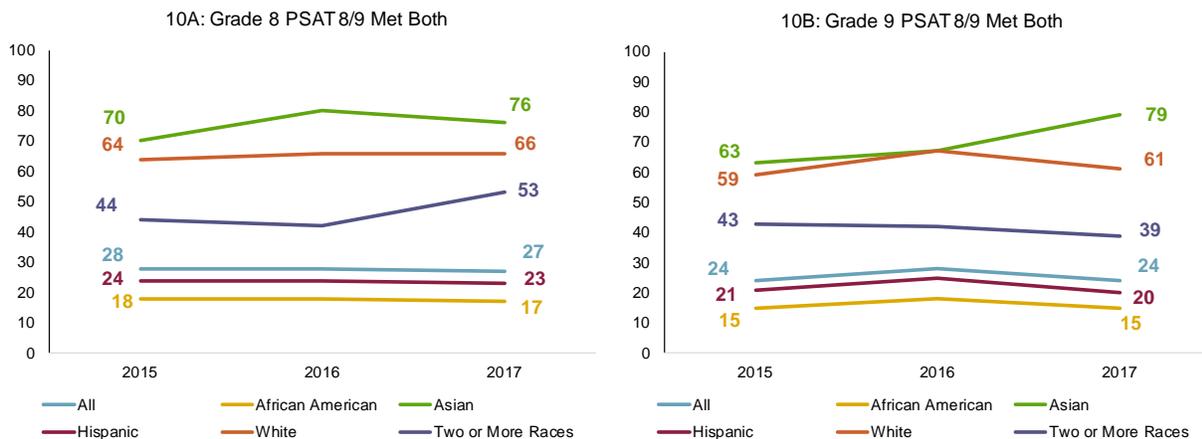

Sources: PSAT/NMSQT 2017 Fall Scores by Institution, 11<sup>th</sup> grade; PSAT/NMSQT 2017 Fall Scores by Institution, 10<sup>th</sup> grade; PSAT/NMSQT 2016 Fall Scores by Institution, 11<sup>th</sup> grade; PSAT/NMSQT 2016 Fall Scores by Institution, 10<sup>th</sup> grade; PSAT/NMSQT 2015 Fall Scores by Institution, 11<sup>th</sup> grade; PSAT/NMSQT 2015 Fall Scores by Institution, 10<sup>th</sup> grade; Note: ERW=Evidence-based reading and writing

- A higher percentage of HISD eighth grade students taking the PSAT 8/9 met the CCR benchmark in ERW (45 percent) compared to math (33 percent) in 2017. A similar trend is evident for grades 9–11 and for both the state and the nation (Figures 9B, 9C, 9E, and 9F, pp. 10–11).
- Although a lower percentage of HISD students met both CCR Benchmarks on the PSAT 8/9 and the PSAT/NMSQT by grade level compared to Texas and the nation from 2015 to 2017, district ninth grade students narrowed the gap between the district and the state and the nation (Figures 9A and 9D, p. 10).

