

## MEMORANDUM

May 13, 2011

TO: Board Members

FROM: Terry B. Grier, Ed. D.  
Superintendent of Schools

SUBJECT: **HOUSTON INDEPENDENT SCHOOL DISTRICT NATIONAL STUDENT CLEARING  
HOUSE STUDENT TRACKER DATA FOR HIGH SCHOOLS.**

This report provides an analysis of the Houston Independent School Districts' (HISD) high school graduates who attended a college or university over the last 8 years. In addition, the type of college, enrollment status, graduation status, and colleges/universities attended for a majority of HISD graduates will be provided. High school campus-level data are included at the end of this report. Furthermore, student information may be broken down at the district and school/campus level.

### Purpose

The National Student Clearinghouse is a non-profit organization that is the nation's largest source for post-secondary and secondary student degree, diploma and enrollment verification. Through verification reporting procedures, they help colleges, universities, high schools and school districts improve efficiency, reduce workload and cost, and enhance the quality-of-service they provide to their students, alumni, lending institutions, employers, and other organizations. All of the National Student Clearinghouse programs are designed to reduce the administrative burden of providing educational record verification for participating schools while maintaining the confidentiality and privacy of records.

Within the NSC organization is a program called StudentTracker, which is a unique program that is designed to help school districts more accurately gauge the college success of their graduates by answering such key questions as:

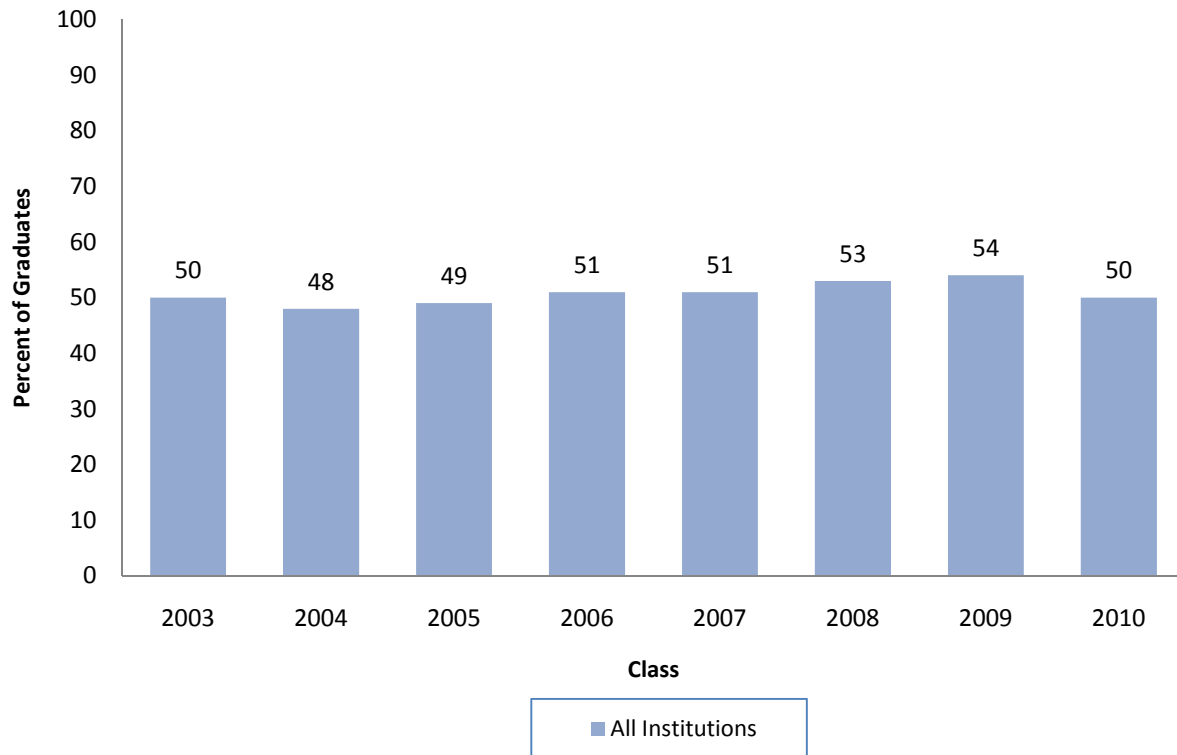

- Where do my high school graduates enroll in college?
- How long do their educational efforts persist?
- Do they transfer between colleges?
- Do they graduate from college?
- What degrees do they earn?
- What courses of study do they pursue?

