To Members of the Board of Education and Citizens of the Houston Independent School District:

The Comprehensive Annual Financial Report (CAFR) of the Houston Independent School District (the “District” or “HISD”) for the fiscal year ended June 30, 2016, is hereby submitted. This document is management’s report of financial operations to the Board of Education (the “Board”), taxpayers, grantor agencies, employees, the Texas Education Agency, and other interested parties.

The Texas Education Code requires that all school districts file an annual report with the Texas Education Agency (TEA) within 150 days of the close of each fiscal year. The annual report must be prepared in accordance with generally accepted accounting principles (GAAP) as applicable to governmental entities and must be audited by a firm of independent licensed certified public accountants. This Comprehensive Annual Financial Report is submitted in fulfillment of that requirement. An audit was conducted in accordance with *Government Auditing Standards* issued by the Comptroller General of the United States and the requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance).

To the best of our knowledge and belief, the enclosed information is accurate in all material respects and is reported in a manner designed to fairly present the financial position, as well as the financial condition of the District. Disclosures necessary to enable the reader to gain understanding of such financial operations have been included. Responsibility for the accuracy and completeness of the data presented, as well as the presentation of this report, rests with District management.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management’s Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The District’s MD&A can be found immediately following the report of the independent auditors.

PROFILE OF THE HOUSTON INDEPENDENT SCHOOL DISTRICT

The District was created and incorporated by an act of the Thirty-Eighth Legislature of the State of Texas in 1923. As an independent school district, a nine-member Board of Trustees elected from single-member districts constitutes the governing body. Based on legislative authority codified in the Texas Education Code, the trustees (1) have exclusive power and duty to govern and oversee the District; (2) can acquire and hold real and personal property, sue and be sued, and hold all rights and titles to school property; (3) shall have power to levy and collect taxes and to issue bonds; (4) can contract for appointed officers, teachers, and other personnel, as well as for goods and services; and (5) have the right of eminent domain to acquire real property.

HISD, with an enrollment of approximately 215,627 students, is the seventh-largest public-school system in the nation and the largest in Texas. Enrollment is expected to hold steady for the 2016-17 year. The District encompasses 333 square miles within greater Houston. HISD is an ethnically diverse district, as 62 percent of all students are Hispanic, 24 percent are African American, 8 percent are white and 4 percent are Asian. The other 2 percent are of other ethnicities, including American Indian, Alaskan Native, and native Hawaiian. About 100 different languages are spoken by students throughout the District, with 55 dual language schools in 2015-2016 growing to 62 in 2016-2017.

Houston Independent School District provides services through eight early childhood centers (pre-K and some include kindergarten), 159 elementary schools (grades pre-K through 5), 38 middle schools (grades 6-8), 39 high schools (grades 9-12), and 37 combination/alternative sites, for a total of 237 schools. A list of school buildings with year of construction can be found in the Statistical Data Section.

The District offers many education programs in addition to general education, including special education services, gifted and talented programs, career and technical education, dual-language programs, and various magnet programs. HISD also contracted with 14 charter schools that are funded with state tier one funds that flow through the District.

ECONOMIC OUTLOOK

Houston, the “Space City,” is the fourth-largest city in the U.S., with a population of 2.2 million and 5 million in the metropolitan area. Houston is a leader in numerous industries, including manufacturing, healthcare services, engineering, and oil and gas. In addition to great businesses, there are professional sports, first-class museums and theaters, and an excellent restaurant scene. Houston is known for oil, NASA, urban sprawl, and business-friendly policies. In 2016, Houston hosted the NCAA Final Four Basketball Tournament, and the city will host the upcoming NFL’s Super Bowl LI in 2017. Houston was ranked among the top places to visit in 2015 by the Boston Globe and Travel and Leisure magazine.

Employment in the Houston-Sugar Land-Baytown Metropolitan Statistical Area stood at 3,001,900 in June 2016, up 8,400 from one year earlier per the U.S. Bureau of Labor Statistics.

International City

Houston is truly an international city. More than one-fourth of all residents are foreign-born and more than 145 different languages are spoken in Houston. International migration represents approximately one-fourth of the region's total population growth over the past decade. Houston leads the Southwest with 92 foreign governments represented here. The Port of Houston is a 25-mile-long complex of private and public facilities located just a few hours' sailing time from the Gulf of Mexico. Over 200 million tons of cargo travels through the port annually, which is 67% of the U.S. Gulf Coast major imports, ranking the Port of Houston first in U.S. imports.

Transportation

The Houston Airport System ("HAS") is composed of three airports: Bush Intercontinental, Hobby, and Ellington Airport, home to our Spaceport. HAS contributes over \$27.5 billion to the local economy, supporting 230,000 jobs in 2015, and serving over 55 million passengers (a 4 percent increase over the prior year). The Metropolitan Transit Authority of Harris County ("METRO") operates a bus and light-rail system. The June 2016 average ridership was 240,777, an increase of 3% over June 2015.

Education and Health Services

The Texas Medical Center ("TMC") is one of Houston's largest employers, with 106,000 employees. The internationally renowned, 1,345-acre TMC is the world's largest medical center complex, with 54 member institutions, including leading medical, academic, and research institutions. TMC's University of Texas M.D. Anderson Cancer Center continues to be ranked as one of the nation's top two cancer centers in U.S. News and World Report's annual rankings of the best hospitals for cancer care. It's also home to 14 major institutions of higher learning and 100 trade, vocational, and business schools.

Summary

Houston's strategic location and core strengths, including very strong exports and imports, cutting-edge medical advancements, and technology breakthroughs across industries uniquely position the city to play a vital role in meeting national and global market demands. At a time of unprecedented geopolitical demographic shifts affecting markets worldwide, Houston stands as a leader among U.S. cities of the 21st century.

ACCOUNTING AND BUDGETARY CONTROLS

The diverse nature of the District's operations and the necessity of legal compliance preclude recording the financial transactions of the District in a single fund. The District's accounting system is organized and operated on a "fund basis." Each fund is a distinct, self-balancing accounting entity. The various funds are fully described in Note 1 of the "Notes to the Basic Financial Statements."

In developing, evaluating, and improving the District's accounting system, consideration is given to the adequacy of the internal control structure. Internal controls are designed to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and those transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with GAAP. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived, and the evaluation of costs and benefits requires estimates and judgments by management.

All internal control evaluations occur within the above-mentioned framework. We believe the District's internal control structure adequately safeguards assets and provides reasonable assurance of the proper recording of financial transactions.

As a recipient of federal, state, and local grants, the District is also responsible for an adequate internal control structure that ensures compliance with applicable laws and regulations related to these grants. All funded grants are subject to testing as part of the District's Single Audit as mandated by the Uniform Guidance. The internal control structure is subject to ongoing reviews by management.

As a part of the District's Single Audit, tests are conducted to determine the adequacy of the internal control structure as related to federal award programs as well as compliance with applicable laws and regulations. The results of the District's Single Audit for the fiscal year ended June 30, 2016, reported no instances of material weaknesses in the internal control structure over federal awards.

The District's financial system allows work-location supervisors access to a variety of business and financial reports on a real-time basis. All reports show summaries and details for transactions.

The District utilizes a line-item budget of proposed expenditures and the means of financing them. The emphasis of the budget process is to identify the activities requiring resources and to rank those activities according to the needs of the entire District. Budgetary control is maintained at the function level by organizational unit through the encumbrance of estimated purchase amounts and other expenditures to coincide with the execution of contracts, approval of personnel transactions, or release of purchase orders to vendors. Those obligations which would result in an overrun of appropriated funds are not released until additional appropriations are made available. The Board of Education approves budgets for the General Fund, Special Revenue Fund, Debt Service Fund, Capital Renovation Fund, and Nutrition Services Fund.

Lamar High School Rendition

CAPITAL PROJECTS

The Capital Renovation Fund was created to account for the District's capital projects and includes the 2012 bond program.

In November 2012, Houston voters by a margin of nearly 2 to 1 approved a \$1.89 billion bond referendum to replace and repair 40 schools, including 29 high schools. In addition, the bond program includes funds that will benefit students across the District, including funding for technology upgrades, replacement of regional field houses, athletic facilities improvements, middle-school restroom renovations, and safety and security upgrades.

Construction is underway at about two dozen campuses, with six schools opening for the start of the 2016-2017 school year. Construction contracts are expected to be executed on all but one of the remaining projects by year's end.

There is more construction underway now than at any other time in the District's history. Once all the projects are complete, HISD will have one of the most modern portfolios of urban high schools in the nation.

The Public Facility Corporation ("PFC") was established to issue bonds to provide for the acquisition of and placement in service of educational facilities in accordance with the Public Facility Corporation Act. In December 2014, the PFC issued bonds to fund ongoing construction of three new schools: North Forest High School, Fonwood Early Childhood Center, and Energy Institute High School.

For the fiscal year ending June 30, 2016, facilities acquisition and construction expenditures for the Capital Renovation Fund and the PFC amounted to \$426,150,732.

YOUNG WOMEN'S COLLEGE PREPARATORY ACADEMY

LONG-TERM FINANCIAL PLANNING

The District is subject to a target revenue formula for school district funding. Under the target revenue methodology, the District's maintenance and operations revenue from property taxes and state aid is capped. As collections from property taxes increase, state aid is reduced by the same amount. In July 2016, HISD received final notice of Chapter 41 recapture status from the Texas Education Agency because the District's wealth per student exceeds an amount set in statute. As a result, the district must remit payments back to the state. Voters will decide in November 2016 how to pay the state. The District is challenged with providing salary increases and other inflationary fixed costs within a capped budget. Therefore, the District is constantly adjusting future projections as costs in the market shift and as changes are proposed or adopted by the Texas Legislature.

MAJOR INITIATIVES

HISD Graduate Profile

With the help of community and business partners, as well as leaders from Houston's largest industries and institutes of higher education, HISD has developed the Global Graduate profile. The profile outlines six characteristics or qualities that all students will develop during their time in elementary, middle, and high school. By the time they graduate, the HISD student will be:

- A Leader – Works collaboratively and leads by example. Embraces new ideas and technologies and motivates others to be open to change.
- A Critical Thinker – Identifies and dissects issues, seeks multiple options, and critically evaluates various solutions. Understands when additional information is needed and effectively uses technology (21st-century literacies) to do research.
- A College-Ready Learner – Proficient in the core disciplines as evidenced by successful performance on state and national assessments. Works hard and persists to achieve academic and career goals.
- Adaptable & Productive – Industrious member of a global society. Demonstrates flexibility and cross-cultural skills when fulfilling personal, professional, and community experiences.
- A Responsible Decision Maker – Sets goals, develops action plans, and works hard. When faced with challenges and obstacles, is able to persist to achieve goals.
- A Skilled Communicator – Reads, writes, speaks, and listens effectively, adapting to diverse audiences and settings.

Dual Language

HISD had 55 dual language schools in 2015-2016 and that number will grow to 62 in 2016-2017, allowing students to spend a portion of their day learning in English and the rest of the day immersing themselves in culture and languages such as Spanish, Mandarin Chinese, and Arabic.

Focus on Literacy

Because being a skilled communicator is a vital tool to compete in a 21st century workplace, HISD emphasizes reading and writing competencies across subjects. The journey from pre-K student to Global Graduate is supported every step of the way.

Technology

High school students in HISD are learning on district-issued laptops they can use at school and at home – developing digital and interpersonal skills for the real world. The district is in the process of launching the HUB, a K-12 online platform that will become the center of collaboration, personalization, curriculum, instruction, and communication for HISD teachers and their students.

College and Career Readiness

HISD is combining core academics with career-based knowledge and skills in collaborative and research-intensive learning environments. Business, medical, and energy leaders across Houston are partnering with HISD to offer students work-based experiences and certifications. Advanced Placement courses are offered at every high school, and more students than ever are passing their AP exams. All HISD students in grades 9-11 have the opportunity to take the PSAT test for free, and since May 2012, every HISD junior has taken the SAT exam during regular class time for free.

AWARDS AND ACKNOWLEDGMENTS

Perhaps no responsibility is as great as that of educating our youth, and all of our efforts lead back to the classroom. Given that the District's academic advancements are dependent upon its fiscal successes, it is imperative that HISD continue to improve upon its reporting proficiencies. The following text cites awards received by the District for financial reporting excellence and the related acknowledgments in this regard.