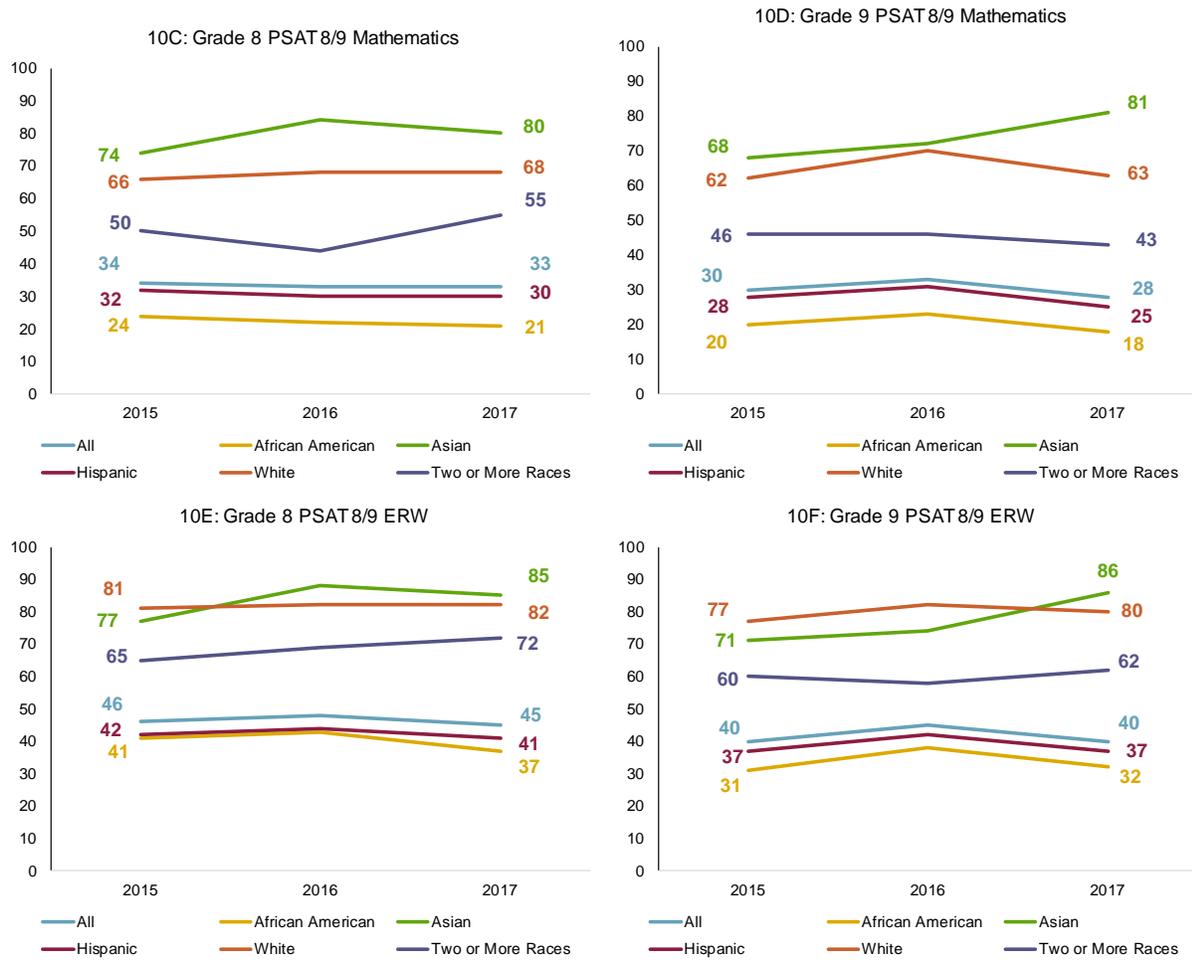

Figures 10A–10F show the percentage of eighth and ninth grade students who met the CCR benchmarks on the PSAT 8/9 by subject and student group from 2015 to 2017.

**Figure 10A–10B. Percentage of 8<sup>th</sup> and 9<sup>th</sup> Grade Students Meeting CCR Benchmarks on PSAT 8/9 by Student Group, 2015–2017**

Note: ERW=Evidence-based reading and writing

- HISD eighth and ninth grade students belonging to the Asian and White groups had a higher percentage of students meeting the CCR benchmarks in both ERW and math compared to African American, Hispanic, or Two or more races groups (Figures 10C–10D and 10E–10F).
- The percentage of eighth grade students meeting all CCR benchmarks in 2017 increased compared to 2015 for eighth grade students belonging to Asian, White, or Two or more races (Figures 10 A, p. 11, 10C, and 10 E).
- From 2015 to 2017, the percentage of ninth grade Asian and White students meeting both CCR and math benchmarks increased, and the percentage of ninth grade students meeting ERW benchmarks for African American, Asian, White, and Two or more races increased (Figures 10B, p. 11, 10D, and 10F).

