Unsat	Prog. I	Prog. II	Prof. I	Prof. II	Exemp. I	Exemp. II
10-18	19-29	30-42	43-57	58-71	72-85	86-100

THE TARGET DISTRIBUTION

The method of linking cut-points to a “target distribution” is an elegant solution to the problem of ensuring equal rigor across the system.

- **No organization can maximize its effectiveness if what it values is disconnected from how it compensates its employees.**