GFOA Certificate of Achievement

The Government Finance Officers Association of the United States and Canada ("GFOA") awarded a Certificate of Achievement for Excellence in Financial Reporting to the District for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2015. This was the 43rd consecutive year that the District has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a District must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

ASBO Certificate of Excellence

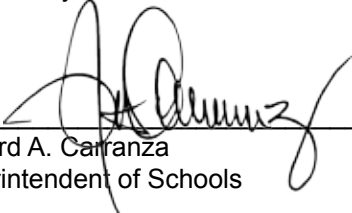

The District received the Association of School Business Officials' ("ASBO") Certificate of Excellence in Financial Reporting for the fiscal year ended June 30, 2015. The District has received this award for 37 consecutive years. This award certifies that the Comprehensive Annual Financial Report substantially conforms to the principles and standards of financial reporting as recommended and adopted by the ASBO.

Acknowledgments

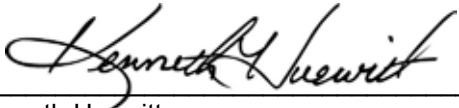

The preparation of this report on a timely basis could not be accomplished without the dedicated services of the entire staff of the District's Office of Finance. Also, we would like to express our appreciation to other departments, schools, and individuals who assisted in its preparation.

Moreover, we wish to thank and express appreciation to the administrators and other employees of the District for their interest and support in planning and conducting the financial affairs of the District in a responsible and progressive manner.

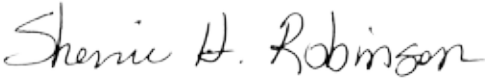

Respectfully submitted,

Independent Auditor's Report

The Board of Education
Houston Independent School District:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Houston Independent School District (the "District"), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the District, as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1 to the financial statements, in 2016, the District adopted Governmental Accounting Standards Board (“GASB”) Statement No. 72, *Fair Value Measurement and Application*. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management’s Discussion and Analysis, Schedule of Revenues, Expenditures, Changes in Fund Balance – Budget and Actual- General Fund, Special Revenue Fund, Schedule of the District’s Proportionate Share of the Net Pension Liability-Teachers Retirement System, and Schedule of the District’s Contributions – Teachers Retirement System on pages 5–16, 75, 76, 77 and 78 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the GASB who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District’s basic financial statements. The Introductory and Statistical Sections and the Other Supplementary Information and Individual and Combining Fund Statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information and Individual and Combining Fund Statements are the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Other Supplementary

Information and Individual and Combining Fund Statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory and Statistical Section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 10, 2016 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering District's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Unaudited)

Our discussion and analysis of Houston Independent School District's (the "District") financial performance provides an overview of the District's financial activities for the fiscal year ended June 30, 2016. It should be read in conjunction with the transmittal letter at the front of this report and the basic financial statements which follow this section.

The Management's Discussion and Analysis provides information on both government-wide financial statements and fund financial statements.

FINANCIAL HIGHLIGHTS

- On the government-wide financial statement of net position, the assets of the District exceeded the liabilities by \$1.975 billion. Of this amount, \$639 million is unrestricted to meet the ongoing obligations of the District.
- Total net position of the District increased from \$1.889 billion in fiscal year 2015 to \$1.975 billion in fiscal year 2016, an increase of approximately \$86 million.
- Total revenues increased \$78 million from \$2.466 billion in fiscal year 2015 to \$2.544 billion in fiscal year 2016.
- The District's governmental funds financial statements reported a combined ending fund balance in fiscal year 2016 of \$1.918 billion, an increase of \$267 million from fiscal year 2015.
- The debt obligations of the District that receive credit ratings are rated without regard to credit enhancement and received ratings of "Aaa" by Moody's Investor Service Inc. and "AA+" by Standard and Poor's Financial Services LLC. Most general obligation debt receives an enhancement to "AAA" by virtue of a guarantee by the Texas Permanent School Fund Guarantee Program. Lease revenue debt issued by the Houston Independent School District's Public Facility Corporation received ratings of "Aa1" and "AA" by Moody's Investor Service Inc. and Standard and Poor's Financial Services LLC, respectively. Rating information referenced is as of June 30, 2016.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the basic financial statements. This report also contains required supplementary information and other supplementary information in addition to the basic financial statements themselves.

Government-Wide Financial Statements

All of the District's services are reported in the government-wide financial statements, including instruction, student support services, student transportation, general administration, school leadership, facilities acquisition and construction, and nutrition services. Property taxes, state and federal aid, and investment earnings finance most of the activities. Additionally, all capital and debt financing activities are reported here.

The government-wide financial statements are designed to provide readers a broad overview of the District's finances in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the District's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the District's financial position is improving or deteriorating.

The *Statement of Activities* details how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in this statement for some items that will result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the District that are principally supported by taxes and intergovernmental revenues (governmental activities) from business-type activities that are intended to recover all or a significant portion of their costs through user fees and charges.

The government-wide financial statements include not only the District itself, but also a legally separate entity for which the District is financially accountable. Financial information for this component unit is reported separately in the fund financial statements as a nonmajor governmental fund.

Fund Financial Statements

The District uses fund accounting to keep track of specific sources of funding and spending for particular purposes. The fund financial statements provide more detailed information about the District's most significant *funds*—not the District as a whole. Funds are accounting devices that the District uses to keep track of specific sources of funding and spending for particular purposes.

- Some funds are required by state law and by bond covenants.
- The Board of Trustees establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

All of the funds of the District can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. Most of the District's activities are included in governmental funds which focus on (1) how cash and other financial assets can readily be converted to cash flow in and out, and (2) the balances left at year end that are available. However, unlike the government-wide financial statements, governmental fund financial statements provide a detailed short-term view that helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information on the subsequent page that explains the relationship (or differences) between them.

The District maintains five governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, the Special Revenue Fund, the Debt Service Fund, and the Capital Renovation Fund, all of which are considered to be major funds. Data from the Capital Renovation Fund - Public Facility Corporation is presented as a nonmajor governmental fund on the same statements.

Proprietary funds are used to account for operations that are financed similar to those found in the private sector. These funds provide both long and short-term financial information. The District maintains two types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The District uses enterprise funds to account for its nutrition services, business development, and medicaid programs. The Nutrition Services Fund is considered a major proprietary fund. The District uses internal service funds to report activities that provide services for the District's other programs and activities, i.e., health insurance, workers' compensation, print shop, and internal services. Because these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities within the government-wide financial statements.

Fiduciary funds are used to account for assets held by the District in a trustee capacity or as an agent for individuals, private organizations, and/or other funds. No fiduciary funds are used as clearing accounts to distribute financial resources to other funds. The District is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the District's fiduciary activities are reported in a separate statement of fiduciary net position and a statement of changes in fiduciary net position. We exclude these activities from the District's government-wide financial statements because the District cannot use these assets to finance its operations.

Notes to the Basic Financial Statements

The notes to the basic financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information that further explains and supports the information in the financial statements. Immediately following the required supplementary information, combining statements are included for the nonmajor enterprise funds, the internal service funds, and the agency funds.

The remainder of this overview section of management's discussion and analysis explains the structure and contents of each of the statements. Figure A-1 summarizes the major features of the District's financial statements, including the portion of the District's government they cover and the types of information they contain.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted earlier, net position may serve over time as a useful indicator of the District's financial position. The District's total net position was approximately \$1.975 billion at June 30, 2016. The District's governmental activities net position increased by \$96 million. The District's business-type activities net position decreased by \$10 million.

Net investment in capital assets (e.g. land, buildings, furniture, and equipment) less any related debt used to acquire those assets that is still outstanding is \$1.252 billion. The District uses these capital assets to provide services to students; consequently, these assets are not available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. The District's restricted net position of \$84 million represents resources that are subject to external restrictions on how they may be used. The remaining net position of \$639 million is unrestricted and may be used to meet the District's ongoing obligations.

Changes in net position. The District's total revenues were \$2.545 billion. A significant portion, approximately 70 percent, of the District's revenue is from property taxes. Operating grants and contributions provided 17 percent of revenue while 8 percent comes from state aid formula grants, and only 1 percent relates to charges for services. (See Figure A-2) The total cost of all programs and services was \$2.458 billion.

**Figure A-2 District
Sources of Revenue**

Governmental Activities

The net position of the District's governmental activities increased by \$96 million due primarily to increases in both maintenance and operations and debt service property tax revenues as a result of increasing property values. Funding for governmental activities is by specific program revenue or through general revenues such as property taxes and investment earnings. The following is a summary of the governmental activities:

- The cost of all *governmental activities* this year was \$2.317 billion.
- Some of the *governmental activities* cost was funded by program revenues directly attributable to specific activities. These program revenues amounted to \$287 million.
- The remaining cost of *governmental activities* not directly funded by program revenues was \$2.030 billion of which \$1.773 billion was funded by property taxes and \$219 million was funded by state aid which is not restricted to specific programs.

Business-type Activities

The net position of the District's business-type activities decreased by \$10 million which is primarily due to a \$7.6 million loss in the Medicaid fund. This loss was generated by a decrease in sales to customers, increase in expenditures related to implementation of new software to capture SHARS data, and transfers to the general fund. Funding for business-type activities is by specific program revenue or through general revenues such as investment earnings and miscellaneous sources. The following is a summary of the business-type activities:

- The cost of all *business-type activities* this year was \$141 million.
- The specific program revenue directly attributable to specific activities was \$159 million.

Changes in Net Position

The total net position of the District increased by \$86 million due to the following activities:

- Property tax revenues increased by \$143 million due to increases in property values.
- Increase in payroll costs, including GASB 68 pension expense, primarily in Instruction and School Leadership.
- Increase in Plant Maintenance due to minor maintenance of District buildings.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

Governmental Funds The District's accounting records for general governmental operations are maintained on a modified accrual basis as prescribed by the *Financial Accountability System Resource Guide*, Texas Education Agency, with the revenues being recorded when available and measurable to finance expenditures of the fiscal period. Expenditures are recorded when services or goods are received and the fund liabilities are incurred. The general governmental operations include the following major funds: General, Special Revenue, Debt Service, Capital Renovation, and the nonmajor governmental fund (Public Facility Corporation).

Revenues for general governmental functions totaled \$2.334 billion (excluding other sources) for the fiscal year ended June 30, 2016, an increase of 4.4 percent from the prior fiscal year. Property taxes were the largest source of revenue received by the District at 76.1 percent of total revenues. Property taxes are part of the District's target revenue funding system established by the 83rd Texas Legislature. The District earns \$5,569 per weighted average daily attendance ("WADA"). The difference between what the District collects in property taxes and the target revenue per WADA is made up in state funding through Available State Aid for Tax Reduction (ASATR). As property taxes increase, the amount of funding from the State of Texas decreases and vice versa. However, due to the increase in property values the District exceeded the minimum guaranteed revenue and no longer receives ASATR. For the first time in 2015-2016, the District was designated as a wealthy district and was sent \$4.4 million less in state revenue to equalize its wealth which is discussed in more detail later in this document.

Expenditures for general governmental operations totaled \$2.876 billion during fiscal year 2016, a decrease of 7.6 percent from fiscal year 2015. Decreases in expenditures occurred in the functional areas of instructional resources and media services, food services, data processing services, fiscal agent/member districts of shared services arrangements, and debt service fiscal charges.

The District's governmental funds financial statements reported a combined fund balance of \$1.918 billion, an increase of \$267 million. Of this amount, \$386 million is unassigned in the General Fund and is available for spending at the District's discretion. The net increase of the combined fund balances was comprised of fund balance increases in the Capital Renovation Fund of \$200 million, increases in the General Fund of \$92 million, decreases in the non-major Capital Renovation Fund of \$29 million, and a decrease of \$3 million in the Debt Service Fund. Out of the combined fund balances, \$10 million is nonspendable in the General Fund and \$342 million is set aside for other purposes in the General Fund. The remainder of the fund balance is nonspendable, restricted, committed, or assigned to indicate that it is not available for new spending.

The General Fund is the primary operating fund of the District. The fund balance of the General Fund increased \$92 million during the fiscal year primarily due to increases in property taxes. At the end of the fiscal year, the unassigned fund balance represented 22 percent of the total General Fund expenditures, while total fund balance represented 42 percent of that same amount.

The Special Revenue Fund accounts for all grants received by the District from local, state, and federal sources. The fund balance increased \$7 million primarily due to increases in revenues restricted for E-rate activities and lost textbooks.

The Debt Service Fund has a total fund balance of \$123 million all of which is restricted for the payment of debt service. The net decrease in fund balance during the period in the Debt Service Fund was \$3 million. The decrease resulted primarily from utilizing fund balance as a portion of additional non-required debt service principal payments. The District makes semi-annual debt service payments in December/June, January/July, February/August and March/September of each year. Debt service payments for the period ended June 30, 2016 included all scheduled payments including payments due within 30 days of year end.

The Capital Renovation Fund has a total fund balance of \$958 million of which \$877 million is restricted for rebuild construction programs. The fund balance increased by \$200 million due to the issuance of bonds.

