Topics Covered:

The meeting commenced at 8:02 AM.

The SDMC reviewed **budget** information as well as student, teacher, and overall campus needs.

Smart TVs are being considered for purchase throughout the campus as components of the current interactive white boards from 2012 are beginning to fail (ie: bulbs and projectors). The cost of replacing the projector components is substantial. A representative from

every content area has been able to view the proposed smart televisions.

Questions are whether they include closed captioning and also about specific warranty info.

Teacher desktops are also being considered along with additional RAM.

Employees are asked to submit requisitions for instructional supplies or needs as soon as possible.

CVHS students will receive a survey to collect their thoughts and ideas

about enhancements to the campus.

Cement has been poured near the top of the amphitheater to accommodate sheds to house equipment for physical education and theatre.

Physical education equipment will be moved to the sheds in order to clear office space for Coach Lamane in the gym.

CVHS celebrates Women's History Month (March 2021).
