Classroom Numbers

Current breakdown of classroom numbers. Impacted families will receive their new class placement by Monday, October 12, 2020. We are unable to take request for placement with a specific teacher

[Reopening Class Numbers](#)

Instructional Models:

- All students will continue to use components of the technology; particularly the HUB
- Teachers will be allowed to record content for virtual students as needed, however the focus will still continue to be providing a combination of synchronous and asynchronous instruction
- The virtual daily times will change to match the in-person schedule. This allows virtual students to keep pace with in-person students and makes transition back to face to face easier for students

Infection Protocols

- An isolation area will be established for students who experience COVID symptoms while at school.
- If a student or employee becomes ill while at school. The following will occur:
 - Nurse immediately notified to investigate; a specific protocol is followed and the same for each situation
 - Nurse will contact parents of the child to investigate and complete a COVID report which immediately goes to Health and Medical Services Nurse Manager
 - Impacted parents of students, staff will be notified of possible exposures or closure. This notification comes to the principal from Health and Medical Services.
 - Areas where students or employees were present will be closed and disinfected in alignment with CDC guidelines. HISD will determine timelines for cleaning based on the situation

Any Questions?

HOW DOES COVID SPREAD

- **COVID-19 is mainly spread by droplets made when people infected with the COVID-19 virus cough, sneeze, or talk.**
- **Mostly from person to person between people who are in close contact.**
- **Possibly by physical human contact such as shaking hands, touching, hugging, etc.**
- **Less by touching a surface/object that has the virus on it and then touching his or her own mouth, nose, and eyes.**

SYMPTOMS OF COVID

- Symptoms of COVID-19 range from No symptoms (asymptomatic) to severe symptoms.
- Symptoms can appear 2-14 days after being infected (exposure) with the virus, but it varies. Typically a person shows symptoms 5 days after exposure, but it can happen as early as 2 days and as late as 14 days after exposure.
- A person with no symptoms can remain contagious for at least 10 days after testing positive for COVID-19.
- It is possible to spread the virus up to 2 days before any symptoms appear and for at least 10 days after symptoms appear.