The Capital Renovation Fund – Public Facility Corporation has a total fund balance of \$64 million, all of which is restricted for construction of three projects. The fund balance decreased by \$29 million due to expenditures for the construction projects.

Proprietary Funds The District maintains both enterprise funds and internal service funds. Information is presented separately in the proprietary funds statement of net position and in the proprietary funds statement of revenues, expenses, and changes in net position for the Nutrition Services Fund, which is considered to be a major fund. The net position in the Nutrition Services Fund as of June 30, 2016 was \$9 million. Of this amount, \$3 million represented the investment in capital assets with the remainder restricted for the nutrition service program.

General Fund Budgetary Highlights

Over the course of the year, the District revised its budget several times. As a result, actual expenditures were \$255.7 million less than the final appropriated budget which resulted in positive variances. These variances are the result of salaries, benefits, consultants, and contracted services being budgeted at a greater amount than expenditures. Following were the key variances:

Payroll and Benefits

Staffing is budgeted at one hundred percent of actual salary. Budget amounts for vacant positions are monitored to ensure that only limited revisions are allowed for departments. Schools have a more flexible revision policy but cannot take excess salary budgets for non-salary uses.

District-Wide

- \$45.0 million in savings from the North Forest incentive funds which is included in the assigned fund balance
- \$17.9 million in savings from the SAP project which will continue into 2016-2017
- \$15.9 million in utility savings
- \$13.0 million in savings for District projects which will continue into 2015-2016
- \$49.0 million savings due to staffing adjustments.

Campuses

- \$13.6 million savings from campus resource allocation funds (regular programs, gifted and talented, bilingual, career and technology, and high school allotment)
- \$11.2 million savings in regular department funds
- \$5.0 million savings in district programs (computer replacement and Power-Up)

The 2014-2015 carryover budget adjusted for the recommended increases and decreases resulted in an overall increase to the 2015-2016 budget of \$122.7 million or 7.05 percent.

Major increases to the General Fund budget include:

- Salary Increases - \$42.3 million
- North Forest Incentive funding - \$33.6 million
- Enrollment Increases to Campus PUA (Per Unit Allocation) - \$16.0 million
- Tax Increment Reinvestment Zone ("TIRZ") - \$8.5 million
- Capital Outlay - \$6.6 million
- Bilingual Stipend Increase - \$5.6 million
- TRS on Behalf - \$4.4M
- Movement of Programs from Title II to General Fund - \$3.9 million
- Capital Replacement Program (5-year cycle) - \$3.8 million
- Apollo Extended Day Intervention - \$1.5 million
- Campus Athletic Increase - \$1.2 million
- Grow Your Own University of Houston Partnership - \$1.0 million

Major decreases to the General Fund carryover budget include:

- Targeted Assistance - \$11.9 million
- One-time funding from prior year - \$6.4 million
- Transfers Out - \$2.9 million
- District-Wide Operating - \$1.3 million

One-time cost items to the General Fund include:

- District Bus and Police Radio Tower and System Replacement - \$8.0 million
- Bus Fleet Replacement - \$3.0 million

The final budgeted amount for revenues was \$1.747 billion. Actual revenues are over the revised budget by \$77.9 million primarily due to an increase in property taxes and increase in state aid as a result of prior years property tax audits.

Budget amendments are presented to the Board of Education for consideration and approval throughout the year.

CAPITAL ASSETS AND DEBT ADMINISTRATION

CAPITAL ASSETS

The District had invested \$3.490 billion, net of depreciation, in a broad range of capital assets, including land, buildings and improvements, furniture and equipment, and vehicles. This amount represents a net increase (including additions, deductions, and depreciation) of \$203 million over last year.

As of June 30, 2016, the District had fully funded construction commitments of \$434,215,835. More detailed information about the District's capital assets is presented in Note 6 of the "Notes to the Basic Financial Statements."

Long Term Debt

As of June 30, 2016, the District had net bonded debt outstanding of \$3.09 billion. The District debt totals included \$558 million in Variable Rate Bonds outstanding at fiscal year end. The ratio of net general bonded debt to assessed valuation and the amount of bonded debt per student are useful indicators of the District's debt position. This data reflects an increase in the ratio of net bonded debt to assessed value to 2.01 percent, as compared to 1.92 percent last year.

On April 12, 2016 the District issued \$757,195,000 of general obligation debt. This debt issuance was comprised of \$264,315,000 in refunding bonds and \$492,880,000 in new bonded debt. The new par debt along with original issuance premium utilized \$560,000,000 of the remaining unissued debt from the 2012 voter authorization. The District executed an exchange refunding totaling \$19,975,000 on April 19, 2016 and on June 1, 2016 the District issued variable rate refunding bonds with a par value of \$137,295,000 in connection with the remarketing of previously issued variable rate debt.

Outstanding variable rate debt decreased by \$69.4 million compared to prior year ending balances as a result of redemptions through use of available debt service funds. Variable rate debt as a percentage of net bonded debt outstanding as of June 30, 2016 is 18.1 percent.

The District issued refunding bonds in the amount of \$40,360,000 in order to refund previously issued Maintenance Tax Notes.

The District did not issue any contractual obligations during the year ended June 30, 2016. Contractual obligations, with a remaining balance of \$8,310,000, were previously issued for the purpose of acquiring personal property assets and are authorized pursuant to the laws of the State of Texas, including the Public Property Finance Act, Section 271.001 of the Texas Local Government Code.

Interest earnings on proceeds from debt issued since May 15, 1989, are subject to arbitrage regulations contained in the Federal Tax Reform Act of 1986. The District records the liability as an assigned part of fund balance, if needed, on an annual basis. As of June 30, 2016, no arbitrage rebate liability exists.

More detailed information about the District's long term debt is presented in Note 8 of the "Notes to the Basic Financial Statements."

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

When the 2016-2017 budget was adopted in June 2016, the District projected an increase in general fund local funding from the 2015-2016 original budgeted property tax levy of \$103.7 million, a loss of state funding of \$76.8 million. Other local sources had no change, other state revenues decreased by \$21 million due to a decrease in TRS On-Behalf of payments, and an increase in federal revenue of \$498 thousand.

The 2016-2017 state revenue projections are based on an estimated average daily attendance (ADA) of 193,009.465 or 267,857.490 based on a weighted average daily attendance (WADA).

In May 2015, the 83rd Legislature put \$3.61 billion back into Public Education for the 2015-2016 biennium. Funding of \$1.2 billion is related to the Basic Allotment, \$860 million is related to the Austin Yield, \$1.25 billion is for an increase in the state mandated homestead exemption, \$200 million is for fractional funding, and \$100 million is for the new facilities allotment. In addition to the \$3.61 billion, the state added \$2.5 billion for statewide enrollment growth for a total increase to public education of \$6.11 billion.

The District's General Fund is funded primarily between local property taxes and state revenue. Through the state's funding formula, a school district receives a basic allotment for each student with weights added to that allotment if the student receives additional services such as special education, at-risk (state compensatory education) bilingual, gifted and talented, and career and technology. The District also receives other funds on top of student generated funding, such as the high school allotment, staff allotment, and transportation.

Under the current funding system, the District has a hold harmless level called targeted revenue. With this system, the District is guaranteed a minimum amount of revenue per Weighted Average daily Attendance (WADA), between property taxes and state aid. However, the state's funding formula, Chapter 41 of the Texas Education Code, requires that if a district's wealth per student exceeds an amount set in statute, then the district must make payments back to the state through the Recapture process. Chapter 41 Recapture may be accomplished by several means, but ultimately the district ends of keeping a reduced portion of their local property taxes as wealth per student increases. State Funding and Chapter 41 are discussed in more detail in the Informational Section of this document.

In 2015-2016, for the first time, the District was considered property wealthy (Chapter 41 or "Robin Hood") and was required to equalize its wealth by trading Foundation School Program Funding in the amount of \$4.4 million to equalize its wealth. For 2016-2017, the District will owe the state approximately \$161.8 million by either sending funds to the state or by the state detaching property to another district, thereby reducing the District's wealth. The District is required to hold an election to get approval from the tax payers to send funds back to the state, which is the least financial impactful option to the District and taxpayers. Detachment does not require voter approval, however it would significantly impact both the detached property and the remaining District taxpayers. This election was held on November 8, 2016.

The Legislature put the funds back in through several changes to the funding formula.

1. The basic allotment was increased from \$5,040 to \$5,140 for 2015-2016 and 2016-2017. This base amount generated by every student in HISD.
2. The Equalized Wealth Level was changed from \$504,000 to \$514,000 for 2015-2016 and 2016-2017. This is the level at which a district becomes Chapter 41 ("Robin Hood") and must send a portion of local property taxes to the state.
3. The Tier II (Austin Yield) changed to \$74.28 in 2015-16 and \$77.53 in 2016-17. This funding is generated by \$.04 pennies of the district's tax rate approved in 2006-2007.

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET
TO THE STATEMENT OF NET POSITION
JUNE 30, 2016**

Total Fund Balances— Governmental Funds **\$ 1,917,823,857**

Amounts reported for governmental activities in the statement of net position are different because:

Capital assets used in governmental activities are not financial resources, and therefore, are not reported as assets in governmental funds. The cost of the assets is \$4,961,957,776 and the accumulated depreciation is \$1,475,027,773. 3,486,930,003

Property taxes and other receivables are not available soon enough to pay for the current period's expenditures, and therefore, are deferred in the funds. 33,183,916

Various internal service fund noncurrent assets included in the proprietary funds statement of net position. (2,240,491)

Internal service funds are used by the District's management to charge the costs of workers' compensation, health insurance, and print shop activities to the funds. A portion of the assets and liabilities of the internal service funds are included with governmental activities. 63,591,099

Long-term liabilities, including bonds payable, are not due and payable in the current period and therefore, are not reported as liabilities in the funds. Long term liabilities at year-end consist of:

Bonds payable	\$ 2,954,130,138	
Accretion of interest payable	16,790,414	
Contractual obligations payable	5,625,000	
Notes payable	35,360,000

RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF
REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES
TO THE STATEMENT OF ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

Total Net Change in Fund Balances—Governmental Funds **\$ 266,744,879**

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.

Facilities acquisition and construction	429,290,307	
Other Acquisitions and disposals	(93,991,273)	
Depreciation expense	<u>(133,006,387)</u>	202,292,647

Repayment of principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position. Proceeds from the sale of bonds is a source of financing in the governmental funds, but the statement of net position recognizes it as an increase in the long term liabilities. The changes in long term liabilities at year end consist of:

Bonds payable	(333,110,084)	
Contractual obligations payable	2,685,000	
Notes payable	5,000,000	
Amortization of premium on bonds payable	(89,987,943)	
Lease purchase payable, net	1,592,260	
Accretion payable, net	<u>40,330,696</u>	(373,490,071)

Deferred inflows of gains and losses on debt refundings are amortized over the term of the bonds in the statements but are expensed in the year incurred in governmental funds. 9,939,227

Property taxes and other receivables, that will not be collected until after the District's fiscal year end, are not considered "available" revenues and are deferred in the governmental funds. Deferred tax revenues, net of allowance for bad debt, and otherdeferred revenues increased by this amount. (5,446,494)

Interest on long-term debt in the statement of activities differs from the amount reported in the governmental funds because interest is recognized as an expenditure in the funds when it is due, and thus, requires the use of current financial resources. In the statement of activities, however interest expense is recognized as the interest accrues, regardless of when it is due. 4,378,156

The net effect of various miscellaneous transactions involving capital assets having the effect of decreasing net assets. (287,903)

In the statement of activities, compensated absences (sick pay, state personal leave, vacations) are measured by the amounts earned during the year. In the governmental funds, however, expenditures for these items are measured by the amount of financial resources used (essentially, the amounts actually paid). This year the amounts earned were exceeded by the compensated absences used. (2,981,335)

Internal service funds are used by management to charge the costs of certain activities, such as workers' compensation, health insurance, and print shop activities, to individual funds. A portion of the net revenue (expense) of the internal service funds is reported with governmental activities. (18,571,036)

GASB 68 required that certain expenditures be de-expended and recorded as deferred resource outflows. These contributions made after the measurement date of 8/31/2015 caused the change in the ending net position to increase in the amount of \$36,667,150. Contributions made before the measurement but during the 2016 FY were also de-expended and recorded as a reduction in the net pension liability for the District. This also caused an increase in the change in net position in the amount of \$5,789,926. The District recorded its proportionate share of the pension expense during the measurement period as part of the net pension liability. The amount expensed for FY2016 was \$30,726,208 and the amount de-expended for the net deferred resource inflow recognized by TRS in the measurement period was \$5,535,543. This caused a net increase in the change in net position of \$36,261,751. Amortization of the deferred resource outflows and inflows in FY 2016 was \$3,736,987 and \$21,093,045, respectively. The contributions difference for measurement period was 10,154,411. The net of these caused an increase in \$7,201,646. The impact of these adjustments is to increase the change in net position by \$13,396,971.

