

MEMORANDUM

November 14, 2011

TO: Board Members

FROM: Terry B. Grier, Ed.D.
Superintendent of Schools

SUBJECT: **ASSESSMENT OF STUDENT PERFORMANCE IN MAGNET PROGRAMS
REPORT: 2010–2011**

CONTACT: Carla Stevens, Research and Accountability, 713-556-6700

The HISD Magnet Program is designed and implemented to meet two objectives: a) to provide academic programs whose quality and special focus will attract students to them voluntarily from across the district, and b) to increase the percentage of students attending integrated schools. More broadly, the Magnet Program is the primary vehicle through which the district offers educational choice to students and their parents.

HISD currently sponsors four types of Magnet programs: School-Wide Program (SWP) formerly known as Add-On Program (AOP), School-Wide Vanguard Program (SWVP), School-Within-a-School (SWAS), and Separate and Unique Schools (SUS).

- The number of students enrolled in the SWAS Magnet programs increased in 2011 when compared to 2010 to 15,547. For the SWP Magnet programs, participation increased to 13,406. For the SWVP and SUS programs, enrollment was down compared to 2010.
- Students in three out of the four HISD magnet programs outperformed non-magnet students on all TAKS assessments. Stanford and Aprenda assessment results were mixed across grades and subjects.

Attached is the complete report including an analysis of districtwide performance results as well as for all HISD schools that had participating students. Data presented include TAKS, Stanford/Aprenda, and enrollment by campus by grade level. A complete analysis of the students in magnet programs and the performance of the non-magnet students are provided in this report.

ASSESSMENT OF STUDENT PERFORMANCE IN MAGNET PROGRAMS 2010–2011

Introduction

The HISD Magnet Program is designed and implemented to meet two objectives: a) to provide academic programs whose quality and special focus will attract students to them voluntarily from across the district, and b) to increase the percentage of students attending integrated schools. More broadly, the Magnet Program is the primary vehicle through which the district offers educational choice to students and their parents.

HISD currently sponsors four types of Magnet programs: School-Wide Program (SWP) formerly known as Add-On Program (AOP), School-Wide Vanguard Program (SWVP), School-Within-a-School (SWAS), and Separate and Unique Schools (SUS).

School-Wide Programs (SWPs), formerly known as Add-On-Programs, are established at existing schools that have a specific attendance zone and are designed to serve all qualified students attending the school. All qualified students who live within the attendance zone and attend the school will automatically participate in the Magnet program; there is no need to apply. In addition, students enrolled throughout HISD may apply to the program. Pre-K students do not qualify except at Dodson and Whidby. Vanguard Magnet programs are SWP's. The number of students that any school building can accommodate is its building capacity. The enrollment goal for each SWP is building capacity. To determine how many spaces may be offered to students from outside the school's zone, the school must determine how many students are zoned to the school and subtract the number from the building capacity to find the available spaces. Five percent of the available spaces are set aside and reserved for any new students who move into the zone during the school year. The remaining number of available spaces is the number of Magnet students a school may accept for the year. All SWP's are at elementary schools or K-8 schools.

School-Wide Vanguard Programs (SWVPs) are a variation of SWPs. They are school-wide Magnet programs established at existing schools that have a specific attendance zone and are designed to serve all the students attending the school who qualify for the program's specialty, gifted and talented education. All students who live within the attendance zone and/or attend the school will automatically participate in the Magnet program once it has been determined that the student qualifies as a gifted and talented student. Students not zoned to the school must apply; then they must be qualified for the specific program, be invited, return the entrance agreement, and enroll in accordance with current Magnet guidelines. SWVP's are found at the elementary and middle school levels.

School-Within-a-School (SWAS) Magnet programs are established at existing schools that have a specific attendance zone, but they are designed to serve only a subset of the school's population. Students from throughout HISD must apply to be considered for any of these programs. Students then must be qualified for a specific program, be invited, return the entrance agreement, and enroll in accordance with current Magnet guidelines. SWAS programs are designed to serve only the students in the Magnet program. All students, not zoned and zoned, must apply to be considered.

Separate and Unique Schools (SUS) are established on campuses that do not have an attendance zone. Students from throughout HISD may apply to the programs. Students then must be qualified for a specific program, be invited, return the entrance agreement, and enroll in accordance with current

Magnet guidelines. SUS programs are designed to serve all the students in the school and have no zoned students. **Figure 1** lists the types of HISD Magnet programs.

Figure 1: HISD Magnet programs by type.

