Cycle 1
29 Days
Aug. 26 - Oct. 4, 2019

Unit 1: Chemistry
Students compare properties of matter, make models of elements, calculate density of unknown substances, explain the arrangement of the Periodic Table, and compare and contrast properties of metals, nonmetals, and metalloids.

# Class Periods
8 class periods (90-min. each) or 16 class periods (45-min. each)

Science Process Standards:
- SCI.6.1A Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards.
- SCI.6.1B Practice appropriate use and conservation of resources including disposal, reuse, or recycling of materials.
- SCI.6.2A Plan and implement comparative and descriptive investigations by making observations, asking well defined questions, and using appropriate equipment and technology.
- SCI.6.2B Design and implement experimental investigations by making observations, asking well defined questions, formulating testable hypotheses, and using appropriate equipment and technology.
- SCI.6.2C Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers.
- SCI.6.2D Construct tables, using repeated trials and means, to organize data and identify patterns.
- SCI.6.3B Use models to represent aspects of the natural world such as a model of Earth's layers.
- SCI.6.3C Identify advantages and limitations of models such as size, scale, properties, and materials.
- SCI.6.3B Use models to represent aspects of the natural world such as a model of Earth's layers.
- SCI.6.3C Identify advantages and limitations of models such as size, scale, properties, and materials.
- SCI.6.4A Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information.
- SCI.6.8.3D Relate the impact of research on scientific thought and society, including the history of science and contributions of scientists as related to the content.

Science Content Standards:
- SCI.6.5A Know that an element is a pure substance represented by a chemical symbol and that a compound is a pure substance represented by a chemical formula.
- SCI.6.5B Recognize that a limited number of the many known elements comprise the largest portion of solid Earth, living matter, oceans, and the atmosphere.
- SCI.6.5C Identify the formation of a new substance by using the evidence of a possible chemical change such as production of a gas, change in temperature, production of a precipitate, or color change.
- SCI.6.6A Compare metals, nonmetals, and metalloids using physical properties such as luster, conductivity or malleability.
- SCI.6.6B Calculate density to identify an unknown substance.
## Cycle 1

<table>
<thead>
<tr>
<th>Unit</th>
<th># Class Periods</th>
<th>Texas Essential Knowledge and Skills/Student Expectations (TEKS/SEs)</th>

<tbody>
<tr>
<td></td>
<td>29 Days Aug. 26 - Oct. 4, 2019</td>
<td>The recommended number of class periods is less than the number of days in the grading cycle to accommodate differentiated instruction, extended learning time, and assessment days. Complete instructional planning information and support are in the HISD Curriculum documents.</td>
</tr>
</tbody>
</table>

The student will:

- **SCI.8.5A** Describe the structure of atoms including the masses, electrical charges and locations of protons and neutrons in the nucleus and electrons in the electron cloud.
- **SCI.8.5B** Identify that protons determine an element's identity and valence electrons determine its chemical properties, including reactivity.
- **SCI.8.5C** Interpret the arrangement of the Periodic Table including groups and periods, to explain how properties are used to classify elements.

### Unit 2: Rock Cycle

Students model the layers of Earth, test properties of minerals, and classify rocks by the process of their formation.

- **3 class periods (90-min. each)** or **6 class periods (45-min. each)**
- **Labor Day Sept. 2**
- **Early Dismissal Sept. 27**

### Science Process Standards:

- **SCI.6.1A** Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards.
- **SCI.6.1B** Practice appropriate use and conservation of resources including disposal, reuse, or recycling of materials.
- **SCI.6.2C** Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers.
- **SCI.6.2D** Construct tables, using repeated trials and means, to organize data and identify patterns.
- **SCI.6.2E** Analyze data to formulate reasonable explanations, communicate valid conclusions supported by the data, and predict trends.
- **SCI.6.3A** Analyze, evaluate, and critique scientific explanations by using empirical evidence, logical reasoning and experimental and observational testing, so as to encourage critical thinking by the student.
- **SCI.6.3B** Use models to represent aspects of the natural world such as human body systems, and plant and animal cells.
- **SCI.6.3C** Identify advantages and limitations of models such as size, scale, properties, and materials.
- **SCI.6.3D** Relate the impact of research on scientific thought and society including the history of science and contributions of scientists as related to the content.
- **SCI.6.4A** Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information.
- **SCI.6.4B** Use preventative safety equipment including chemical splash goggles, aprons, and gloves and be prepared to use emergency safety equipment including an eye/face wash, a fire blanket, and a fire extinguisher.