**Figures 11A–11F** show the percentage of tenth and eleventh grade students who met the CCR benchmarks on the PSAT/NMSQT by subject and student group from 2015 to 2017.

**Figure 11A–11F. Percentage of 10<sup>th</sup> and 11<sup>th</sup> Grade Students Meeting CCR Benchmarks on PSAT/NMSQT by Student Group, 2015–2017**

Note: ERW=Evidence-based reading and writing

- HISD tenth and eleventh grade students belonging to the Asian and White groups had a higher percentage of students meeting the CCR benchmarks in both ERW and math compared to African American, Hispanic, or Two or more races groups (Figures 11C–11F, p. 13).
- HISD tenth grade students belonging to the African American, Hispanic, or Two or more races groups had a higher percentage of students meeting the ERW benchmarks in 2017 compared to 2015 (Figure 11E, p. 13).
- The percentage of eleventh students belonging to the African American, White, or Hispanic groups meeting both CCR benchmarks and ERW benchmarks in 2017 increased compared to 2015, and the percentage of eleventh grade students belonging to the Hispanic and White groups meeting math CCR benchmarks in 2017 increased compared to 2015 (Figures 11B, 11D, and 11F, p. 13).

#### Results by Campus

**Table 1A** (p. 15) shows the number of eighth grade students tested, average PSAT 8/9 total score, and percentage of students meeting both the ERW and math CCR benchmarks by campus.

- Pershing, Hamilton, and Tanglewood middle schools had the greatest increases in the number of eighth grade students taking the PSAT, with increases of 51, 56, and 40 students, respectively. Campuses were required to test each year to be included in this analysis (Table 1A, p. 15).
- T.H. Rogers Middle School had the highest average total score at 1082 as well as the highest percentage of eighth grade students who met both the ERW and math CCR benchmarks at 96.6 percent (Table 1A).
- Wilson Montessori had the greatest increases in total score and percentage of students meeting both CCR benchmarks at 35 points and 19.1 percentage points, respectively (Table 1A).

Table 1A. PSAT 8/9 Grade 8 Mean Total Scores and Percent Met CCR Benchmarks by Campus, 2016 and 2017 (Sorted by 2017 Mean Total Score)

Sources: PSAT 8/9 2017 Fall Scores by Institution, 8<sup>th</sup> grade; PSAT 8/9 2016 Fall Scores by Institution, 8<sup>th</sup> grade

**Table 1B** (p. 17) shows the number of ninth grade students tested, average PSAT 8/9 total score, and percentage of students meeting both the ERW and math CCR benchmarks by campus.

- Milby, Waltrip, and Westbury high schools had the greatest increases in the number of ninth grade students taking the PSAT 8/9, with increases of 350, 123, and 104 students, respectively (Table 1B, p. 17).
- Carnegie Vanguard High School had the highest average total score at 1125 as well as the highest percentage of students who met both the ERW and math CCR benchmarks at 97.2 percent (Table 1B, p. 17).
- Middle College at HCC-Gulfton and Energized for STEM Southeast (E-STEM SE) high schools had the greatest increases in the percentage of students meeting both CCR benchmarks with increases of 12.8 and 7.3 percentage points, respectively (Table 1B, p. 17).

**Table 1C** (p. 18) shows the number of tenth grade students tested, average PSAT/NMSQT total score, and percentage of students meeting both the ERW and math CCR benchmarks by campus.

- Milby and Wisdom high schools had the greatest increases in the number of tenth grade students taking the PSAT/NMSQT, with increases of 122 and 95 students, respectively (Table 1C, p. 18).
- Carnegie Vanguard High School had the highest average total score at 1230 as well as the highest percentage of students who met both the ERW and math CCR benchmarks at 98.1 percent. This was closely followed by DeBakey High School with an average total score of 1174 and 96.4 percent of the tested tenth grade students meeting both CCR benchmarks (Table 1C, p. 18).
- Young Women's College Prep had the greatest increase in the percentage of students meeting both ERW and math CCR benchmarks with an increase of 10.2 percentage points (Table 1C, p.18).