A complete listing of schools, by program type and Magnet specialty, are presented in the Index following this report.

HISD's Assessment Regimen

This report analyzes the performance of HISD Magnet students on three assessment instruments: the Texas Assessment of Knowledge and Skills (TAKS), the Stanford Achievement Test Series Tenth Edition (Stanford 10), and the Aprenda 3: La prueba de logros en español (Aprenda 3).

The TAKS is a state-mandated, criterion-referenced test used as a means to monitor student performance. The English-language version measures academic achievement in reading at grades 3–9, English language arts at grades 10 and 11, mathematics at grades 3–11, writing at grades 4 and 7, social studies in grades 8, 10, and 11, and science in grades 5, 8, 10, and 11. The Spanish-language version measures the performance of students in reading and mathematics in grades 3–5, writing in grade 4, and science in grade 5. TAKS results that are presented are for all students taking the TAKS or TAKS-Accommodated form.

The Stanford 10 is a norm-referenced achievement test used to assess the level of learning that has taken place as a result of exposure to specific learning experiences and an educational environment. The following subtests on the Stanford 10 are included in this report: reading, mathematics, language, science/environment, and social sciences for grades 1–11.

The Aprenda 3 represents the high state in the evolution of Spanish-language academic achievement measures. Modeled after its companion, the Stanford 10, and developed by Hispanic educators, Aprenda 3 is the most culturally inclusive Spanish-language assessment of academic standards. It is based on the latest national norms (2004), and expanded beyond the scope of previous editions to include science and social studies. The Aprenda is given to students taught in Spanish in grades 1–8.

Student Participation

Magnet students were identified using the end-of-year Chancery Student data file for 2009–2010 and for 2010–2011. All Magnet students, including Special Education and Limited English Proficient (LEP) students with valid test results, from both years, were included in this analysis.

To determine the level of participation of Magnet students in the HISD testing regimen, the number of students tested was collected and analyzed by grade and test. The data are presented by school, school office, and districtwide. For the 2010–2011 school year, there were 44 different magnet programs located on 112 campuses.

Analysis

Two years of results were analyzed for the district as a whole, as well as data for the school offices and campuses for the appropriate grades. For the TAKS, the results from the Spring 2010 and Spring 2011 administrations were reported in terms of the percentage of students who met the state's passing standard, which was set at the panel recommend standard. Given that fifth and eighth grade students are part of the student success initiative and have multiple opportunities to take and pass reading and math, the data from the first administration were used.

For the Stanford 10 and Aprenda 3, the districtwide administration of the Stanford 10 for grades 9–11 occurred from October 25–29, 2010. In order to deal with the test being given in the fall rather than in the spring of the academic year as in years past, the norms were set to reflect the fall norming sample. The Stanford 10/Aprenda 3 was given in the spring, as usual for grades 1–8. The data reported in the report are from the Spring 2010 and Fall of 2010/Spring 2011 administrations. The Fall 2010 and Spring 2011 were given during the 2010–2011 school year and will be considered 2011 for the purpose of this report. Results reported are the Normal Curve Equivalent (NCE) for both years. The NCE is a measure that allows for comparison over time. In addition, the “at or above 50th percentile” measure was analyzed this year and provides a baseline for average student performance.

It should be noted that NCE and At or Above 50th percentile results are being compared between spring 2010 and fall 2010/Spring 2011. The NCE and At or Above 50th percentile scores allow for comparisons over time.

Overview of Results

Participation

The numbers of students enrolled in SWP, SWVP, SWAS, and SUS Magnet programs who were tested during the 2009–2010 and 2010–2011 school years are presented in **Table 1**. These data represent the total number of students in grades 3–11 that were administered the English or Spanish TAKS during the fall and/or spring of each school year as well as the total number of students in grades 1–11 that were administered the Stanford 10 or students in grades 1–8 that were administered the Aprenda 3 in Spring 2010 and Spring 2011.

Table 1: The number of HISD Students Enrolled in SWAS, SUS, SWP, and SWVP Magnet Programs Participating in English or Spanish TAKS, Stanford 10, or Aprenda 3 in Spring 2010 and Fall/Spring 2011

Magnet Program	TAKS		Stanford		Aprenda		Enrollment	
	2010	2011	2010	2011	2010	2011	2010	2011
SWAS	12,150	13,515	13,114	14,750	661	928	13,796	15,547
SUS	4,406	4,229	4,715	4,615	69	60	5,199	4,978
SWP	7,147	7,333	10,757	11,014	2,157	2,183	13,168	13,406
SWVP	7,632	7,642	9,218	9,067	723	707	10,151	10,023

- The number of students enrolled in the SWAS and SWP Magnet programs who participated in the TAKS, Stanford 10 and Aprenda 3 increased in 2011 when compared to 2010. For the SWVP Magnet programs enrollment was down for the Stanford 10 and Aprenda 3 tests. The SUS Magnet programs participation was down for TAKS, Stanford 10, and Aprenda 3 tests.