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

REPORTING ENTITY

The Houston Independent School District ("District") is an independent school district created and incorporated through legislation enacted by the Thirty-Eighth Texas State Legislature in 1923. The District is the largest school district in Texas and is governed by the Board of Education, composed of nine Board Members, all of whom are elected officials.

In accordance with Governmental Accounting Standards Board, a financial reporting entity consists of the primary government and its component units. Component units are legally separate organizations for which the elected officials of the District are financially accountable, or for which the relationship to the District is such that exclusion would cause the District's financial statements to be misleading or incomplete. Discretely presented component units, on the other hand, are reported in a separate column in the basic financial statements to emphasize they are legally separate from the School District. The District's blended component unit, although a legally separate entity, is in substance a part of the District's operations, and so data from this entity is combined with data of the primary government.

The criteria used to determine whether an organization is a component unit of the District includes: financial accountability of the District for the component unit, whether the District appoints a voting majority of the entity's board, the ability to impose the District's will on the component unit, fiscal dependency criterion, if it is a financial benefit to or burden to the District, and whether services are provided entirely or almost entirely to the District.

For financial reporting purposes, the Houston Independent School District Public Facility Corporation ("Public Facility Corporation") is included as a blended component unit in the operations and activities of the District. The criteria used to include the Public Facility Corporation as a blended component unit of the District include: the District appoints a voting majority of the Public Facility Corporation's governing body, the District is able to impose its will on the Public Facility Corporation, and the Public Facility Corporation serves the District exclusively as a financing vehicle for capital projects. The Public Facility Corporation's data is reported in a separate column in the governmental funds financial statements.

For financial reporting purposes, the Houston Independent School District GEAR UP Trust ("GEAR UP Trust") is included in the fiduciary activities of the District because of the financial accountability of the District, the appointment of a voting majority, and the fiscal dependency criteria whereby the GEAR UP Trust serves the District's students exclusively. The GEAR UP Trust was incorporated to ensure that the scholarship funds are properly spent and to guarantee a college scholarship to the eligible students at participating schools of the GEAR UP program. The GEAR UP financial information is blended with that of the District in the Statement of Fiduciary Net Position for Private-Purpose Trust Funds. Separate financial statements for GEAR UP Trust are not issued.

GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

The Statement of Net Position and the Statement of Activities of the government-wide financial statements report information on all of the nonfiduciary activities of the District and its blended component unit. The District eliminates from the Statement of Net Position and the Statement of Activities most interfund receivables, payables and transfers between funds. Interfund services provided and uses are not eliminated in the process of consolidation. Governmental activities,

**HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Program revenues include (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions. Program revenues included in the Statement of Activities reduce the cost of the function to be financed from general revenues. Taxes and other items not properly identified as program revenues are reported instead as general revenues.

The District reports all direct expenses by function in the Statement of Activities. Direct expenses are those clearly identifiable with a function. Depreciation expense is specifically identified by function and is included in the direct expense to each function.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds. In accordance with the provisions of GASB Statement No. 34, the fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major enterprise funds are reported as separate columns in the fund financial statements.

MEASUREMENT FOCUS, BASIS OF ACCOUNTING AND FINANCIAL STATEMENT PRESENTATION

Government-wide Financial Statements -- The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place, regardless of the timing of the related cash flows. Revenues, expenses, gains, losses, assets, and liabilities resulting from nonexchange transactions are recognized in accordance with GASB Statement No. 33. Property taxes are recognized as revenues in the year for which they are levied. Grants, and similar items, are recognized as revenue as soon as all eligibility requirements have been met and funds are available to meet current expenditures.

Fund Financial Statements -- Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. State aid and miscellaneous revenues, other than property taxes, are considered to be available when they are collected within the current period or within 90 days of the fiscal year end to pay liabilities of the current period. Property taxes are considered to be available if collected within 60 days of the fiscal year end. Expenditures are generally recognized under the modified accrual basis of accounting in the accounting period in which the fund liability is incurred, if measurable. However, debt service expenditures are recognized in the current fiscal period for debt service principal and interest payments due within 30 days in the subsequent fiscal period as these funds have been set aside for that purpose. Compensated absences and claims and judgments are recorded only when payment is due. Proprietary fund statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Fiduciary fund statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*.

During the fiscal year 2016, the District adopted GASB Statement 72, *Fair Value Measurement and Application* which clarifies the definition of fair value for reporting purposes, provides additional fair value application guidance by establishing a hierarchy that prioritizes the inputs used to measure fair value, and improves fair value disclosures.

Funds

The District reports its financial activities through the use of “fund accounting.” The activities of the District are organized on the basis of funds. The operations of each fund are accounted for within a separate set of self-balancing accounts to reflect results of activities. Fund accounting segregates funds according to their intended purpose and is used to assist management in demonstrating compliance with finance-related legal and contractual provisions. As required by the Texas Education Agency, the following fund types are included in the financial statements:

Governmental Funds

Governmental Funds are those through which most governmental functions of the District are financed. The acquisition, use and balances of the District's expendable financial resources, and the related liabilities are accounted for through the Governmental Fund Types. The following are the District's major governmental funds:

- *General Fund* -- The General Fund is the general operating fund of the District and accounts for all revenues and expenditures of the District not encompassed within other funds.
- *Special Revenue Fund* -- The Special Revenue Fund is used to account for the proceeds of specific revenue sources (other than private-purpose trust funds or capital projects) such as federal, state or locally financed programs where unused balances are returned to the grantor at the close of specified project periods. Funds are legally restricted to expenditures for specified purposes.
- *Debt Service Fund* -- The Debt Service Fund is used to account for the accumulation of resources for, and the retirement of, general long-term debt and related costs.
- *Capital Renovation Fund* -- The Capital Renovation Fund is used to account for financial resources to be used for the acquisition, renovation or construction of major capital facilities other than those financed by proprietary funds.

Proprietary Funds

Proprietary Funds are used to account for operations that are financed in a manner similar to those found in the private sector, where the determination of net income is appropriate for sound financial administration.

- *Enterprise Funds* -- The Enterprise Funds are used to account for operations that are financed and operated in a manner similar to a private enterprise where the District's intent is to provide services financed primarily through user charges. The Nutrition Services Fund is considered a major proprietary fund as defined by GASB Statement No. 34. The Nutrition Services Fund accounts for services provided to District students and includes all federal and state funds for such services.
- *Internal Service Funds* -- The Internal Service Funds are used to account for operations related to the Print Shop, Alternative Certification Program, Athletics, University Interscholastic League (“UIL”), Shared Services, Virtual School, and risk financing activities of the District.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the District's proprietary funds are charges to customers and other

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

funds for sales and services. Operating expenses for proprietary funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Fiduciary Funds

Fiduciary Funds are used to account for assets held by the District in a trustee capacity or as an agent for individuals, private organizations and/or other funds.

- *Private-Purpose Trust Funds* -- Private-purpose trust funds are used to account for resources legally held in trust under which principal and income benefit individuals, private organizations or other governments. The District's private-purpose trust funds represent scholarship funds being held in trust for students.
- *Agency Funds* -- Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations. The District's agency funds represent school class and club activity funds. The District does not use clearing accounts to distribute financial resources to other funds of the District.

ASSETS, LIABILITIES, AND NET POSITION OR EQUITY

Cash and Cash Equivalents

The District's *Cash Management and Investment Policy* requires all deposits to be fully collateralized with depository insurance; obligations of the United States of America or its agencies and instrumentalities (excluding those mortgage backed securities prohibited by the Public Funds Investment Act); public funds investment pools; or in any other manner and amount provided by law for deposits of the District. At all times, such securities are to have a fair value sufficient to fully collateralize deposit balances as adjusted by the amount of applicable depository insurance pursuant to Texas Government Code Section 2257.022.

The District considers cash and cash equivalents to be cash on hand and demand deposits. All other monetary assets are treated as investments including certificates of deposit, investment pools, money market instruments, and other securities defined under the Public Funds Investment Act.

Investments

Investments are stated at fair value, which is the amount at which the investment can be exchanged in a current transaction between willing parties. Management of the District believes that in the areas of investment practice, management reports, and establishment of appropriate policies, the District adhered to the requirements of the State of Texas Public Funds Investment Act. Additionally, management of the District believes that investment practices of the District were in accordance with local policies.

Receivables and Payables

All trade and property tax receivables are shown net of allowance for uncollectibles. The property tax receivable allowance is 62.2 percent of outstanding property taxes at June 30, 2016.

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

Inventories and Prepaids

Under the moving average method of accounting for inventories, the average cost of each inventory item in stock is recalculated after every inventory purchase. This method tends to yield inventory valuations and cost of goods sold that are in-between those derived under the first in, first out (FIFO) method and the last in, last out (LIFO) method. These materials and supplies are subsequently charged to expenses/expenditures when consumed. Inventories include plant maintenance and operating supplies as well as instructional supplies. Revenue for donated commodities is recognized when the commodities are received. Inventories and prepaids are offset at year end by non-spendable fund balance in the governmental fund financial statements.

The purchases method of accounting was utilized for a prepaid lease executed as part of a sale and leaseback (operating lease) of a district facility.

Grant Fund Accounting

The Special Revenue Fund includes programs that are financed on a project grant basis. These projects have grant periods that range from less than twelve months to in excess of two years. Grants are recorded as revenues when earned, which the District considers to be earned to the extent expenditures have been incurred, and the District has met all eligibility requirements. Funds received, but not earned, are recorded as unearned revenues until earned.

Indirect costs earned from grant programs are recorded as revenues of the General Fund. These indirect costs are determined by applying approved indirect cost rates to actual expenditures of the programs.

Encumbrances

Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of funds are recorded in the accounting system in order to reserve the portion of the applicable appropriation, is employed in the Governmental Fund Types on the governmental fund financial statements. Encumbrances, which have not been liquidated, are reported as restricted, committed, or assigned fund balances.

Capital Assets

Capital assets, which include land, buildings and improvements, furniture and equipment, and vehicles are reported in the applicable governmental and business-type activities columns in the government-wide financial statements and proprietary fund financial statements. Capital acquisition and construction are reflected as expenditures in governmental funds. Land, buildings and improvements, furniture and equipment, and vehicles are recorded at historical cost or estimated historical cost if purchased or constructed. The capitalization threshold is a unit cost of \$5,000. Donated capital assets are recorded at estimated fair value at the date of donation. Depreciation on all depreciable capital assets begins on the date the asset is placed into service using the straight-line method of depreciation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the life of the asset are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

Capital assets are depreciated over the following estimated useful lives:

<u>Asset Classification</u>	<u>Useful Life</u>
Buildings and improvements	40 years
Vehicles:	
Buses	12 years
Medium	7 years
Small	5 years
Furniture	5 years
Equipment	5 years

Interfund Transactions

Activities between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as “due to/from other funds.” All other balances between funds are reported as transfers. Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide statements as “internal balances.”

A description of the basic types of interfund transactions and the related accounting policies are as follows:

- Charges for services are reported as revenues for the performing fund and expenditures/expenses of the requesting fund.
- Transactions to reimburse a fund for expenditures made by it for the benefit of another fund are recorded as expenditures or expenses in the reimbursing fund and as a reduction of expenditures or expenses in the fund that is reimbursed.
- All other interfund transfers, such as legally authorized transfers from a fund receiving revenue to the fund through which the resources are to be expended, are transfers. Transfers are classified as other financing sources or uses in the Statement of Revenues, Expenditures, and Changes in Fund Balances.

For reporting at the government-wide financial statement level, the District eliminates direct interfund charges for services and the balances created within the same activity categories (i.e. governmental vs. business-type). This process ensures neither governmental nor business-type activities report direct internal revenue/expenditures. Interfund activity and balances resulting from transactions with the fiduciary funds are not eliminated. Instead, the fiduciary interfund activity and balances are treated as transactions with an external party. The Internal Service Funds are essentially repositories for income, expenses, assets and liabilities of the District’s health insurance, worker’s compensation, print shop, alternative certification, athletics, shared services, and UIL.

Compensated Absences

The District’s contract employees earn one day of sick leave per month for all months under contract, which may either be taken or accumulated with no limitation. Accumulated sick leave

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

balances are not paid upon termination from the District, except those paid on retirement or death of employees who meet certain eligibility requirements and were hired prior to October 10, 1972.