### Science Content Standards:

- **SCI.6.6C** Test the physical properties of minerals including hardness, color, luster, and streak.
- **SCI.6.10A** Build a model to illustrate the compositional and mechanical layers of Earth including the inner core, outer core, mantle, crust, asthenosphere, and lithosphere.
- **SCI.6.10B** Classify rocks as metamorphic, igneous, or sedimentary by the processes of their formation.
## Scope and Sequence

### Science – Grade 6 Accelerated Pre-AP®

| **Unit 3:** Maps, Plate Tectonics, Satellite Images | 5 class periods (90-min. each) or 10 class periods (45-min. each) | **Science Process Standards:**
- SCI.6.1A Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards.
- SCI.6.1B Practice appropriate use and conservation of resources including disposal, reuse, or recycling of materials.
- SCI.6.2A Plan and implement comparative and descriptive investigations by making observations, asking well defined questions, and using appropriate equipment and technology.
- SCI.6.2C Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers.
- SCI.6.2E Analyze data to formulate reasonable explanations, communicate valid conclusions supported by the data, and predict trends.
- SCI.6.3A Analyze, evaluate, and critique scientific explanations by using empirical evidence, logical reasoning and experimental and observational testing, so as to encourage critical thinking by the student.
- SCI.6.3B Use models to represent aspects of the natural world such as a model of Earth's layers.
- SCI.6.3C Identify advantages and limitations of models such as size, scale, properties, and materials.
- SCI.6.4A Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information.
- SCI.6.4B Use preventative safety equipment including chemical splash goggles, aprons, and gloves and be prepared to use emergency safety equipment including an eye/face wash, a fire blanket, and a fire extinguisher.

**Science Content Standards:**
- SCI.6.10C Identify the major tectonic plates including Eurasian, African, Indo-Australian, Pacific, North American, and South American.
- SCI.6.10D Describe how plate tectonics causes major geological events, such as ocean basin formation, earthquakes, volcanic eruptions, and mountain building.
- SCI.8.9A Describe the historical development of evidence that supports plate tectonic theory.
- SCI.8.9B Relate plate tectonics to the formation of crustal features.
- SCI.8.9C Interpret topographic maps and satellite views to identify land and erosional features and predict how these features may be reshaped by weathering.
## Cycle 2
### Unit 4: Energy

Students explore the use of energy, compare and contrast potential and kinetic energy interactions, and investigate types of energy transformations.

Complete instructional planning information and support are in the HISD Curriculum documents.

**Texas Essential Knowledge and Skills/Student Expectations (TEKS/SEs)**

The student will:

### Science Process Standards:
- SCI.6.1A Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards.
- SCI.6.2A Plan and implement comparative and descriptive investigations by making observations, asking well defined questions, and using appropriate equipment and technology.
- SCI.6.2C Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers. SCI.6.2D Construct tables, using repeated trials and means, to organize data and identify patterns.
- SCI.6.2E Analyze data to formulate reasonable explanations, communicate valid conclusions supported by the data, and predict trends.
- SCI.6.3B Use models to represent aspects of the natural world such as a model of Earth’s layers.
- SCI.6.3C Identify advantages and limitations of models such as size, scale, properties, and materials.
- SCI.6.3D Relate the impact of research on scientific thought and society including the history of science and contributions of scientists as related to the content.
- SCI.6.4A Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information.

### Science Content Standards:
- SCI.6.8A Compare and contrast potential and kinetic energy.
- SCI.6.8B Identify and describe the changes in position, direction, and speed of an object when acted upon by unbalanced forces.
- SCI.6.8C Calculate average speed using distance and time measurements.
- SCI.6.8D Measure and graph changes in motion.
- SCI.8.6A Demonstrate and calculate how unbalanced forces change the speed or direction of an object’s motion.
- SCI.8.6B Differentiate between speed, velocity and acceleration.
- SCI.8.6C Investigate and describe applications of Newton's three laws of motion such as in vehicle restraints, sports activities, amusement park rides, Earth's tectonic activities, and rocket launches.