The numbers of students enrolled in SWP, SWVP, SWAS, and SUS Magnet programs in grades 1–11 by demographic group for the 2009–2010 and 2010–2011 school years are presented in **Table 2**.

Table 2: The number of HISD Students Enrolled in SWAS, SUS, SWP, and SWVP Magnet Programs by Demographic Group in Spring 2010 and 2011

%	SWAS		SUS		SWP		SWVP	
	2010	2011	2010	2011	2010	2011	2010	2011
African American	32.5	30.4	34.9	32.0	29.7	27.7	18.2	16.6
Asian	4.9	4.1	13.7	13.7	5.6	5.3	2.6	2.3
Hispanic	49.7	53.3	38.5	38.8	47.0	47.2	67.5	68.5
White	12.6	10.9	12.7	13.8	17.5	17.9	11.5	11.5
LEP	9.9	12.7	4.8	4.7	27.5	27.1	26.5	26.1
Econ Dis.	66.2	70.3	54.9	55.0	66.1	65.6	76.6	77.7

- In 2011, enrollment was down for African American students enrolled in each Magnet program. For Asian students, enrollment decreased over the last year for SWAS, SWP, and SWVP Magnet programs but remained constant for the SUS Magnet program. Enrollment was up, slightly, from 2010 to 2011 for Hispanic students enrolled in each of the four Magnet programs. For white students, enrollment increased or remained constant for three of the programs SUS, SWP, and SWVP programs and down for SWAS. Enrollment for the LEP students decreased in three of the Magnet programs SUS, SWP, and SWVP and increased in the SWAS program. In regard to

economically disadvantaged students, enrollment in three of the Magnet programs increased over the last year but decreased for SWP.

The following discussion will compare the performance of students in each of the Magnet programs on the TAKS and the Stanford by subject: reading, mathematics, science, and social studies. The figures (see **Appendices A-C** at the end of this section) present two years of data for each program, by grade, and include districtwide (non-Magnet) passing rates for all students for further reference and comparison. The percentage of students performing on grade level, by grade, by Magnet program, plus districtwide (non-Magnet) percentages are included in the campus pages that begin in Appendix D. All districtwide results include non-Magnet students only. The TAKS measure used is the percentage of all students passing the English and Spanish versions of TAKS and TAKS-Accommodated. For the Stanford 10 and Aprenda 3, the normal curve equivalent scores are used. Campus and school office results from the TAKS, Stanford 10 and Aprenda 3 subtests are presented in Appendix D at the end of this report. Schools that are totally (100%) Magnet will not have non-Magnet student group data on the campus pages. Those Magnet programs that are 100% Magnet include the SWP, SWVP, and SUS. For complete detail regarding the structure of the Magnet programs including admissions into any Magnet program, please contact the Office of School Choice.

Reading

TAKS

Appendix A-1 includes the percentage of students in grades 3–11 who passed the 2010 and 2011 TAKS reading test, by Magnet program type, as well as the district's (non-Magnet) performance for comparison.

- On the 2011 administration of the TAKS reading test, the percent passing ranged from 89 to 99, 89 to 98, 86 to 100, and 81 to 93 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the percent passing for the district non-Magnet ranged from a low of 76 to a high of 90.
- In 2011, students across all grade levels and Magnet programs had higher passing rates than the passing rates of their respective grade-level districtwide non-Magnet counterparts.

Stanford

Appendix B-1 includes the normal curve equivalent scores (NCE) of students in grades 1–11 on the Spring 2010 and Fall 2010/Spring 2011 Stanford 10 reading section, by Magnet program type, as well as the district's performance for comparison.

- On the 2011 administration of the Stanford 10 reading test, NCE scores ranged from 52 to 61, 58 to 68, 48 to 55, and 43 to 58 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the NCEs for the district non-Magnet ranged from a low of 40 to a high of 47.
- In 2011, students across all grade levels and Magnet programs had higher NCE scores than those of their respective grade-level districtwide non-Magnet counterparts.