Twelve-month employees earn vacation ranging from two to four weeks per year based on length of service. Vacation days may be carried over from one contract year to another with a maximum limit of 30 days. For twelve-month employees, the contract runs from September 1st through August 31st.

The District accrues vacation, state personal leave, and eligible sick leave in the government-wide and proprietary fund financial statements. A liability and related expenditure for these amounts is reported in the governmental funds only if they have matured as a result of employee retirements or resignations and are due.

The District's compensatory time policy requires that compensatory time be taken by the end of the school year in which it was earned. At June 30, 2016, the District had no material liability for compensatory time.

Long-term Liabilities

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the Statement of Net Position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Deferred gains and losses are classified as deferred inflows or outflows of resources. Deferred gains and losses are amortized over the life of the bonds using the straight-line method. Bond issuance costs are no longer amortized over the term of the bonds but instead are expensed in the period incurred.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances – total governmental funds* and *changes in net position of governmental activities* as reported in the government-wide statement of activities. One element of that reconciliation explains that “Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense.” The details of this \$202,292,647 difference are as follows:

FUND BALANCES AND NET POSITION

Government-wide Financial Statements

Net assets on the Statement of Net Position includes the following:

Net investment in capital assets -- the component of net position that reports capital assets less both the accumulated depreciation and the outstanding balance of debt and is directly attributable to the acquisition, construction, or improvement of these capital assets.

Restricted for capital acquisition program -- the component of net position that reports the difference between assets and liabilities of the capital acquisition program consists of assets with constraints placed on their use by the bond contracts and covenants contained therein.

Restricted for debt service -- the component of net position that reports the difference between assets and liabilities adjusted on a government-wide basis that consists of assets with constraints placed on their use by the bond covenants.

Restricted for nutrition service -- the component of net position that reports the difference between assets and liabilities of the Nutrition Services Fund that consists of assets with constraints placed on their use by the Department of Agriculture and the Texas Education Agency.

Unrestricted -- the difference between the assets and liabilities that are not reported in net position invested in capital assets, net of related debt, or restricted net assets.

The District applies restricted resources before unrestricted resources when an expense is incurred for which restricted net position is available.

Governmental Fund Financial Statements

In the fund financial statements, governmental funds report fund balances as either a non-spendable fund balance or a spendable fund balance.

Non-spendable Fund Balance

Non-spendable fund balance is that portion of fund balance that is not expendable (such as inventories) or is legally earmarked for a specific use (such as a self-funded reserves program). Non-spendable fund balance reserves may include inventories, prepaid items, deferred expenditures, and long-term receivables.

**HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

Spendable Fund Balance

Spendable fund balance is composed of restricted, committed, assigned, and unassigned portions. Components of the spendable fund balance include:

Restricted Fund Balance -- the component of the spendable fund balance constrained to a specific purpose by the provider, such as a grantor. Restricted fund balance includes funds for the child nutrition program, technology program, construction programs, and resources from other granting agencies.

Committed Fund Balance -- the component of the spendable fund balance constrained to a specific purpose by a resolution approved by the Board. Those committed amounts cannot be used for any other purpose unless the Board removes or changes the specified use by taking the same action used to establish it. Committed fund balance includes funds for potential litigation, claims, and judgments.

Assigned Fund Balance -- the component of the spendable fund balance that is spendable or available for appropriation, but has been tentatively earmarked for some specific purpose by the Superintendent or Chief Financial Officer. The assigned amounts can only be removed by the Superintendent or Chief Financial Officer. Assigned fund balance includes funds for encumbrances which are purchase orders, contracts, and other commitments for the expenditure of funds that are carried forward, insurance deductibles, specific program costs, and other legal issues.

Unassigned Fund Balance -- the component of the spendable fund balance which may be spent for any legal purpose. This portion of the total fund balance in the general fund is available to finance operating expenditures.

In general, it is HISD policy (CE Local) to consider restricted resources to have been spent first when an expenditure is incurred for purposes for which restricted and unrestricted (i.e. committed, assigned, or unassigned) fund balances are available, followed by committed and then assigned fund balances. Unassigned amounts are used only after the other resources have been used.

Stewardship, Compliance, and Accountability

The Board of Education adopts an appropriated budget for the General Fund, Special Revenue Fund, Debt Service Fund, Capital Renovation Fund and Nutrition Services Fund. The District is required to present the adopted and final amended budgeted revenues and expenditures and actual revenues and expenditures for the General Fund and Special Revenue Fund, which are considered major funds as defined by GASB Statement No. 34. Both the General Fund Budget and the Special Revenue Fund Budget appear in the required supplementary information section where the District compares the final amended budget to actual revenues and expenditures.

Management's Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

NOTE 2: HISD PUBLIC FACILITY CORPORATION

The Public Facility Corporation is a public non-profit corporation, the creation of which was sponsored by the District pursuant to the Public Facility Corporation Act, Article 717s, Vernon's Texas Civil Statutes, as amended (the "Public Facility Corporation Act"). The Public Facility Corporation Act authorizes the creation and utilization by school districts of public facility corporations to issue bonds to provide for the acquisition, construction, rehabilitation, renovation, repair, equipping, furnishing and placing in service of public facilities of its governmental sponsor and further authorizes the governmental sponsor to incur lease purchase obligations in favor of the corporation to serve as security for the bonds issued by the Public Facility Corporation.

To accomplish the financings, the Public Facility Corporation and the District have entered into a number of "Leases With An Option to Purchase" pursuant to the terms of which the District will pay to the Public Facility Corporation such lease payments at such times and in such amounts as will be required to pay the principal and premium, if any, and interest on the lease revenue bonds as they become due.

The Public Facility Corporation has utilized this structure to issue Lease Revenue Bonds for building two high schools in 1998, a food warehouse facility in 2006, four elementary schools in 2010 and three instructional facilities in 2015.

NOTE 3: CASH DEPOSITS AND INVESTMENTS

Statutes of the State of Texas and policies mandated by the District's Board of Education authorize the District to invest in obligations of the U.S. Government or its agencies, repurchase agreements, commercial paper, corporate bonds, public fund investment pools, mutual funds and money market accounts. All cash balances and investments are held separately in each of its funds.

Funds held at the depository bank were properly secured at all times with the exception of June 30, 2016. The following disclosure pertains to the date of highest deposit:

- a. Name of depository bank: JP Morgan Chase Bank
- b. Amount of bond or security pledged as of the date of the highest combined balance on deposit was \$46,573,689.
- c. Highest cash and savings deposit combined account balances amounted to \$40,531,544 and occurred on March 15, 2016. The collateral requirement that applied to total deposits that day was \$40,281,544.
- d. Total amount of Federal Deposit Insurance Corporation ("FDIC") coverage at the time of highest combined balance was \$250,000 for all accounts.

Cash, Demand and Time Deposits

As of June 30, 2016, the carrying amount of the District's demand deposits and cash on hand was \$4,671,961. The \$8,873,364 bank balance was not fully covered on June 30, 2016 by federal deposit insurance through the FDIC and collateralization by securities held by the District's depository in joint safekeeping at the Federal Reserve Bank in the District's name. The District was under collateralized by \$2,324,503 on that date. The HISD Public Facility Corporation's \$283,316 was held in a money market account at the Bank of New York Mellon Trust Company, N. A.

The District has purchased nonnegotiable certificates of deposit issued by East West Bank, Independent Bank, and Unity Bank, of \$90,000,000, \$10,000,000, and \$240,000, respectively, as of June 30, 2016, for a total of \$100,240,000, or 4.79 percent of the investment portfolio. The collateral for the East West Bank certificates is comprised of a Federal Home Loan Bank Letter of Credit in the amount of \$92,700,000 issued with the District as beneficiary. The collateral for the Independent Bank certificate of deposit is comprised of a federal Home Loan Bank Letter of Credit in the amount of \$10,000,000 issued with the District as beneficiary. Unity Bank's certificate of deposit is covered in full by Federal Deposit Insurance Corporation ("FDIC"); therefore, it requires no additional collateral under the Public Funds Investment Act, Section 2257.022.

Investments

In accordance with the provisions of GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools* ("GASB Statement No. 31"), the District's investment securities have been recorded at fair value based upon quoted market prices as of June 30, 2016, with the increase or decrease in fair value being recorded as a component of earnings on investments. None of the District's investment securities have been reported at amortized cost.

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

The District's investments in public funds investment pools and money market mutual funds include those with the Lone Star Investment Pool ("LSIP"), TexSTAR, and TexPool. The fair value of the District's position in the above pools is the same as the value of the pool shares.

LSIP is a public funds investment pool created pursuant to the Interlocal Cooperation Act of the State of Texas, Article 4413(32c), Vernon's Texas Civil Statutes, as amended, and is designed to provide participating local governments with investment vehicles for local funds that may be required for immediate expenditure. The primary objective of the LSIP is to emphasize the importance of safety of principal and liquidity of Pool assets. The administrator and distributor of LSIP is First Public, LLC, a Texas limited liability company. Investment advisory services are provided by American Beacon Advisors and Standish Mellon Investment Asset Management Company. The custodial account is managed by State Street Bank and Trust while CAPTRUST Financial Advisors provides investment consulting services.

The Lone Star Government Overnight Fund is a stable value fund rated AAAM by Standard & Poor's rating service and the Corporate Overnight Plus Fund is a stable net asset value fund seeking to maintain a net asset value of \$0.50 and is rated AAAf/S1+ by Standard & Poor's.

The District's investment in LSIP's Government Overnight Fund and the Corporate Overnight Plus Fund, as of June 30, 2016, was \$126,548,555 and \$449,842,999, respectively, for a total of \$576,391,554 representing 27.55 percent of the total portfolio.

TexPool is a public funds investment pool operated by the Texas Treasury Safekeeping Trust Company, an entity of which the Texas Comptroller of Public Accounts is the sole officer, director, and shareholder. Administrative and investment services are provided by Federated Investors, Inc., and the assets are kept in a separate custodial account at the State Street Bank in the name of TexPool. TexPool and TexPool Prime funds are rated as AAAM by Standard & Poor's.

As of June 30, 2016, the District's investment in TexPool and TexPool Prime was \$295,425,259 and \$260,393,747, respectively, with a value of \$555,819,006 representing 26.57 percent of the total portfolio.

TexSTAR was created in April 2003, also under the Interlocal Cooperation Act. It is administered by Hilltop Securities, Inc. and J.P. Morgan Investment Management. JPMorgan Investment Management, Inc. provides investment advisory services. The fund is rated AAAM by Standard & Poor's.

As of June 30, 2016, the District's investment in TexSTAR was \$275,048,072, or 13.15 percent of the portfolio. As with all the investment pools, funds are readily available to support daily cash requirements. The balance includes the HISD Public Facility Corporation's \$65,417,029 invested in TexSTAR through its trustee, the Bank of New York Mellon Trust Company, N.A. These funds are restricted for use in the building of specific school projects as defined in bond issuance documents.

The District has invested in U.S. Agency Securities, issued by Federal Farm Credit Bank ("FFCB"), Federal Home Loan Bank ("FHLB"), Federal Home Loan Mortgage Corporation ("FHLMC"), Federal National Mortgage Association ("FNMA"). Investments in these securities total \$481,189,504 and represent 23.00 percent of the value of the total portfolio.

The District has invested in Treasury Bonds and Treasury Notes, issued by the United States government. Investments in these U.S. Treasury securities total \$55,094,490 and represent 2.63 percent of the value of the total portfolio.

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

The District has invested in Municipal Bonds, issued by local or state governments. Investments in these Municipal Bonds total \$48,139,436 and represent 2.30 percent of the value of the total portfolio.

GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, an amendment to GASB Statement No. 3, establishes and modifies disclosure requirements related to deposits and investment risks: credit risk (including custodial credit risk and concentrations of credit risk), interest rate risk, and foreign currency risk.

To ensure compliance with the various risk factors addressed in GASB Statement No. 40, the District's Investment Advisory Committee reviewed the *Cash Management and Investment Policy*. The *Cash Management and Investment Policy* is reviewed by the Investment Advisory Committee at least annually and presented to the Board of Education for approval. The Investment Officers submit a Quarterly Investment Report to the Board of Education certifying that all investments were purchased in compliance with the *Cash Management and Investment Policy*.

The District's *Cash Management and Investment Policy* contains the following objectives:

- (1) assure the safety of District's funds;
- (2) maintain sufficient liquidity to provide adequate and timely working funds;
- (3) maintenance of the public trust as custodians and managers responsible for the investing of funds subject to state and federal laws;
- (4) optimization of yield as expressed in terms of rate of return and interest earnings;
- (5) diversification of investments as relating to maturity, instruments, and issuers shall be considered a priority within the context of the overall investment policy; and
- (6) avoid investments for speculation.

