SDMC MINUTES

January 15, 2025

Minutes:

The committee discussed and agreed that placing greater emphasis on student achievement, rather than on the quality of instruction, is more meaningful. Furthermore, we are aligned in recognizing the campus action plan play a critical component of the school's progress and improvement.

With regards to the student surveys, the committee believes that, without a clear and unbiased parameters, including them in the teacher evaluation may compromise fairness and may not be appropriate to be included in an evaluation especially in the primary grades. However, implementing structured student feedback at the end of the year as a school system separate from the teacher evaluation, could offer valuable insights, enabling teachers to reflect on areas for improvement from the students' perspective.

Finally, after careful deliberation, the committee has selected Framework C as its top choice, followed by Framework A as the second choice, and Framework B as the third choice.
