WITH ONRAMPS.

EXPERIENCE COLLEGE BEFORE COLLEGE

HOW WE WORK

OnRamps students experience college firsthand through our dual enrollment courses, designed by faculty at the University of Texas at Austin. Students are enrolled in both a high school course, taught by their campus' high school teacher, and an online college course, taught by a university faculty member.

- ✓ Grow as a scholar and leader through active learning.
- ✓ Prepare for college and a career.
- ✓ Build critical thinking and leadership skills.
- ✓ Earn transferable college credit.

74% of OnRamps students who graduated in 2019 immediately enrolled in a two- or four-year college or university.

OUR COURSES

OnRamps offers 16 courses spanning Science, Technology, Mathematics, Arts, and Humanities. There is no application or test required to enroll, and students receive comprehensive support throughout the year.