All objectives are approached with the judgment and care, under the circumstances then prevailing, which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the safety of the capital, as well as the probable income to be derived. Preservation of District capital is of highest importance. All participants in the investment process seek to act responsibly as custodians of the public trust. Investment officials avoid any transaction that might impair public confidence in the District's ability to govern effectively.

Interest Rate Risk

As a means of limiting its exposure to fair value losses that could occur from rising interest rates, the District's investment policy limits the maturities of investments and prohibits any investment for speculative gains. The available funds in the General Fund may be invested for greater than one year provided that all cash flow requirements have been met. Available monies in all other funds, except for bond proceeds, can be invested for a period of up to ten years provided that cash flow needs are met. Bond proceeds can be invested for a period up to five years provided that the drawdown schedules permit such maturities.

The District recognizes that investment risks can result from market price changes. Portfolio diversification is employed as a way to control risk. Investment officers are expected to display prudence in the selection of securities, as a way to minimize risk. No individual investment transaction shall be undertaken which jeopardizes the total capital position of the overall portfolio.

At June 30, 2016, the District's exposure to interest rate risk as measured by segmented time distribution by investment type is summarized below:

Credit Risk

The District's *Cash Management and Investment Policy* allows for investments in commercial paper provided it meets the following criteria:

1. the maximum maturity does not exceed 270 days from the date of issuance;
2. it is rated at least A1 or P1 by two nationally recognized credit rating agencies or by one agency when fully secured by an irrevocable letter of credit from a United States (nationally associated) or state (state associated) bank;
3. be issued for a specific face amount;
4. be issued either through a direct placement or through broker dealers;
5. the District will diversify its investment in commercial paper by issuer and by length of maturity; and
6. the maximum the District will have in commercial paper at any time is 30 percent of the District's portfolio.

As of June 30, 2016, the District did not have any investments in commercial paper. The District's exposure to credit risk at June 30, 2016 is presented below by investment category as rated by Standard & Poor's along with the District's level of input hierarchy utilized to measure fair values:

GASB Statement Number 72 established a hierarchy that prioritizes the inputs used to measure fair value. Certain investment types utilized by the District are not required to be fair valued. These investments included local government investment pools and certificates of deposit owned by the District at June 30, 2016. Debt securities classified as Level 2 have used a number of pricing methodologies including matrix pricing, Bloomberg Valuation and Interactive Data Corporation inputs. The District additionally chooses to utilize the average of three price inputs from separate providers. Since these are not prices quoted for identical securities quoted in active markets they are not classified as Level 1 inputs.

Federal Farm Credit Bank (FFCB), Federal Home Loan Bank (FHLB), Federal Home Loan Mortgage Corporation (FHLMC), and Federal National Mortgage Association (FNMA) are instrumentalities of U.S. Government; otherwise known as government sponsored corporations. These instrumentalities are established by law to implement the Federal Government's various lending programs. These instrumentalities frequently do not have individual debt offerings rated therefore the credit rating disclosed is the overall long term rating of the entity.

Custodial Credit Risk - Funds on deposit with the depository bank are collateralized by pledged approved securities, surety bonds, or Federal Home Loan Bank Letters of Credit as specified by Section 45.208, Subchapter G, of Texas Education Code in order to adequately protect the funds of the District. Further, the District will require pledged securities at least equal to that set forth in Texas Government Code Chapter 2257.022, Subchapter B, Depository: Security For Deposit of Public Funds (currently 110 percent of the amount of the deposit if a reducing value security and equal to the deposit otherwise). The District has the right to designate the amount of approved securities and/or the aggregate amount of the bond to adequately protect the District. The District may not designate an amount less than the balance of school district funds on deposit with the depository bank from day to day, less any applicable Federal Deposit Insurance Corporation insurance. The approved securities shall be valued at market value for purposes of calculating the designated amount of collateral required. The bank shall have the right and privilege of substituting approved securities upon obtaining the approval of the District.

**HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

The Federal Deposit Insurance Corporation provides deposit insurance limits of \$250,000 for all accounts in total.

Investments purchased for Houston Independent School District are made in the name of the Houston Independent School District. All investments are purchased with the delivery versus payment method and are recorded in the District's name on the Federal Reserve's book entry system and confirmed to the District via safekeeping receipt maintained on the books of the depository bank's safekeeping department.

Investments purchased for the Houston Independent School District Public Facility Corporation (PFC) are purchased in the name of the PFC and held by the trustee, Bank of New York Mellon, as stipulated in related bond documents.

Concentration of Credit Risk - The investment portfolio is diversified to eliminate the risk of loss resulting from over concentration of assets in a specific maturity, a specific issue, or a specific class of securities. Within the cash flow requirement constraints, investment maturities are staggered in a way that avoids undue concentration of assets in a specific maturity sector.

As of June 30, 2016 no single investment security (FFCB, FHLB, FHLMC, FNMA, Municipal Bonds or U.S. Treasury) comprised more than 2.87% of the total investment portfolio. Investments with the FHLB constituted a concentration greater than 5.00% of the total portfolio by issuer.

The maximum asset mix approved by the investment policy is as follows:

<u>Type</u>	<u>District Limit</u>	<u>Issuer Limit</u>
U.S. Government Securities	100%	100%
Investment Pools*	100%	40%
U.S. Agency Securities	80%	40%

*The District does not invest its portfolio in any single investment pool. Funds are subdivided between various pools for diversification and security reasons. Investments in any pool will be limited to 25% of the average Net Asset Value of that pool.

The District is prohibited from investing in the following types of investments:

- a. obligations whose payment represents the coupon payments on the outstanding principal balance of the underlying mortgage-backed security collateral and pays no principal;
- b. obligations whose payment represents the principal stream of cash flow from the underlying mortgage-backed security collateral and bears no interest;
- c. collateralized mortgage obligations that have a stated final maturity date of greater than 10 years;
- d. collateralized mortgage obligations whose interest rate is determined by an index that adjusts opposite to the changes in a market index; and
- e. banker's acceptances.

Foreign Currency Risk

The District does not engage in any deposit or investment transactions involving foreign currency.

NOTE 4: PROPERTY TAXES AND STATE AID REVENUE

Property Taxes

The appraisal of property within the District is the responsibility of the Harris County Appraisal District ("Appraisal District"). The District's property taxes are levied annually in October on the basis of the Appraisal District's assessed values of property as of January 1 of that calendar year and are due by January 31 of the next calendar year. Such taxes are applicable to the fiscal year in which they are levied and become delinquent with an enforceable lien on property after January 31 of the subsequent calendar year. Delinquent taxes receivable on the government-wide statement of net assets and the governmental fund balance sheet is net of estimated uncollectible taxes.

The District is permitted to levy taxes up to \$1.6367 per \$100 of assessed valuation for general governmental services and for the payment of principal and interest on general obligation long-term debt. For the current fiscal year, the Board of Education set a tax rate of \$1.19670 per \$100 of assessed valuation. The maintenance and debt service portions of such rate are \$1.0267 and \$0.17, respectively. The 2015 assessed valuation was \$152,860,482,797 which resulted in a gross tax levy of 1,776,902,751 for the current fiscal year. The 2015 net tax levy of 1,776,902,751 reflects an adjustment of \$52,378,646 of frozen homestead exemptions for taxpayers 65 years and older as mandated by state property tax laws.

Property taxes which are measurable (quantifiable) and available (collectible within the current period or soon enough thereafter to finance expenditures of the current period, which the District has estimated to be collected in the two months after the fiscal year end) are recognized as revenue in the year of levy in the governmental fund financial statements. Property taxes, which are measurable but not available, are recorded net of estimated uncollectible amounts, as deferred revenues in the year of the levy in the governmental financial statements. Such deferred revenues are recognized in the fund financial statements as revenue in the fiscal year in which they become available. In the government-wide financial statements, property taxes are recognized as revenues in the year for which the taxes are levied. Uncollectible property taxes in the current period decreased the allowance for uncollectible property taxes in the government-wide and fund financial statements by \$1,452,431.

State Aid Revenue

The Texas Education Agency, through its application of state law, allocates state revenues to school districts by formula allocation. The District receives two allocations—a per capita allocation and a foundation program allocation. The District also recognizes revenues for the state's share of the contributions to the Teacher Retirement System of Texas (TRS). See Note 11 for additional information on the employee's retirement plan. Other state revenues are received through other state miscellaneous programs on an allocated basis. The components of state aid as shown in the governmental fund financial statements are as follows:

<u>Revenues</u>	<u>Amount</u>
Per Capita Revenues	\$ 35,116,457
Foundation Fund Revenues	193,415,639

These balances resulted from the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system, and (3) payments from funding agencies are received. The primary interfund transactions included amounts due from the Nonmajor Enterprises funds to the General Fund for use of unrestricted revenues.

The following is a summary of the District's transfers for the fiscal year ended June 30, 2016:

\$ 10,841,776	From the General Fund to the Debt Service Fund for interest and principal debt payments
15,553,307	From the General Fund to the Capital Renovation Fund to fund the "Pay as you go" initiative and other board authorized projects
12,868,881	From the Capital Renovation Fund to the Debt Service Fund for TIRZ High School payments
30,400,000	From Nonmajor Enterprise Funds to the General Fund for use of unrestricted revenues
\$ 69,663,964	Total transfers

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, and (4) use unrestricted revenues collected in an internal service fund to finance activities in another internal service fund.

**HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

On June 1, 2016, the District currently refunded Variable Rate Limited Tax Schoolhouse Bonds, Series 2014A-1 which were subject to be remarketed on that date and immediately remarketed the bonds in two series; \$37,295,000 Variable Rate Limited Tax Schoolhouse Bonds, Series 2014A-1A and \$100,000,000 Variable Rate Limited Tax Schoolhouse Bonds, Series 2014A-1B. The \$168,040,000 in bonds scheduled to be remarketed was reduced by the District utilizing \$26,825,000 in available debt service funds to redeem bonds and the use of a portion of the issuance premium of \$4,254,909 in order to extinguish an additional \$3,920,000 in bonds.

The \$137,295,000 of bonds were issued with two term periods having coupon interest rates of 2.00% and 3.00%, respectively. The two sub-series were remarketed with terms of one year for the 2014A-1A sub-series and two years for the 2014A-1B sub-series. The final stated maturity of each sub-series remained the same at June 1, 2039. Costs of issuance and underwriter's discount for the remarketing series were \$89,213 and \$245,696, respectively.

Variable Rate Limited Tax Bonds, Series 2014A-1A

2039	2018	\$ 100,000,000	3.00%	1.06%
		<u>\$ 100,000,000</u>		

All outstanding bonds of the \$168,040,000 Variable Rate Limited Tax Schoolhouse Bonds, Series 2014A-1 were defeased and removed from the Districts' schedule of debt. Due to the nature of the Variable to Variable rate refunding and remarketing there is no applicable present value savings calculation nor was there an actual gain or loss on the transaction.

The maximum rate of sub-series 2014A-1A and 2014A-1B cannot exceed the maximum net effective interest rate permitted under Chapter 1204 Texas Government Code, as amended. Following the new rate periods, the bonds will convert to and bear interest at a term rate to be determined by the remarketing agent. Subsequent to the new rate periods the interest rate modes may be changed to a weekly rate, monthly rate, quarterly rate, semiannual rate, flexible rate or converted to a fixed rate until stated maturity. The Bonds are subject to mandatory tender at the end of the new rate period. In the event of a failed remarketing for either sub-series, a step rate of 7.00% will be invoked until such time as the bonds are successfully remarketed. A failed remarketing will not be considered an event of default.

Contractual Obligations are issued for the purpose of acquiring personal property assets and are authorized pursuant to the laws of the State of Texas, including the Public Property Finance Act, Section 271.001 of the Texas Local Government Code. The District did not issue any contractual obligations in the fiscal year ended June 30, 2016.

Notes issued by the District are maintenance tax notes. The maintenance tax notes were issued to provide funding for improvements to and rehabilitation of school facilities. Maintenance tax notes are authorized under Section 45.108 of the Texas Education Code. The District did not

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

Other long-term debt

Arbitrage -- The Federal Tax Reform Act of 1986 requires issuers of tax-exempt debt to make payments to the United States Treasury of investment income received at yields that exceed the issuer's tax-exempt borrowing rates. The U.S. Treasury requires payment for each issue every five years. The District had no arbitrage liability for tax-exempt debt subject to the Tax Reform Act issued through June 30, 2016. The estimated liability is updated annually for any tax-exempt issuances or changes in yields until such time payment of the calculated liability is due. Liabilities resulting from issuances in the General Fund are typically liquidated in the General Fund. Liabilities resulting from issuances in the Capital Renovation Fund are liquidated in the Capital Renovation Fund if unspent proceeds are remaining.