StudentTracker enables administrators in school districts to access the Clearinghouse's records on over 100 million students, which represent postsecondary enrollments and achievements nationwide. They maintain records on behalf of the more than 3,300 colleges and universities that enroll 17 million students — 92% of total U.S. enrollment in higher education. These institutions have authorized the Clearinghouse to provide this information to high schools and school districts in order to help them improve their educational programs. However, it should be noted that not all graduates are found through the StudentTracker although they may have enrolled in a post secondary institution.

## Results

In the following tables, the results from the classes of 2003–2010 are presented as the percentage of students enrolled in college, institution level, institution location, and most common institutions of enrollment. Additionally, attached is a list of the most common institutions of enrollment for HISD graduates from the NSC data (**see Appendix A**).

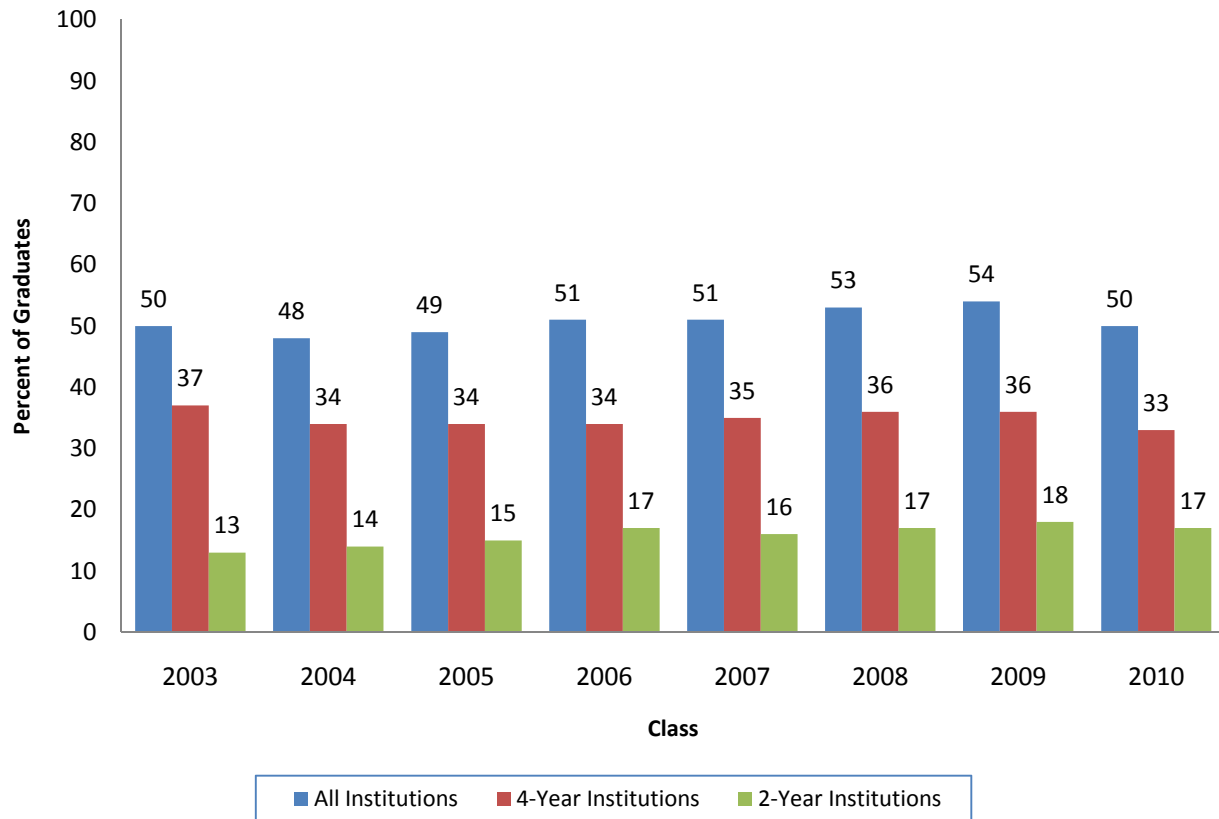

**Figure 1: Percent of Students Enrolled in College the Fall Immediately Following Graduation From High School for Each Graduating Class**

Data Source: NSC Student Tracker Table, February 2011.