Aprenda

Appendix C-1 includes the normal curve equivalent scores (NCE) of students in Magnet programs at grades tested and for the district (non-Magnet) on the Spring 2010 and Fall 2010/Spring 2011 Aprenda 3 reading section, by Magnet program type. Fewer students take the Aprenda as grade level increases due to district policy on exiting students from bilingual classrooms. That feature should be taken into consideration in any generalization.

- In 2011, non-Magnet students taking the Aprenda 3 had higher NCE scores than those students enrolled in grades two and four of the SWAS Magnet programs; the same NCE score in grade two of the SUS programs; higher scores on grades 1–3 of the SWP programs; and a higher score in grade four of the SWVP programs.

Mathematics

TAKS

Appendix A-2 includes the percentage of Magnet students in grades 3–11 who met the state standard on the Spring 2010 and 2011 TAKS mathematics test by Magnet program type as well as the district's (non-Magnet) passing rates for comparison.

- On the 2011 administration of the TAKS mathematics test, the percent passing ranged from 90 to 97, 80 to 99, 84 to 91, and 80 to 95 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the percent passing of non-Magnet students ranged from a low of 60 to a high of 85.
- In 2011, students across all grade levels and Magnet programs had higher passing rates than the passing rates of their respective grade-level districtwide counterparts.

Stanford

Appendix B-2 presents the normal curve equivalent scores of students in grades 1–11 on the Spring 2010 and Fall 2010/Spring 2011 Stanford 10 mathematics subtest by Magnet program type. The district's 2011 mathematics performance is also provided for comparison.

- On the 2011 administration of the Stanford 10 mathematics test, NCE scores ranged from 58 to 67, 59 to 73, 56 to 66, and 53 to 68 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the NCEs for the district non-Magnet students ranged from a low of 46 to a high of 54.
- In 2011, students across all grade levels and Magnet programs had higher NCE scores than those of their respective non-Magnet grade-level counterparts.

Aprenda

Appendix C-2 includes the normal curve equivalent scores (NCE) of Magnet students by program at grades tested and for the district (non-Magnet) on the Spring 2010 and Fall 2010/Spring 2011 Aprenda 3 mathematics section. Fewer students take the Aprenda as grade level increases due to district policy on exiting students from the bilingual program. That feature should be taken into consideration in any generalization.

- In 2011, non-Magnet HISD students taking the Aprenda 3 mathematics section outperformed those students enrolled in grade one SUS and SWP Magnet programs; grade two SWAS programs, and grade four SWVP programs. The remaining grades for each of the Magnet programs outperformed the district.

Writing

TAKS

Appendix A-3 presents the percentage of students in grades 4 and 7 who met the state standard on the Spring 2010 and 2011 TAKS writing test, by Magnet program type, as well as the district's (non-Magnet) passing rates for comparison.

- In 2010 and 2011, students across both grades and Magnet programs had higher passing rates than the passing rates of their respective grade-level districtwide non-Magnet counterparts. The only exception was in grade 7 where the SWVP had the same score as the district.

Language

Stanford

Appendix B-3 presents the normal curve equivalent scores of students in grades 1–11 on the Spring 2010 and Fall 2010/Spring 2011 Stanford 10 language subtest by Magnet program type. The district's 2011 non-Magnet language performance is also provided for comparison.

- On the 2011 administration of the Stanford language test, the NCE scores ranged from 53 to 61, 56 to 69, 51 to 59, and 46 to 64 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the NCEs for the district non-Magnet students ranged from a low of 40 to a high of 52.
- In 2011, students across all grades levels enrolled in Magnet programs had higher NCE scores than those of their respective grade-level districtwide non-Magnet counterparts.

Aprenda

Appendix C-3 includes the normal curve equivalent scores (NCE) of Magnet students by program type and for the district (non-Magnet) at tested grades on the Spring 2010 and Fall 2010/Spring 2011 Aprenda 3 language section, by Magnet program type. Fewer students test as the grade level increases due to district policy on exiting students from the bilingual program. That feature should be taken into consideration in any generalization.

- In 2011, HISD students outperformed the SUS and SWVP Magnet students in first grade, the SWAS Magnet students in second grade, the SWP Magnet students in third grade, and the SWAS, SWP, and SWVP Magnet students in fourth grade.

Science

TAKS

Appendix A-4 presents the percentage of students in grades 5, 8, 10, and 11 who passed the Spring 2010 and Spring 2011 TAKS science test by Magnet program type. The district's passing rates for non-Magnet students are also provided for comparison.

- In 2011, students across all grade levels and Magnet programs had higher passing rates than the passing rates of their respective grade-level districtwide non-Magnet counterparts.