Compensated Absences -- On retirement or death of certain employees who meet eligibility requirements, the District pays any accumulated sick leave as an employer contribution to a 403(b) plan in the employee's name to such employees or the estates of the employees. Individuals employed after October 9, 1972 are not eligible to receive the lump-sum cash payments. Additionally, certain employees are entitled to receive accrued vacation pay in a lump-sum cash payment upon termination of employment with the District. The net increase of \$3,013,151 over the prior fiscal year represents the recorded liability for employees vesting in the accumulated sick leave program adjusted by the amounts paid employees retiring from the District. The General Fund has typically been used in prior years to liquidate compensated absences.

Capital Leases – Leased Computer Equipment -- In 2002, the District entered into capital leases with Apple Lease Financing and HP Lease Financing. Each lease meets the criteria of a capital lease as defined by generally accepted accounting principles, which define a capital lease generally as one which transfers benefits and risks of ownership to the lessee.

Capital assets acquired by lease have been capitalized in an amount equal to the present value of the future minimum lease payments at the time of acquisition. Principal and interest payments in fiscal year 2015 totaled \$10,789,539 and \$371,886, respectively. Principal and interest payments in fiscal year 2016 totaled \$13,053,260 and \$893,522, respectively. The General Fund has typically been used in prior years to liquidate capital lease liabilities.

The future minimum lease obligations and the net present value of these minimum equipment lease payments as of June 30, 2016 were as follows:

Year Ending June 30	Governmental Activities
2017	\$ 13,946,782
2018	10,875,096
2019	5,421,442
2020	835,560
	<hr/>
Total minimum lease payments (Gross Amt.)	31,078,880
Amount Representing Interest at 5.6517%	(1,662,527)

NOTE 9: OPERATING LEASES

The District leases offices facilities and instructional educational facilities under noncancellable operating leases. Total cost for such leases was \$391,597 for the fiscal year ended June 30, 2016. The future minimum lease payments for these leases were as follows:

Year Ending <u>June 30</u>	<u>Amount</u>
2017	\$ 89,943
2018	53,262
2019	45,232
\$	<u>188,438</u>

NOTE 10: RISK MANAGEMENT

The District is exposed to various risks related to torts: theft of, damage to and destruction of assets; errors and omissions; and natural disasters. The District's risk management program encompasses various means of protecting the District against losses through policies with commercial insurance carriers or through self-insurance.

Workers' Compensation

The District maintains a self-insurance program for workers' compensation. Contributions are paid from all governmental and proprietary funds to the Workers' Compensation Internal Service Fund from which all claims and administrative expenses are paid. Claims administration, loss control, and consultant services are provided by a third party administrator. The District maintains a catastrophic loss insurance policy for catastrophic losses exceeding \$1,000,000 per occurrence up to statutory limit of liability.

An accrual for incurred but not reported claims in the amount of \$9,528,684 (discounted at .5 percent), of which \$5,027,831 is the current portion, has been recorded in the fund as of June 30, 2016. Claims payable, including an estimate of claims incurred but not reported, was actuarially determined based on the District's historical claims experience and an estimate of the remaining liability on known claims.

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

At June 30, 2016, the fund had net position of \$30,840,331. Changes in claims payable for the fiscal years ended June 30, 2015 and 2016 are as follows:

	<u>2016</u>	<u>2015</u>

Claims payable, end of fiscal year	<u>\$ 9,528,684</u>	<u>\$ 11,691,382</u>

Health Insurance

Effective January 1, 2002, the District established a self-insurance program for health insurance. Contributions are paid from all governmental and proprietary funds to the Health Insurance Internal Service Fund from which all claims and administrative expenses are paid. Claims administration and consultant services are provided by a third party administrator. The District maintains aggregate stop loss coverage for medical cost.

The District is insured for covered medical paid and incurred during the plan year by Aetna under an annual aggregate insurance contract. The coverage provides that the insurer will reimburse the District for such paid claims that exceed an annual aggregate attachment point that is determined by a monthly amount per covered employee based on the tier of coverage enrolled.

An accrual for incurred but not reported claims in the amount of \$12,596,000, of which \$12,491,540 is the current portion, has been recorded in the fund as of June 30, 2016. Claims payable, including an estimate of claims incurred but not reported, was actuarially determined based on an estimate of the remaining liability on known claims.

**HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

At June 30, 2016, the fund had net position of \$25,311,114. Changes in claims payable for the fiscal years ended June 30, 2015 and 2016 are as follows:

	<u>2016</u>	<u>2015</u>

Property, Casualty, General and Professional Liability

The District purchases All-Risk Property Insurance with limits of \$250,000,000. The policies include sublimits of \$75,000,000 per occurrence for flood and quake and \$150,000,000 per occurrence for Named Storms. General and Professional Liability risks are insured with limits of \$9,750,000. Within these policy limits, the District's exposure for covered losses is limited to the policy deductibles and self-insured retentions. Automobile liability exposures are self-insured in Texas and insurance coverage is purchased for out of state risks with a \$1,000,000 limit. The District has not had any claims in excess of its policy limits in the past three years.

NOTE 11: EMPLOYEES' RETIREMENT PLAN

Plan Description

The District's Teacher Retirement System is a defined benefit plan, in which a retired employee receives a specific amount based on salary history and years of service, and in which the employer bears the investment risk. The District's employees are covered by the Teacher Retirement System of Texas ("TRS"). TRS, a public employee retirement system ("PERS"), is a multiple-employer, defined benefit pension plan. It is a cost sharing PERS with one exception: all risks and costs are not shared by the District but are the liability of the State of Texas. By statute, the State of Texas contributes to the retirement system an amount equal to the current authorized rate multiplied by the aggregate annual compensation of all members of the retirement system during that fiscal year. The District's covered payroll and the total payroll for the year ended June 30, 2016 were \$1,221,845,231 and \$1,286,671,450, respectively. For members of the retirement system entitled to the State's statutory minimum salary for school personnel, the District pays the State's contribution on the part of the member's salary that exceeds the statutory minimum.

Types of Employees Covered

All members of public state-supported educational institutions in Texas who are employed for one-half or more of the standard workload and who are not exempted from membership under the Texas Government Code are covered by the plan.

Benefit Provisions and Service Requirements

TRS administers retirement and disability annuities and death and survivor benefits to employees and beneficiaries of employees of the public school system of Texas. It operates primarily under the provisions of the Texas Constitution Article XVI, Section 67 and the Texas Government Code, Title 8, Subtitle C, Chapter 803 and 805, respectively. Service requirements are as follows:

Normal -- Age 65 with 5 years of credited service, or when the sum of member's age and years of credit equals or exceeds 80.

Reduced -- Age 55 with at least 5 years of credited service, or any age below 50 with 30 or more years of credited service but the sum of member's age and years of credited service total less than 80.

Members are fully vested after five years of creditable service and are entitled to any benefit for which eligibility requirements have been met. For more detail about benefits see the Summary of Benefits section of TRS 2015 Comprehensive Annual Financial Report.

Contributions

Contribution requirements are not actuarially determined, but are legally established each biennium pursuant to the following state funding policy: (1) the state constitution requires the legislature to establish a member contribution rate of not less than 6 percent of the member's annual compensation and a state contribution of not less than 6 percent and not more than 10 percent of the aggregate annual compensation of all members of the system during the fiscal year, (2) a state statute prohibits benefit improvements if, as a result of the particular actions, the time required to amortize TRS's unfunded actuarial liabilities would be increased to a period that

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

exceeds 31 years, or if the amortization period exceeds 31 years, the period would be increased by such action.

Employee contribution rates are set in state statute, Texas Government Code 825.402. Senate Bill 1458 of the 83rd Texas Legislature amended Texas Government Code 825.402 for member contributions and established employee contribution rates for fiscal years 2014 thru 2017. The 83rd Texas Legislature, General Appropriations Act (GAA) established the employer contribution rates for fiscal years 2014 and 2015. The 84th Texas Legislature, General Appropriations Act (GAA) established the employer contribution rates for fiscal years 2016 and 2017.

Contribution Rates

	<u>2015</u>	<u>2016</u>
Member	6.7%	7.2%
Non-Employer Contributing Entity (State)	6.8%	6.8%
Employers	6.8%	6.8%
District's 2016 District Contributions	\$	44,318,451
District's 2016 Member Contributions	\$	87,054,182
District's 2015 NECE On-Behalf Contributions	\$	54,118,137

Contributors to the plan include members, employers and the State of Texas as the only non-employer contributing entity. The State contributes to the plan in accordance with state statutes and the General Appropriations Act (GAA).

As the non-employer contributing entity for public education, the State of Texas contributes to the retirement system an amount equal to the current employer contribution rate times the aggregate annual compensation of all participating members of the pension trust fund during that fiscal year reduced by the amounts described below which are paid by the employers. Employers including public schools are required to pay the employer contribution rate in the following instances:

- On the portion of the member's salary that exceeds the statutory minimum for members entitled to the statutory minimum under Section 21.402 of the Texas Education Code.
- During a new member's first 90 days of employment.
- When any part or all of an employee's salary is paid by federal funding source or a privately sponsored source.

In addition to the employer contributions listed above, there are two additional surcharges an employer is subject to.

- When employing a retiree of the Teacher Retirement System the employer shall pay both the member contribution and the state contribution as an employment after retirement surcharge.
- When a school district does not contribute to the Federal Old-Age, Survivors and Disability Insurance (OASDI) Program for certain employees, they must contribute 1.5% of the state contribution rate for certain instructional or administrative employees; and 100% of the state contribution rate for all other employees.

Actuarial Assumptions

The total pension liability in the August 31, 2015 actuarial valuation was determined using the following actuarial assumptions:

Valuation Date	August 31, 2015
Actuarial Cost Method	Individual Entry Age Normal
Asset Valuation Method	Market Value
Single Discount Rate	8.00%
Long-term expected Investment Rate of Return	8.00%
Inflation	2.5%
Salary Increases Including Inflation	3.5% to 9.5%
Payroll Growth Rate	2.5%
Benefit Changes During the Year	None
Ad hoc Post Employment Benefit Changes	None

The actuarial methods and assumptions are primarily based on a study of actual experience for the four year period ending August 31, 2014 and adopted on September 24, 2015.

Discount Rate

The discount rate used to measure the total pension liability was 8.0%. There was no change in the discount rate since the previous year. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers and the non-employer contributing entity are made at the statutorily required rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term rate of return on pension plan investments is 8%. The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return for each major asset class included in the Systems target asset allocation as of August 31, 2015 are summarized below:

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2016, the District reported a net pension liability of \$ 299,723,414 for its proportionate share of the TRS's net pension liability. This liability reflects a reduction for State pension support provided to the District. The amount recognized by the District as its proportionate share of the net pension liability, the related State support, and the total portion of the net pension liability that was associated with the District were as follows:

District's Proportionate share of the collective net pension liability	\$ 299,723,414
State's proportionate share that is associated with the District	645,866,011
Total	\$ 945,589,425

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

The net pension liability was measured as of August 31, 2015 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The employer's proportion of the net pension liability was based on the employer's contributions to the pension plan relative to the contributions of all employers to the plan for the period September 1, 2014 thru August 31, 2015.

At August 31, 2015 the employer's proportion of the collective net pension liability was 0.008479058 which was a decrease of 0.002302345 from its proportion measured as of August 31, 2014.

Changes since the Prior Actuarial Valuation

The following are changes to the actuarial assumptions or other inputs that affected measurement of the total pension liability since the prior measurement period:

Economic Assumptions

1. The inflation assumption was decreased from 3.00% to 2.50%.
2. The ultimate merit assumption for long-service employees was decreased from 1.25% to 1.00%.
3. In accordance with the observed experience, there were small adjustments in the service-based promotional/longevity components of the salary scale.
4. The payroll growth assumption was lowered from 3.50% to 2.50%.

Mortality Assumptions

5. The post-retirement mortality tables for non-disabled retirees were updated to reflect recent TRS member experience. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.
6. The post-retirement mortality tables for disabled retirees were updated to reflect recent TRS member experience. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.
7. The pre-retirement mortality tables for active employees were updated to use 90% of the recently published RP-2014 mortality table for active employees. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.

