### Mathematical Process Standards

The student uses mathematical processes to acquire and demonstrate mathematical understanding.

- **MATH.1.1A** Apply mathematics to problems arising in everyday life, society, and the workplace.
- **MATH.1.1B** Use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution.
- **MATH.1.1C** Select tools, including real objects, manipulatives, paper/pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems.
- **MATH.1.1D** Communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate.
- **MATH.1.1E** Create and use representations to organize, record, and communicate mathematical ideas.
- **MATH.1.1F** Analyze mathematical relationships to connect and communicate mathematical ideas.
- **MATH.1.1G** Display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.

### Recite Numbers and Skip Count (4 lessons)

**Algebraic Reasoning**

The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.

- **MATH.1.5A** Recite numbers forward and backward from any given number between 1 and 120.
- **MATH.1.5B** Skip count by twos, fives, and tens to determine the total number of objects up to 120 in a set.

## 2019-2020 Scope and Sequence

**Mathematics – Grade 1**

### Cycle 4

<table>
<thead>
<tr>
<th>Unit</th>
<th>Number of Lessons</th>
<th>Texas Essential Knowledge and Skills/Student Expectations (TEKS/SEs)</th>
</tr>
</thead>
</table>
| **Unit 15: Length** Students will use tools to describe and measure length. | 5 90-minute lessons | **Length** (5 lessons)  
**Geometry and Measurement**  
The student applies mathematical process standards to select and use units to describe length and time.  
MATH.1.7A Use measuring tools to measure the length of objects to reinforce the continuous nature of linear measurement.  
MATH.1.7B Illustrate that the length of an object is the number of same-size units of length that, when laid end-to-end with no gaps or overlaps, reach from one end of the object to the other.  
MATH.1.7C Measure the same object/distance with units of two different lengths and describe how and why the measurements differ.  
© MATH.1.7D Describe a length to the nearest whole unit using a number and a unit. |

Extend Review  
Assess  
Reteach | Apr. 2-8 |
|      |                  | **Spring Holiday**  
Apr. 10 |
| **Unit 16: Time** Students will tell time to the nearest hour and half hour. | 6 90-minute lessons | **Time** (6 lessons)  
**Geometry and Measurement**  
The student applies mathematical process standards to select and use units to describe length and time.  
© MATH.1.7E Tell time to the hour and half hour using analog and digital clocks. |
|      |                  | **Suggested Pacing:**  
Extend Review  
Assess  
Reteach | Apr. 13-20 |

The recommended number of lessons is less than the number of days in the grading cycle to accommodate differentiated instruction, extended learning time, and assessment days. Complete instructional planning information and support are in the HISD Curriculum documents.
## Unit: Addition and Subtraction Word Problems to 20

Students will develop and use strategies for whole number addition and subtraction computations in order to represent, solve, and generate word problems within 20.

### Texas Essential Knowledge and Skills/Student Expectations (TEKS/SEs)

The student will:

- **Addition and Subtraction Word Problems to 20** (10 lessons)
- **Number and Operations**
  
  The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.

  MATH.1.3B Use objects and pictorial models to solve word problems involving **joining**, **separating**, and comparing sets within 20 and unknowns as any one of the terms in the problem such as \(2 + 4 = \underline{}\); \(3 + \underline{} = 7\); and \(5 = \underline{} - 3\).

  MATH.1.3C Compose 10 with two or more addends with and without concrete objects.

  MATH.1.3D Apply basic fact strategies to add and subtract within 20 using strategies, including making 10 and decomposing a number leading to a 10.

  MATH.1.3E Explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.

- **Algebraic Reasoning**

  The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.

  MATH.1.5D Represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.

  MATH.1.5E Understand that the equal sign represents a relationship where expressions on each side of the equal sign represent the same value(s).

  MATH.1.5F Determine the unknown whole number in an addition or subtraction equation when the unknown may be any one of the three or four terms in the equation.

- **Data Analysis**

  The student applies mathematical process standards to organize data to make it useful for interpreting information and solving problems.

  MATH.1.8C Draw conclusions and generate and answer questions using information from picture and bar-type graphs.
## Cycle 4

<table>
<thead>
<tr>
<th>Unit</th>
<th>Number of Lessons</th>
<th>Texas Essential Knowledge and Skills/Student Expectations (TEKS/SEs)</th>
</tr>
</thead>
</table>
| **Unit 18: Financial Literacy** | 5 90-minute lessons | **Financial Literacy** (5 lessons)  
   The student will: |
| **Personal Financial Literacy** | |  
   The student applies mathematical process standards to manage one’s financial resources effectively for lifetime financial security.  
   MATH.1.9A Define money earned as income.  
   MATH.1.9B Identify income as a means of obtaining goods and services, oftentimes making choices between wants and needs.  
   MATH.1.9C Distinguish between spending and saving.  
   MATH.1.9D Consider charitable giving. |
| **Suggested Pacing:** | May 11-15 | |
| **Unit 19: Addition and Subtraction Word Problems to 20** | 7 90-minute lessons | **Addition and Subtraction Word Problems to 20** (7 lessons)  
   The student will: |
| **Number and Operations** | |  
   The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.  
   ® MATH.1.3B Use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = [ ]$; $3 + [ ] = 7$; and $5 = [ ] - 3$.  
   MATH.1.3D Apply basic fact strategies to add and subtract within 20 using strategies, including making 10 and decomposing a number leading to a 10.  
   MATH.1.3E Explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.  
   ® MATH.1.3F Generate and solve problem situations when given a number sentence involving addition or subtraction of numbers within 20.  
   **Algebraic Reasoning**  
   The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.  
   ® MATH.1.5D Represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.  
   ® MATH.1.5G Apply properties of operations to add and subtract two or three numbers.  
   **Data Analysis**  
   The student applies mathematical process standards to organize data to make it useful for interpreting information and solving problems.  
   ® MATH.1.8C Draw conclusions and generate and answer questions using information from picture and bar-type graphs. |
| **Suggested Pacing:** | May 18-27 |  
   Extend | Review  
   Assess | Reteach  
   May 28-29 |
