What Parents & Carers Need to Know about TikTok

TikTok is a video-sharing social media app which lets people create, view, and download looping 15-second clips. Typically, these are videos of users lip-syncing and dancing to popular songs or soundbites (often for comic purposes), enhanced with filters, effects, and text. Designed with young people in mind, TikTok skyrocketed in popularity in 2019 and has featured near the top of download charts ever since. It now has around a billion users worldwide.

**Age Appropriateness Content**
Most videos appearing on a child’s feed are light-hearted and amusing. However, some clips have been reported for featuring drug and alcohol abuse, themes of suicide and self-harm, or young teens acting in a sexually suggestive way. The sheer volume of uploads is impossible to moderate entirely — and since TikTok Jump’s introduction in mid-2021, users can view third-party content outside the app.

**Explicit Songs**
TikTok primarily revolves around videos of users lip-syncing and dancing to music. Inevitably, some featured songs will contain explicit or suggestive lyrics. Given the app’s young user-base, there is a risk that children may view older users’ videos and then be inclined to imitate any explicit language or suggestive actions.

**TikTok Fame**
The app has created its own celebrities. Charli D’Amelio and Lil Nas X, for example, were catapulted to fame by exposure on TikTok, leading to many more teens attempting to go viral and become “TikTok famous.” While most aspiring stars hoping to be the next big thing will find it difficult, setbacks may in turn prompt them to go even more drastic lengths to get noticed.

**Advice for Parents & Carers**

**Talk About Online Content**
Assuming your child is above TikTok’s age limit, talk to them about what they’ve viewed on the app. Ask their opinion on what’s appropriate and what isn’t. Explain why they shouldn’t give out personal details or upload videos which reveal information like their school or home address. In the long run, teaching them to think critically about what they see on TikTok could help them to become social-media savvy.

**Enable Family Pairing**
‘Family Pairing’ lets parents and carers link their own TikTok account to their child’s. Through your mobile, you can control your child’s safety settings remotely — including limiting screen time, managing their ability to exchange messages (and with whom) and blocking a lot of age-inappropriate content. TikTok’s Safety Centre also provides resources for parents and carers to support online safety among families. These resources can be found on their website.

**Maintain Privacy Settings**
The default setting for all under 16s’ accounts is ‘private’. Keeping that is the way to the safest solution. It means only users who your child approves can watch their videos. The ‘Edit’ (which lets users splice clips from other people’s videos into their own) and ‘Duet’ (where you build on another user’s content by recording your own video alongside their original) features are now only available to over 16s. This might clash with your child’s ambitions of social media stardom, but it will fortify their account against predators.

**Use Restricted Mode**
In the app’s ‘Digital Wellbeing’ section, you can filter out inappropriate content (specific content creators or hashtags, for instance) using ‘Restricted Mode’. This can then be locked with a PIN. You should note, though, that the algorithm moderating content isn’t totally dependable — so it’s wise to stay aware of what your child is watching.

**Learn About Reporting and Blocking**
With the correct privacy settings applied, TikTok is a relatively safe space. However, in case something does slip through, make sure your child knows how to recognize and report inappropriate content and get them to come to you about anything upsetting that they’ve seen. TikTok allows users to report anyone breaching its guidelines, while you can also block individual users through their profile.

**Moderate Screen Time**
As entertaining as TikTok is, you can help your child to manage their time on it in the ‘Digital Wellbeing’ section. Under ‘Screen Time Management’, you can limit the daily permitted time on the app (in increments ranging from 40 minutes to two hours). This preference can also be locked behind a PIN. That way, your child can get their regular dose of TikTok without wasting the whole day.