Other Demographic Assumptions

8. Previously, it was assumed 10% of all members who had contributed in the past 5 years to be an active member. This was an implicit rehire assumption because teachers have historically had a high incidence of terminating employment for a time and then returning to the workforce at a later date. This methodology was modified to add a more explicit valuation of the rehire incidence in the termination liabilities, and therefore, these 10% are no longer being counted as active members.
9. There were adjustments to the termination patterns for members consistent with experience and future expectations. The termination patterns were adjusted to reflect the rehire assumption. The timing of the termination

***HOUSTON INDEPENDENT SCHOOL DISTRICT
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016***

decrement was also changed from the middle of the year to the beginning to match the actual pattern in the data.

10. Small adjustments were made to the retirement patterns for members consistent with experience and future expectations.
11. Small adjustments to the disability patterns were made for members consistent with experience and future expectations. Two separate patterns were created based on whether the member has 10 years of service or more.
12. For members that become disabled in the future, it is assumed 20% of them will choose a 100% joint and survivor annuity option.

Actuarial Methods and Policies

13. The method of using celled data in the valuation process was changed to now using individual data records to allow for better reporting of some items such as actuarial gains and losses by source.

There were no changes of benefit terms that affected measurement of the total pension liability during the measurement period.

For the measurement period August 31, 2015, the District recognized pension expense of \$92,025,515 and revenue of \$92,025,515 for support provided by the State in the Government Wide Statement of Activities.

At June 30, 2016, the District reported its proportionate share of the TRS's deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual Actuarial experience	\$ 3,704,077	\$ 11,518,638
Changes in Actuarial Assumptions	15,568,322	10,692,819
Difference between projected and actual investment earnings	73,815,202	66,015,254
Changes in proportion and difference between the employer's contributions and the proportionate share of contributions	-	52,673,955
Contributions paid to TRS subsequent to the measurement date	38,274,687	-
Total	\$ 131,362,288	\$ 140,900,666

The net amounts of the employer's balances of deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended August 31:	Pension Expense Amount
2017	\$ (12,338,740)
2018	(12,338,740)
2019	(12,338,740)

Health Care Plan Description (TRS-Care)

The District contributes to the Texas Public School Retired Employees Group Insurance Program (TRS-Care), a cost-sharing, multiple-employer, defined benefit, other post-employment benefit (OPEB) plan. TRS-Care Retired Plan provides health care coverage for certain persons (and their dependents) who retired under TRS. The statutory authority for the program is Texas Insurance Code, Chapter 1575.

Types of Employees Covered

All members of TRS public school retirees with more than 10 years of service and their dependents.

Contributions

Employees of the District were required to pay 7.85 percent of their eligible gross earnings to TRS. Of the 7.85 percent, 0.65 percent was a contribution towards TRS-Care retiree health insurance. Effective September 1, 2003, the Texas legislature enacted legislation related to the funding of TRS-Care. House Bill 3459 of the 78th Legislature increased the 0.25 percent active member contribution to 0.5 percent of salary and added a new contribution from school districts for 0.4 percent of salary of each active employee. Effective September 1, 2005, the 79th Legislature enacted changes to increase the 0.5 percent of salary of each active member contribution to TRS-Care to 0.65 percent of salary and increased the 0.4 percent contributions from school districts to 0.55 percent of salary of each active employee. The State of Texas, active public school employee, and the District contribution rates are as follows:

	Contribution Rates
Member	0.65%
Non-Employer Contributing Entity (State)	1.00%
District	0.55%

Per Texas Insurance Code, Chapter 1575, the public school contribution may not be less than 0.25% or greater than 0.75% of the salary of each active employee of the public school.

Medicare Part D

The Medicare Modernization Act of 2003 (MMA) created an outpatient prescription drug benefit program known as Medicare Part D. The Texas Public School Retired Employee Group Insurance Program (TRS-Care) is offering a Medicare Part D Plan and is participating in the Retiree Drug Subsidy plan for eligible TRS-Care participants. For the years ended August 30, 2016 & August 31, 2015 the subsidy payments received by TRS-Care on behalf of the District were \$4,330,923 and \$4,307,962, respectively. TRS issues a publicly available financial report. That report may be found by visiting the TRS Web site at www.trs.state.tx.us.

NOTE 12: COMMITMENTS AND CONTINGENCIES

The District received significant financial assistance from numerous federal and state governmental agencies in the form of grants. The disbursements of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and are subject to audit by the grantor agencies and the Texas Education Agency. Any disallowed claims resulting from such audits could become a liability of the General Fund.

NOTE 13: SUBSEQUENT EVENT

In July 2016, Houston ISD received final notice of Chapter 41 recapture status for 2016-2017 from the Texas Education Agency. The Board of Education chose to present to voters on the November 8, 2016 ballot the option to purchase attendance credits to equalize the District's wealth. The voters did not approve this option; thus, HISD is subject to the detachment of property resulting in the Texas Education Agency (TEA) detaching an estimated \$17.4 billion in commercial properties from HISD and reassigning to other school districts until the property wealth in the district equals the Equalized Wealth Level (EWL) set in statute. In addition, HISD will lose revenue generated from the debt service component of the District's tax rate beginning in the 2017-2018 fiscal year.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE FISCAL YEAR ENDED JUNE 30, 2016
(UNAUDITED)**

Note 1: Stewardship, Compliance, and Accountability

The District uses the following procedures in establishing the budgets reflected in the financial statements:

- Prior to June 30th of the preceding fiscal year, the District prepares a budget for the next succeeding fiscal year beginning July 1. The operating budget includes proposed expenditures and the means of financing them.
- Public hearings are conducted to obtain citizens' comments. However, the final priorities and funding of projects are determined by the Board of Education that establishes a tax rate to support the approved budget.
- A meeting of the Board of Education is then called for the purpose of adopting the proposed budget.
- Budgets are approved on a fund-by-fund basis. The District can make amendments to the budget at any time during the year; however, amendments changing functional expenditure categories or revenue object accounts (as defined in the Texas Education Agency's *Financial Accountability System Resource Guide*) must be approved by the Board of Education. Additionally, the Board of Education formally reviews the budget twice during the fiscal year.
- Budgets are considered a management control and planning tool and, as such, are incorporated into the accounting system of the District.
- Annual budgets are legally adopted for the General Fund, the Special Revenue Fund, the Debt Service Fund, the Capital Renovation Fund, and the Nutrition Services Fund. For reporting purposes, the Nutrition Services Fund reports actual results as in an enterprise funds. The budgets are prepared on a basis of accounting that is used for reporting in accordance with generally accepted accounting principles and are monitored by the Budgeting Office. By state law, expenditures may not legally exceed budgeted appropriations, as amended, at the function level by fund. Unexpended appropriations lapse at the end of the fiscal year.

Note 2: Change of Benefit Terms

There were no changes of benefit terms that affected measurement of the total pension liability during the measurement period.

Note 3: Changes of Assumptions

The following are changes to the actuarial assumptions or other inputs that affected the measurement of the total pension liability since the prior measurement period.

Economic Assumptions

1. The inflation assumption was decreased from 3.00% to 2.50%.
2. The ultimate merit assumption for long-service employees was decreased from 1.25% to 1.00%.
3. In accordance with the observed experience, there were small adjustments in the service-based promotional/longevity components of the salary scale.

4. The payroll growth assumption was lowered from 3.50% to 2.50%.

Mortality Assumptions

5. The post-retirement mortality tables for non-disabled retirees were updated to reflect recent TRS member experience. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.
6. The post-retirement mortality tables for disabled retirees were updated to reflect recent TRS member experience. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.
7. The pre-retirement mortality tables for active employees were updated to use 90% of the recently published RP-2014 mortality table for active employees. Mortality rates will be assumed to continue to improve in the future using a fully generational approach and Scale BB.

Other Demographic Assumptions

8. Previously, it was assumed 10% of all members who had contributed in the past 5 years to be an active member. This was an implicit rehire assumption because teachers have historically had a high incidence of terminating employment for a time and then returning to the workforce at a later date. This methodology was modified to add a more explicit valuation of the rehire incidence in the termination liabilities, and therefore these 10% are no longer being counted as active members.
9. There were adjustments to the termination patterns for members consistent with experience and future expectations. The termination patterns were adjusted to reflect the rehire assumption. The timing of the termination decrement was also changed from the middle of the year to the beginning to match the actual pattern in the data.
10. Small adjustments were made to the retirement patterns for members consistent with experience and future expectations.
11. Small adjustments to the disability patterns were made for members consistent with experience and future expectations. Two separate patterns were created based on whether the member has 10 years of service or more.
12. For members that become disabled in the future, it is assumed 20% of them will choose a 100% joint and survivor annuity option.

Actuarial Methods and Policies

13. The method of using celled data in the valuation process was changed to now using individual data records to allow for better reporting of some items such as actuarial gains and losses by source.

FINANCIAL SECTION

2016 COMBINING
AND INDIVIDUAL FUND
STATEMENTS AND
SCHEDULES

NON-MAJOR ENTERPRISE FUNDS

The **Business Development Fund** is used to account for the financial operations of the District's Marketing Office. The Marketing Office was organized to help develop and coordinate the District's efforts in marketing for the sale of goods and services to other school districts. Primary relationships between HISD and other school districts are through cooperative purchasing programs or inter-local agreements, both of which are statutorily authorized ways for governmental entities to acquire goods or services. Activities involve the marketing and development of products and services developed through vendor/HISD partnerships including benefits programs and an online driver's education program.

The **Medicaid Fund** is used to account for the financial operations of special education reimbursement programs. The District participates in a Medicaid reimbursement program, which is a federal program to provide partial reimbursement for health care services provided to eligible children. In addition, the District currently provides Medicaid advisory services to over 500 schools in over 100 Texas school districts.

The **Marketplace and Catering Fund** is used to account for the financial operations of the restaurant-style cafeteria on the first level of the Hattie Mae White (HMW) Educational Support Center. The District established the Marketplace years ago as a benefit to employees working in the HMW building. The Marketplace currently serves approximately 320 employees on a daily basis and provides catering services to departments within and outside of Hattie Mae White. Recently, a full service catering department was added to this fund in an effort to increase revenue to subsidize the Marketplace as well as to promote HISD catering activities.

INTERNAL SERVICE FUNDS

The **Print Shop Fund** is used to account for all the printing and distribution activities of the District's two print shop facilities. Schools and departments are charged for the costs of printing and distribution requests. During non-peak times, the Print Shop contracts with other governmental agencies requiring assistance during their peak periods. The District also has reciprocal agreements with other governmental agencies in the event a backlog of jobs is experienced by District users.

The **Health Insurance Fund** is used to account for the health insurance plan administered by the District. The plan is a self-insured plan requiring the District and its employees to contribute the cost. The District contributes approximately 71.14 percent of the annual cost of the plan with employees paying for the remaining 28.86 percent. These contributions are paid from all governmental and proprietary funds to the Health Insurance Fund from which all claims and administrative expenses are paid.

The **Workers' Compensation Fund** is used to account for risk financing activities related to the self-insured workers' compensation program. All employees of the District are covered by this plan for injuries occurring on the job. The District contributes 100 percent of the funding for this program.

The **Internal Services Fund** is used to account for the fee-for-services offered by the District to serve the specific needs of schools and departments. The Alternative Certification, Athletics, UIL, Virtual School, and Shared Services programs are accounted for within this fund.

AGENCY FUNDS

The **Centralized Activity Fund** was created in 1977 for the purpose of providing centralized accounting for school activity funds. As of June 30, 2016, one hundred-eight seven schools are in the program. The program also includes accounting for activity funds of various administrative departments or groups. Centralized accounting includes deposits to a central depository, funds invested by the Treasury Department for best utilization of cash balances, check writing, ledger maintenance and reporting provided through the district's accounting system. Schools in the district are required to maintain uniform accounting records.

Prior to the 2015-16 school year, elementary schools maintained the accounting records at their respective campuses, and deposited monies and issued disbursements from their own bank accounts. During the 2015-16 school year, all elementary schools activity funds were centralized and their bank accounts were closed.

NOTES: Governmental Funds Expenditures include those made by the following funds: General, Special Revenue, Debt Service, Capital Renovation, and the nonmajor governmental fund (Public Facility Corporation).

The debt service ratio is calculated by dividing total debt service (principal and interest) by total noncapital expenditures. Noncapital expenditures are total expenditures less capital outlay (to the extent capitalized for the government-wide statement of net position) and expenditures for capitalized assets included within the functional expenditure categories. The calculation for the debt service ratio in the year reported is as follows: (140,278,176 + 157,739,465) / (2,875,716,177 - 417,086,402 - 203,287,228) where 417,086,402 is the portion of capital outlay capitalized in the government-wide statements.

The current refundings in fiscal years 2012, 2015 and 2016 have been deducted from non-capital expenditures in order to insure comparability between years.

Prior to FY2014 Interest and Fiscal charges were reported in aggregate.
