Executive Summary

Background
The Construction Audit Department of the Office of Internal Audit is responsible for reviewing construction and related projects for the HISD Bond Office. Each year the department puts together an audit plan of selected bond projects to audit. Risk areas, such as prior contractor history, or lack thereof, construction timelines and project dollar values are all considered during the development of the Audit plan. In addition, an attempt is made to include projects with different contractors for more complete audit coverage. As construction projects typically transcend audit years, each project is audited on an ongoing basis. As phases of audits and entire audits are completed, both Interim and Final Audit reports are issued to Management for responses. Those reports with management responses are then shared with the Board Audit Committee. For those projects still ongoing at the end of the audit year, an audit status report is issued to the Board Audit Committee as an update on the progress of the remaining bond projects reviewed throughout the year. At that time the ongoing projects are carried forward on the new audit plan and a review is performed to determine what additional projects can be added to the audit plan.

Audit Scope
In accordance with the 2015 Seven Month Audit Plan which became effective on June 1, 2015, Construction Audit is currently reviewing the Program Management,* Design, and Construction Services for the following schools / facilities being constructed under the 2012 Bond Program.

- Condit Elementary School
- Delmar Field House
- Furr High School
- Grady Middle School
- High School for the Performing and Visual Arts (HSPVA)
- Lee High School
- Milby High School
- South Early College High School
- Waltrip High School
- Worthing High School

*The Program Management Services for the entire 2012 Bond Program are being reviewed.

Audit Objectives
The following are the objectives for the projects selected to be audited:

- The service/work being provided has been properly approved by the Board and provided within the limits established by the Board.
- The service/work being provided has been awarded by a fair and proper bidding or selection process, in accordance with State law.
- The contracts/agreements and related changes were executed and administered properly by all parties.
- The invoicing accurately reflects the services provided under the contract and actual progress to date.
- Invoiced amounts are reconciled to the contract values including change orders.
- Invoices are reconciled to resulting payments in the SAP system.
- The change orders reflect actual approved changes, are priced accurately and fairly, and do not include scope duplication or unallowable cost items.
- In the case of a Construction Manager at Risk Contract, the costs incurred by the contractor are necessary and allowable under the terms of the agreement. (This includes a sampling of General Condition’s costs, a sampling of Payroll entries, and a 100% review of subcontracts, related changes and payments.)
- The contractor or professional service provider is carrying adequate bonding and insurance coverage in accordance with the terms of the contract/agreement. (100% of the related premiums are reviewed.)
- Verify the level of MWBE commitment on each project with the Office of Business Assistance.