| Unit 5: Force and Motion | Students explore changes the motion of objects, calculate speed of objects, graph changes in motion, and investigate Newton's Laws of Motion in everyday situations. | 8 class periods (90-min. each) | or | 16 class periods (45-min. each) | Nov. 11-Dec. 19, 2019 | The recommended number of class periods is less than the number of days in the grading cycle to accommodate differentiated instruction, extended learning time, and assessment days. Complete instructional planning information and support are in the HISD Curriculum documents. | **SCI.6.1A** | Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards. **SCI.6.2A** | Plan and implement comparative and descriptive investigations by making observations, asking well defined questions, and using appropriate equipment and technology. **SCI.6.2C** Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers. **SCI.6.2D** Construct tables, using repeated trials and means, to organize data and identify patterns. **SCI.6.2E** Analyze data to formulate reasonable explanations, communicate valid conclusions supported by the data, and predict trends. **SCI.6.3B** Use models to represent aspects of the natural world such as a model of Earth’s layers. **SCI.6.3C** Identify advantages and limitations of models such as size, scale, properties, and materials. **SCI.6.3D** Relate the impact of research on scientific thought and society including the history of science and contributions of scientists as related to the content. **SCI.6.4A** Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information. **SCI.6.8A** Compare and contrast potential and kinetic energy. **SCI.6.8B** Identify and describe the changes in position, direction, and speed of an object when acted upon by unbalanced forces. **SCI.6.8C** Calculate average speed using distance and time measurements. **SCI.6.8D** Measure and graph changes in motion. **SCI.8.6A** Demonstrate and calculate how unbalanced forces change the speed or direction of an object’s motion. **SCI.8.6B** Differentiate between speed, velocity and acceleration. **SCI.8.6C** Investigate and describe applications of Newton’s three laws of motion such as in vehicle restraints, sports activities, amusement park rides, Earth’s tectonic activities, and rocket launches.

Cycle 6

<table>
<thead>
<tr>
<th>Unit</th>
<th>38 Days: Apr. 6 - May 29, 2020</th>
<th># Class Periods</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit 11:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Cells</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Students identify and describe basic components of cells and compare characteristics of prokaryotic to eukaryotic cells.</td>
<td>5 class periods (90-min. each) or 10 class periods (45-min. each)</td>
<td></td>
</tr>
</tbody>
</table>

The recommended number of class periods is less than the number of days in the grading cycle to accommodate differentiated instruction, extended learning time, and assessment days. Complete instructional planning information and support are in the HISD Curriculum documents.

**Science Process Standards:**
SCI.6.1A Demonstrate safe practices during laboratory and field investigations as outlined in the Texas Education Agency – approved safety standards.
SCI.6.2A Plan and implement comparative and descriptive investigations by making observations, asking well defined questions, and using appropriate equipment and technology.
SCI.6.2B Collect and record data using the International System of Units (SI) and qualitative means such as labeled drawings, writing, and graphic organizers.
SCI.6.2C Construct tables, using repeated trials and means, to organize data and identify patterns.
SCI.6.2D Analyze data to formulate reasonable explanations, communicate valid conclusions supported by the data, and predict trends.
SCI.6.3A Analyze, evaluate, and critique scientific explanations by using empirical evidence, logical reasoning and experimental and observational testing, so as to encourage critical thinking by the student.
SCI.6.3B Use models to represent aspects of the natural world such as a model of Earth’s layers.
SCI.6.3C Identify advantages and limitations of models such as size, scale, properties, and materials.
SCI.6.3D Relate the impact of research on scientific thought and society including the history of science and contributions of scientists as related to the content.
SCI.6.4A Use appropriate tools including journals/notebooks, beakers, Petri dishes, meter sticks, graduated cylinders, hot plates, test tubes, microscopes, thermometers, calculators, computers, timing devices, and other necessary equipment to collect, record and analyze information.
SCI.6.4B Use preventative safety equipment including chemical splash goggles, aprons, and gloves and be prepared to use emergency safety equipment including an eye/face wash, a fire blanket, and a fire extinguisher.

**Science Content Standards:**
SCI.6.12A Understand that all organisms are composed of one or more cells.
SCI.6.12B Recognize the presence of a nucleus is a key factor used to determine whether a cell is prokaryotic or eukaryotic.
Unit 12: Classifying Organisms
Students identify and classify organisms from currently recognized domains.