- For the class of 2010, the percent of graduates who were enrolled in college immediately following graduation was 50 percent. This is a decrease of four percentage points for graduates who were enrolled in an institution from the class of 2009.
- The percent of graduates who attended college immediately after graduating from high school decreased for the first time since 2004.
- The number of students in the graduating class of 2010 increased by 501 students to 9,088 from 8,587 in the graduating class of 2009. The number of students enrolling in a college immediately after graduating from high school decreased by only 59 students from 4,616 in 2009 to 4,557 in 2010 (**see Table 1**). The large increase in graduates caused the rate of students enrolled in college immediately following graduation to decrease by four percentage points.

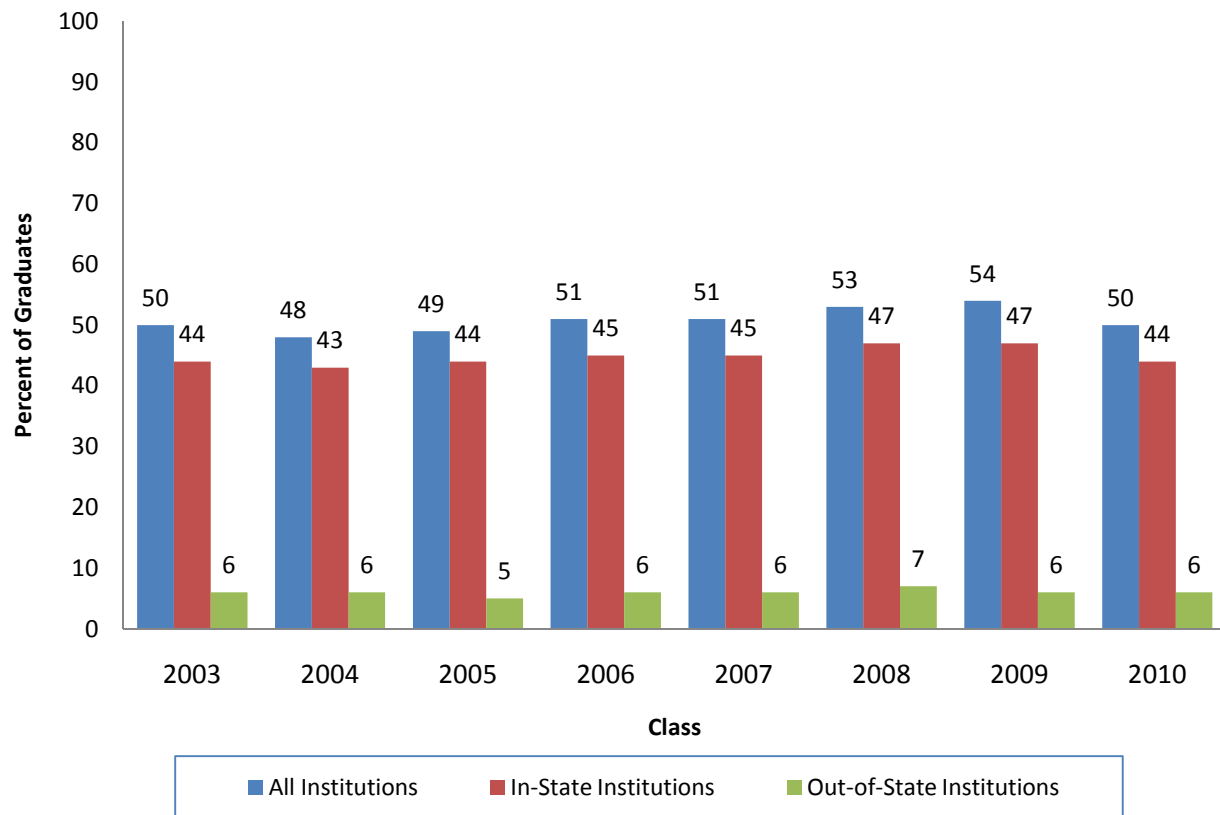

**Figure 2: Percent of Students Enrolled in College the Fall Immediately Following Graduation From High School by Institutional Level**

Data Source: NSC Student Tracker Table, February 2011.