Environment/Science

Stanford

Appendix B-4 includes the normal curve equivalent scores (NCE) of students in grades 1–11 on the Spring 2010 and Fall 2010/Spring 2011 Stanford 10 environment/science section, by Magnet program type, as well as the district's non-Magnet performance for comparison. Grades 1 and 2 take environment while grades 3–11 take science.

- On the 2011 administration of the Stanford env/science test, the NCE scores ranged from 55 to 70, 54 to 73, 55 to 66, and 52 to 67 for the SWAS, SUS, SWP and SWVP Magnet programs,

respectively, while the NCEs for the district non-Magnet students ranged from a low of 45 to a high of 56.

- In 2011, students across all grades levels enrolled in Magnet programs had higher NCE scores than those of their respective grade-level districtwide non-Magnet counterparts.

Aprenda

Appendix C-4 includes the normal curve equivalent scores (NCE) of students in Magnet programs at grades that tested and for the district (non-Magnet) on the Spring 2010 and Fall 2010/Spring 2011 Aprenda 3 environment/science section, by Magnet program type. Fewer students test as the grade level increases due to district policy on exiting students from the bilingual program. That feature should be taken into consideration in any generalization.

- In 2011, HISD students taking the Aprenda 3 environment/science section outperformed SUS, SWP, and SWVP Magnet students in first grade; SWAS, SUS, and SWVP Magnet students in second grade; SWP and SWVP Magnet students in third grade; and the SWAS, SWP, and SWVP Magnet programs in fourth grade.

Social Studies

TAKS

Appendix A-5 presents the percentage of students in grades 8, 10, and 11 who passed the Spring 2010 and Spring 2011 TAKS social studies test by Magnet program type. The district's 2011 passing rates for non-Magnet students are also provided for comparison.

- In 2011, students across all grade levels and Magnet programs had higher passing rates than the passing rates of their respective grade-level districtwide non-Magnet counterparts.

Social Science

Stanford

Appendix B-5 includes the normal curve equivalent scores (NCE) of students in grades 3–11 on the Spring 2010 and Fall 2010/Spring 2011 Stanford 10 Social Science section, by Magnet program type, as well as the district's non-Magnet student performance for comparison.

- On the 2011 administration of the Stanford social science test, the NCE scores ranged from 55 to 64, 58 to 69, 52 to 58, and 43 to 60 for the SWAS, SUS, SWP and SWVP Magnet programs, respectively, while the NCEs for the district ranged from a low of 40 to a high of 51.
- In 2011, students across all grades levels enrolled in Magnet programs had higher average NCE scores than those of their respective grade-level districtwide non-Magnet counterparts.

Aprenda

Appendix C-5 includes the normal curve equivalent scores (NCE) of students in Magnet programs at grades that tested and for the district (non-Magnet) on the Spring 2010 and Fall 2010/Spring 2011 Aprenda 3 social science section, by Magnet program type. Fewer students test as the grade level increases due to district policy on exiting students from the bilingual program. That feature should be taken into consideration in any generalization.

- In 2011, HISD students taking the Aprenda 3 social science section outperformed the SWP Magnet students in third grade, and the SWP and SWVP Magnet students in fourth grade.

- Social science performance on the Aprenda 3 increased in all grades and Magnet programs except for the SWVP Magnet programs in sixth grade over the previous year.

Discussion

The 2010–2011 school year was the eighth administration of the Texas Assessment of Knowledge and Skills (TAKS) test which replaced the previous Texas Assessment of Academic Skills test. Starting in the 2011–2012 school year, the state will replace TAKS with the new and more rigorous State of Texas Assessments of Academic Readiness (STAAR). Also, 2010–2011 represents the eighth year of Stanford 10.

The number of students enrolled in the SWAS and SWP Magnet programs who participated in the TAKS increased. Participants in the SWAS, SUS, and SWP Magnet programs increased in the Stanford 10 and Aprenda 3 for 2011 when compared to 2010. Enrollment in Magnet programs decreased for African American students, across all programs over the previous year. For the Hispanic student group, enrollment increased slightly in all the Magnet programs. For the Asian, white, LEP, and economically disadvantaged student groups, enrollment from 2010 to 2011 was relatively mixed depending on the programs.

Districtwide non-Magnet student performance was lower on both the TAKS and Stanford 10 assessments, across subjects and grade levels, when compared to that of the Magnet programs but higher in some grades and lower in others on the Aprenda 3 assessment. Scores varied by type of Magnet program.