**Table 1D** (p. 19) shows the number of eleventh grade students tested, average PSAT/NMSQT total score, and percentage of students meeting both the ERW and math CCR benchmarks by campus.

- Madison, Milby, and Westbury high schools had the greatest increases in the number of eleventh grade students taking the PSAT/NMSQT, with increases of 84, 81, and 79, respectively (Table 1D, p. 19).
- DeBakey High School for Health Professions (DeBakey) had the highest average score at 1326 followed by Carnegie Vanguard at 1290 (Table 1D, p. 19).
- DeBakey and Carnegie Vanguard high schools had the highest percentage of students meeting college and career readiness benchmarks at 100.0 percent and 95.2 percent, respectively (Table 1D, p. 19).
- Sharpstown International High School had the greatest increase in the percentage of students meeting both ERW and math CCR benchmarks with an increase of 13.9 percentage points (Table 1D, p. 19).

Sources: PSAT/NMSQT 2017 Fall Scores by Institution, 11<sup>th</sup> grade; PSAT/NMSQT 2016 Fall Scores by Institution, 11<sup>th</sup> grade

**Table 2A** (p. 21) shows the average PSAT 8/9 mathematics and ERW scores and the percentage of eighth grade students meeting the math and ERW CCR benchmarks by campus.

- Eighth grade students at T.H. Rogers Middle School had the highest average score in both mathematics and ERW at 537 and 545, respectively (Table 2A, p. 21).
- T.H. Rogers Middle School had the highest percentage of eighth grade students meeting CCR benchmarks for mathematics and ERW at 96.6 percent and 100.0 percent, respectively (Table 2A, p. 21).
- Black and Hamilton middle schools had the greatest increases in the percentage of students meeting the mathematics CCR benchmark with increases of 13.7 and 13.0 percentage points, respectively (Table 2A, p. 21).
- Wilson Montessori had the greatest increase in the percentage of eighth grade students meeting the ERW CCR benchmark at 15.6 percentage points (Table 2A, p. 21).

**Table 2B** (p. 22) shows the average PSAT 8/9 mathematics and ERW scores and the percentage of ninth grade students meeting the math and ERW CCR benchmarks by campus.

- Carnegie Vanguard High School had the highest average score in mathematics at 568 and the High School for the Performing and Visual Arts (HSPVA) had the highest score for ERW at 561 (Table 2B, p. 22).
- Ninth grade students at HSPVA had the greatest increase in the mean mathematics score at 22 points, followed by E-STEM SE High School at 19 points (Table 2B, p. 22).
- Ninth grade students at HSPVA had the greatest increase in the mean ERW score at 17 percentage points, followed by the High School for Law and Justice (HSLJ) at 14 percentage points (Table 2B, p. 22).
- Carnegie Vanguard High School had the highest percentage of ninth grade students meeting CCR benchmarks for mathematics and ERW at 97.8 percent and 98.9 percent, respectively (Table 2B, p. 22).
- Ninth grade students at Middle College at HCC-Gulfton had the greatest increase in the percentage of students meeting the math and ERW CCR benchmarks at 12.8 and 22.5 percentage points, respectively (Table 2B, p. 22).

"--" indicates no students tested, or no students met the benchmark.

The College Board masks data for fewer than 10 test takers.

Sources: PSAT 8/9 2017 Fall Scores by Institution, 9th grade; PSAT 8/9 2016 Fall Scores by Institution, 9th grade

**Table 2C** (p. 24) shows the average PSAT/NMSQT mathematics and ERW scores and the percentage of tenth grade students meeting the math and ERW CCR benchmarks by campus.