- For the class of 2010, the percent of graduates who were enrolled in a 4-year institution was 33 percent. This was a decrease of three percentage points for graduates who were enrolled in a 4-year institution from the class of 2009.
- The percent of 2010 graduates who enrolled in a two year institution was 17 percent. This was a decrease of one percentage point from the class of 2009.
- Since 2003, the percent of students attending a 4-year institution has declined by four percent from 37 percent in 2003 to 33 percent in 2010.
- The percent of students attending a 2-year institution increased by four percentage points since 2003, from 13 percent in 2003 to 17 percent in 2010.

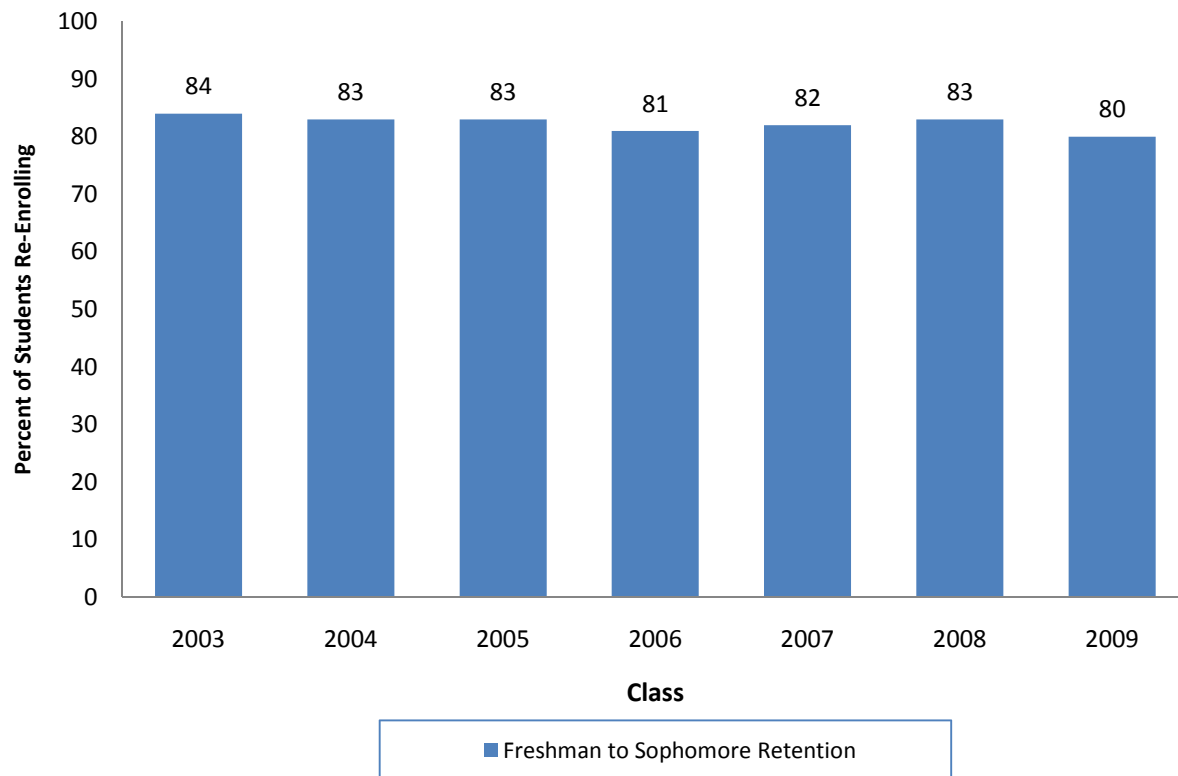

**Figure 3: Percent of Students Enrolled in College the Fall Immediately Following Graduation From High School by Institutional Location**

Data Source: NSC Student Tracker Table, February 2011.

- The percent of graduates who attend a college in-state has declined by three percent over the last year.
- The percent of graduates who attend a college out-of-state has remained constant at six percent from 2009 to 2010.
- Since 2003, the percent of students attending college in-state has remained at 44 percent.
- The percent of students attending a college out-of-state has remained the same at six percent from 2003 to 2010.

