Setting up your teacher account on **Khan Academy**

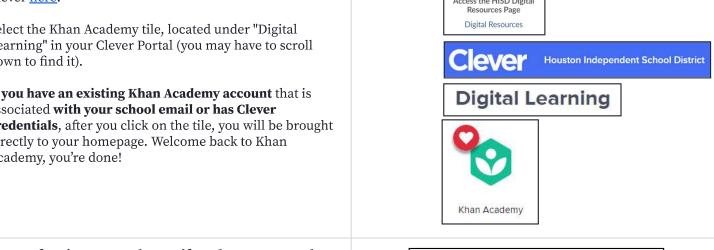

Note: This is a guide for teachers to activate district-rostered Khan Academy accounts.

Step 1: Go to Clever and select Khan Academy

Log into Clever as you normally would, with your school district username and password. Or get help logging into Clever here.

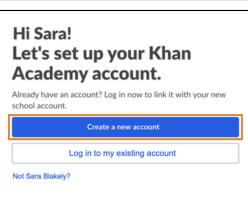

Select the Khan Academy tile, located under "Digital Learning" in your Clever Portal (you may have to scroll down to find it).

If you have an existing Khan Academy account that is associated with your school email or has Clever **credentials**, after you click on the tile, you will be brought directly to your homepage. Welcome back to Khan Academy, you're done!

Step 2: If you're new to Khan or if you have a personal Khan account that you would like to link to your district account, then follow these remaining steps.

If you're **new to Khan Academy**, clicking "Create a new account," will set up a district-rostered account for you immediately, and you will be shown a welcome message to help you get started with Khan Academy.

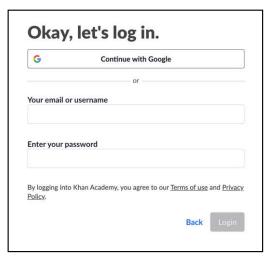

Select "**Log in to my existing account**" if you have a personal Khan Academy account that you want to link. By linking, you can view all your data in one place.

If you typically authenticate using Google Single Sign-on, select "Continue with Google," or you can enter your email or username and password.

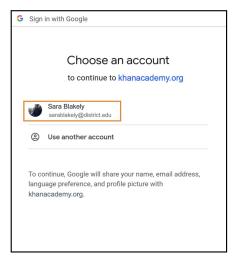

If you select "Continue with Google," you will be asked to confirm which account you want to use.

On successful authentication, we will link your existing account information (including all previously created classes) and will also display your district rostered classes and students.

Hi Sara! Let's set up your Khan Academy account. Already have an account? Log in now to link it with your new school account. Create a new account Log in to my existing account Not Sara Blakely?

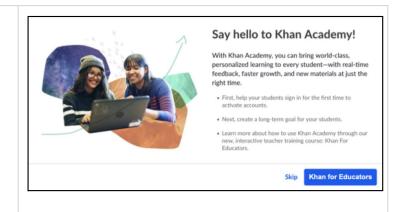

G Continue with Google

Step 3: Get started with Khan

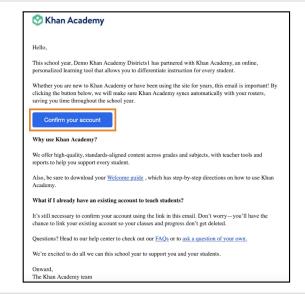

Once you're logged in, you will see a welcome message on your Teacher dashboard to help you get started with Khan Academy.

Your class names will match your district's data system. If you logged into an existing account, or linked an account, you may see classes that you created in the past on your Teacher dashboard as well. Your district-rostered classes will stay up-to-date and cannot be deleted. If you'd like to know more, view this article.

Alternate way to join: welcome email

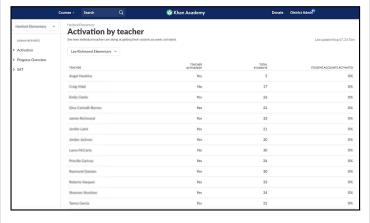

If you prefer to join via email, check the inbox of your school email address for a welcome email from Khan Academy and click "Confirm your account." The rest of the steps are similar to the above instructions.

Teachers that are also school administrators

If you have activated as a teacher and are also a school administrator for Khan Academy, we automatically give you access to administrative reporting. To access reporting, make sure that you are logged in to your teacher account and then go to khanacademy.org/districts

If you are accessing Khan Academy via Clever and would like to view administrative reporting, make sure that you are logged into Clever with your teacher account.