- Carnegie Vanguard High School had the highest average score in both mathematics and ERW at 613 and 617, respectively (Table 2C, p. 24).
- Tenth grade students at Carnegie Vanguard High School had the greatest increase in the mean mathematics score at 14 points, followed by Wheatley High School at 13 points (Table 2C, p. 24).
- Tenth grade students at Long Academy and Scarborough High School had the greatest increases in the mean ERW score at 17 points each, followed by Milby High School at 15 points (Table 2C, p. 24).
- Carnegie Vanguard High School had the highest percentage of tenth grade students meeting CCR benchmarks for mathematics and ERW at 98.1 percent and 100.0 percent, respectively (Table 2C, p. 24).
- Tenth grade students at Young Women’s College Prep had the greatest increase in the percentage of students meeting math CCR benchmarks at 11.9 percentage points, and E-STEM SE HS had the greatest increase in the percentage of tenth grade students meeting ERW CCR benchmarks at 18.4 percentage points (Table 2C, p. 24).

**Table 2D** (p. 25) shows the average PSAT/NMSQT mathematics and ERW scores and the percentage of eleventh grade students meeting the math and ERW CCR benchmarks by campus.

- DeBaKey High School had the highest average score in both mathematics and ERW at 676 and 650, respectively (Table 2D, p. 25).
- Eleventh grade students at Wheatley and Sharpstown International high schools had the greatest increase in the mean mathematics score at 21 points (Table 2D, p. 25).
- Eleventh grade students at Sharpstown International High School had the greatest increase in the mean ERW score at 43 points, followed by East Early College High School (ECHS) at 15 points (Table 2D, p. 25).
- DeBaKey High School had the highest percentage of eleventh grade students meeting CCR benchmarks for mathematics at 100 percent, followed by Carnegie Vanguard High School at 95.2 percent (Table 2D, p. 25).
- Carnegie Vanguard and DeBaKey high schools had the highest percentage of eleventh grade students meeting CCR benchmarks for ERW at 100 percent each, followed by HSPVA at 97.7 percent (Table 2D, p. 25).
- Eleventh grade students at Sharpstown International High School had the greatest increase in the percentage of students meeting math and ERW benchmarks at 9.9 percentage points and 26.4 percentage points, respectively (Table 2D, p. 25).

## Conclusion

HISD launched the *PSAT for All* initiative in 2003 as way to enroll more students in Advanced Placement courses and prepare them to be successful on the SAT which is required by most colleges. The district-wide initiative enabled all HISD tenth graders to take the PSAT/NMSQT for free. On August 12, 2010, the HISD Board of Education expanded the *PSAT for All* program to include incoming ninth-graders for the 2010–2011 school year. Currently, the district supports participation in the PSAT 8/9 and the PSAT/NMSQT by paying for the exams in grades 8 through 10, resulting in participation rates that surpass those of the state and the nation.

Over the past three years, PSAT/NMSQT participation for tenth grade students has increased by 359 students from 10,953 to 11,312 and PSAT 8/9 participation has increased by 9 students from 13,307 to 13,316. In 2017, the district administered the PSAT/NMSQT to 83 percent of students in grade 10 and 81 percent of students in grade 9. This exposure to college readiness and entrance exams such as the PSAT represents an integral step to succeeding on the SAT, a widely accepted college entrance exam.

Performance may have been negatively impacted due to Hurricane Harvey since the test was administered on October 11, 2017, and the majority of students had been back to school for only four weeks. An analysis of performance on the PSAT 8/9 and the PSAT/NMSQT revealed that mean subject and total scores for the district were lower than those for Texas and the nation at all grade levels. Mean math scores were higher than ERW scores at all grade levels, but math scores were still lower than their state and national counterparts. Students at all grade levels were less likely to meet CCR benchmarks compared to their state and national counterparts. Performance differences existed across student groups in both assessments as well as across campuses. HISD White students at all grade levels scored higher on average than their counterparts across the state and the nation. In addition, from 2015 to 2017, the percentage of ninth grade Asian and White students meeting both CCR and math benchmarks increased, and the percentage of students meeting ERW benchmarks for African American, Asian, White, and Two or more races increased.