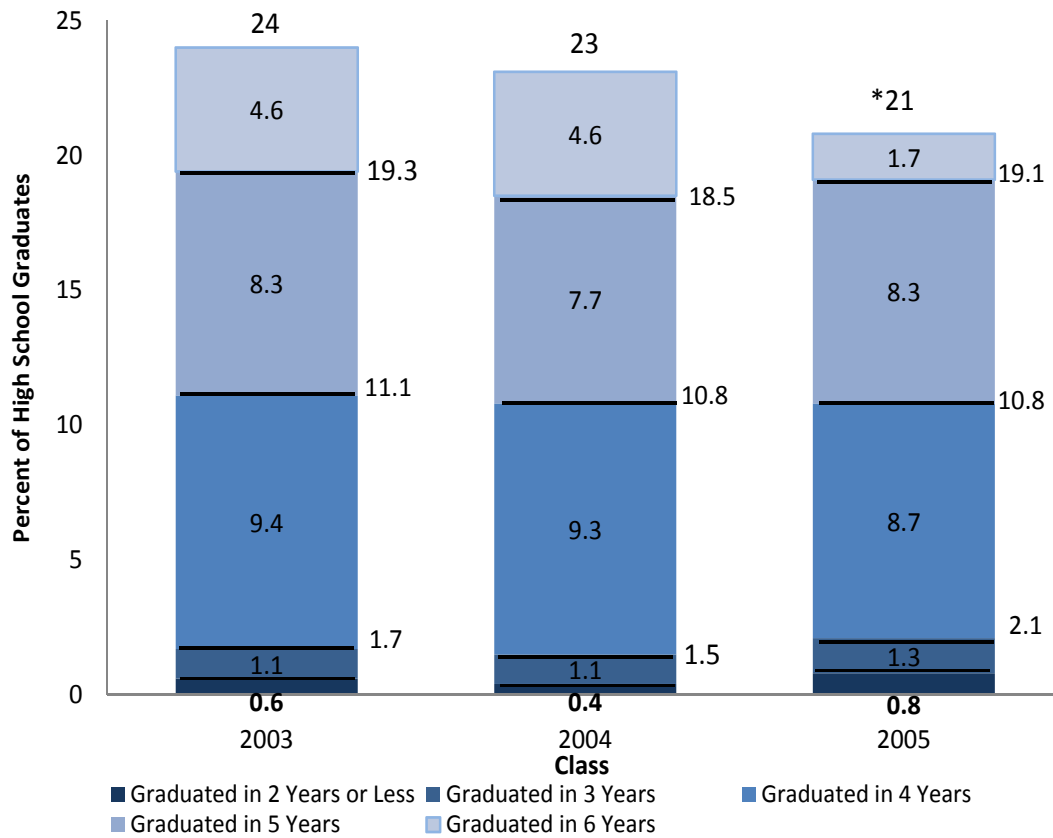

**Figure 4: Percent of Students in College the First Year After High School Who Returned for a Second Year (Freshman to Sophomore Retention)**

Data Source: NSC Student Tracker Table, February 2011.

- For the class of 2009, the percent of graduates who returned to college for a second year was 80 percent. This was a decrease of three percentage points from the graduates of the class of 2008.
- The percent of graduates who returned to college for a second year has decreased from 84 percent in 2003 to 80 percent in 2009.

Figure 5: Percent of High School Class with a College Degree

Data Source: NSC Student Tracker Table, February 2011.

\* The Class of 2005 college degree data is a preliminary percentage of student degree rates.

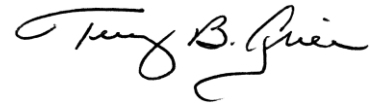

**Note:** The Percent of High School Class with a College Degree is based on a six-year degree completion rate at two-and four year institutions. Only associates, bachelors and advanced degrees are counted in these rates.

- For the class of 2005, the percent of high school graduates with a college degree is 21 percent.
- The percent of high school graduates with a college degree has decreased by two percentage points from 23 percent in 2004 to 21 percent in 2005.
- Since 2003, the percent of high school class with a college degree has declined by three percentage points from 24 percent in 2003 to 21 percent in 2005.

## School-Level Results

School-level results by campuses that were included in the National Student Clearing House StudentTracker program are available in **Tables 1–5** (see attachment). The tables also include information at the district level. The school-level results include the percent of students in college, the percent of students by institutional level, the percent of students by institutional location, the percent of freshman who returned for a second year, and the percent of students with a college degree.

Should you have any questions or require any further information, please contact me or Carla Stevens in the Department of Research and Accountability, at 713-556-6700.
