

WORLD TOILET DAY

November 19, 2017

Why We Celebrate

Many people die without toilets. Not having access to toilets leads to poor sanitation. Today we make a difference by making donations to reach our goal. Our goal is to have everyone in the world have toilets.

FYI:

- Everyday, 1.5 million children die because of no sanitation.
- About one third of the world population doesn't have toilets.
- At least 68% of the world population have toilets, which means 32% don't have toilets.
- Our goal is to have 100% of the world to have toilets.
- Every 12 hours people use 1 bucket of water.

Make the change. Raise awareness.

Put World Toilet Day on social media using

#WorldToiletDay

Or you can make a video!
